Our First 90 Years

1926

The seeds for the establishment of the Bank are sown when King Abdulaziz sends his son, Foreign Minister Prince Faisal bin Abdulaziz (later King Faisal), to visit the Netherlands on a diplomatic mission to highlight Saudi-Dutch relations and trade cooperation.

1928

The Bank plays a key role in one of the most important events in the contemporary economic development of modern Saudi Arabia – the issuance of the first independent currency, the Saudi Riyal.

1930

Continuing its pioneering role in the development and modernization of the Kingdom, the Bank provides financing for the first ever imports of Ford motorcars into the country – a venture that would transform the landscape of the Kingdom and the lives of its people.

1945

The Bank performs an historic transfer of millions of Gold sovereigns into the Kingdom at the request of the Arab American Oil Company (ARAMCO).

1990

The Bank reinforces its position as an innovative force for Saudi banking by installing the first automated teller machine (ATM) in Dhahran Airport, while the Jeddah main branch inaugurates its first Corporate Banking department.

1990

The Bank adopts a fresh logo for a new decade, reflecting the changing ambitions and demographics of its customers, and the people and businesses across the Kingdom.

2003

Reflecting the latest technological developments in banking services around the world, the Bank issues the first ever Smart Credit Card to customers in the Kingdom.

2012

Aware that small and medium-sized enterprises (SMEs) are a key engine of growth in the economy and represent the very best of Saudi Arabian entrepreneurship and innovation, the Bank opens the first ever Business Banking center geared towards the SME segment.

2016

Alawwal Bank embarks on a strategic path to focus on its people: to align with the shifting times and prepare for the new era with a new image and focus.

1926

Ushering in a new era for the people of the Kingdom, the Bank (then the Netherlands Trading Society) opens its office in Jeddah and becomes the first commercial bank to operate in the country.

1927

More than 52,000 pilgrims arrive at Jeddah Port from the Dutch East Indies in 1927, representing 42 percent of all overseas pilgrims that year. In the newly established Bank they find a partner ready to serve their financial needs and support them in completing their pilgrimages.

1933

Signaling the rise of a new era in the modern development of the Kingdom, a royalty contract is signed between Saudi Arabia and the Standard Oil Company of California (SOCAL), and the first oil payment is received.

1950

The 1,700-km Trans-Arabian Pipe Line (TAPLINE) is completed, an astounding technical achievement that linked the oil fields of the Eastern Province to Lebanon and the Mediterranean.

1977

The highly revered Hussein Al Attas is appointed the Bank's first Chairman, and a network of new branches is developed with offices in Riyadh, Jubail, Makkah, Hofuf, Madinah and Qatif.

1996

Launching homegrown satellites into orbit put the power of modern telecommunications into Arab hands. People, businesses and governments across the Arab world became more connected, entertained and secure thanks to two Arabsat satellites financed by the Bank.

2005

Adding to its history of supporting pilgrims to Makkah Al Mukarrama that stretches back to its earliest years, the bank leads a consortium of eight Saudi Arabian banks in financing the new SR 1.5 billion Jamarat bridge project in Mina.

2006

The Bank celebrates its 80th anniversary in Jeddah and looks to the future with the launch of a new corporate logo and identity.

2015

In continuation to our constant development and closer presence towards our customers, we have expanded our branch network to 60 branches and increased our total number of ATMs to 500 around the Kingdom. In addition, we have also launched our innovative new generation mobile banking application.

A large, stylized number '7' is centered on the page. The top horizontal bar of the '7' is outlined in a teal color, and the bottom horizontal bar is outlined in a yellow color. The text 'DIRECTORS' REPORT' is positioned between these two bars.

DIRECTORS' REPORT

Directors' Report

For The Year Ended
31 December 2016

INTRODUCTION

The Board of Directors of Alawwal bank is pleased to present its annual report to the bank's valued shareholders for the financial year ended 31 December 2016.

2016 marked a significant milestone for the bank in its 90 year history with a fresh new brand and name change from Saudi Hollandi Bank to Alawwal bank.

Alawwal bank, Arabic for 'The First Bank', represents the banks long and proud history – as well as the future as the leading innovator of financial services in the Kingdom of Saudi Arabia.

The rebranding marked the start of a transformation that will see Alawwal bank build on its reputation for innovation and customer service excellence as we look to support the growth of the country's economy, and a new generation of tech-savvy Saudi business leaders, entrepreneurs and enterprises.

The bank's three business segments maintained good performance throughout the year with core operating profit, adjusted for one-off items, ending flat versus 2015. Net profit for 2016 came to SAR 1,065 million (~47% year-on-year). Prudent provisions were taken amid a more challenging external credit environment. The non-performing loan coverage ratio stands at 130%.

As a result of slower economic activity and credit demand, particularly in the second half of the year, the bank's total assets finished the year at SAR 105 billion, down 2.8% versus the year prior. Alawwal bank's Tier 1 capital increased by 183 basis points to 13.41% with total capital at 17.81%.

Alawwal bank continued to pursue an expansion of its retail banking business in order to diversify the bank's credit portfolio, revenue mix and funding base. Technology and the digital transformation is at the core of that expansion with the aim to enhance the customer experience. The bank's market leading internet and mobile platforms saw significant growth of 35% and 68% respectively in terms of active users in 2016. Mobile transactions grew by 171% year-on-year and the Alawwal mobile application was awarded the 'Best Mobile App of the Year' award by International Finance Magazine.

Over the last three years Alawwal bank's branch network has expanded by 50% to reach 65 and the number of ATM's have doubled in the same period, reaching 538.

Throughout 2016, the bank's achievements received recognition from a number of respected industry observers and regional and international organizations, winning 8 prestigious awards. The awards included "Bank of the Year in the Kingdom of Saudi Arabia" and "Best Islamic Bank in Saudi Arabia" from The Banker, and "Best Bank for Corporate Social Responsibility in the Kingdom of Saudi Arabia" from the International Finance Magazine.

More details on each of the business segments and their markets can be found in the Business Review section of this report.

1. BUSINESS SEGMENTS

The bank is organised into three main business segments: Corporate Banking, Personal Banking and Treasury. In addition, it provides brokerage, asset management and investment banking services through Alawwal Invest, a wholly-owned subsidiary. Other subsidiaries are the bancassurance distribution arm, Alawwal Insurance Agency and Alawwal Real Estate companies. The bank also holds a 20% shareholding in Wataniya Insurance Company.

The key services provided under each of the main operating business segments are:

1.1. Corporate Banking

The Corporate Banking Group provides institutional, corporate, and commercial customers with a wide range of products and services including term loans, trade finance, guarantees and corporate finance and advisory (in cooperation with Alawwal Invest). It also offers an extensive range of Shari'ah-compliant corporate products under Islamic structures.

1.2. Personal Banking

The Personal Banking Group operates through a national network of branches and ATMs, complemented by a range of phone banking, e-banking, and mobile banking services.

Products in this segment include: current and time deposit accounts, personal loans, home finance, and credit cards. Tailored "Preferred Banking" and "Priority" services are available to qualifying customers who place sufficient funds with the Bank, while Private Banking is offered to high networth individuals as an exclusive banking relationship with bespoke products and the highest level of personalized services through assigned senior relationship managers. Share trading services and fund management products are available through Alawwal Invest. The bank also offers a wide range of ladies banking services through a network of ladies branches.

1.3. Treasury

Alawwal bank's Treasury unit provides hedging and investment products for the bank's customers. The Treasury department has retained its leading position in foreign exchange cash products as well as in its structured derivatives businesses in foreign exchange and special commission rates. Moreover, Treasury is among the most active interbank market makers in Saudi Riyal-denominated foreign exchange and special commission rate products. Treasury is also responsible for managing the overall commission rate, liquidity and currency risk on the bank's balance sheet on behalf of the Asset and Liability Committee (ALCO).

The assets, liabilities and results of these segments are set out in Note 28 to the consolidated financial statements.

The activities and services of Alawwal bank's subsidiaries and an associate are:

Alawwal Invest.

A wholly-owned subsidiary, Alawwal Invest. commenced business activities in early 2008 following SAMA and CMA approval. Since then it has been involved in a number of significant transactions, acting as principal and agent in retail equity brokerage, asset management, corporate finance and investment advisory activity, as well as debt arrangement and securities custody services.

Alawwal Real Estate Company ("AREC").

A wholly-owned subsidiary, Alawwal Real Estate Company commenced its business activities in early 2010 following SAMA approval. AREC is involved in the registration of real estate title deeds in support of the bank's Home Finance products.

Alawwal Insurance Agency Company ("AIAC").

A wholly-owned subsidiary, Alawwal Insurance Agency commenced its operations in 2012 and is licensed by SAMA to conduct insurance agency activities.

Wataniya Insurance Company ("WIC").

The bank purchased a 20% equity stake in Wataniya Insurance Company in 2008 which enabled the bank to broaden its insurance agency capabilities to complement its retail banking offering. Wataniya was incorporated in 2010.

Further details of subsidiaries and associates are covered in Note 1 and Note 8 to the consolidated financial statements respectively and section 11 of this report.

2. STRATEGY

The bank's strategy supports the pursuit of its primary objectives: to become the bank of choice for its chosen customer segments in Corporate and Personal Banking through maximising customer value by providing comprehensive, personalised, quality service. This core objective will continue to drive business planning and management decision making.

The following are highlights of the strategy for each segment:

The Personal Banking Group

The Personal Banking Group is a digitally led financial services provider offering a comprehensive product suite as well as high quality personalized services. In 2016, Personal Banking continued its focus on leveraging our network expansion to grow assets and liabilities.

Throughout the year, the bank's network expansion initiative continued to deliver: the branch network grew to a total of 65 and we increased our installed ATM base to a total of 538. The group's emphasis on product development across the Consumer Loans, Home Finance, Cards, and Deposits businesses showed dividends with assets increasing by 24%.

The bank has made material advancements in driving social media awareness, instituting alternate channel product interaction, unifying omni-channel journeys, implementing digital marketing campaigns, and the digital transformation of branch transactions. Consequently, the number of Alawwal Online and Alawwal Mobile users increased by 57% during the year which gave rise to a 50% increase in electronic transactions. In this respect, 96% of comparable branch transactions are now being conducted through self-service channels.

Personal Banking's focus on innovation and customer experience was recognized with multiple awards, in 2016, including the "Best Mobile App in the Kingdom" from the International Finance Magazine and "Best Customer Relationship Management" from The Asian Banker. PBG's history of market-firsts continued in 2016 when Alawwal bank became the first bank in the Kingdom to launch transactional capability through wearable technology further solidifying our position in the market as a provider of breakthrough solutions to enhance customer experience.

The Corporate Banking Group

Alawwal bank is a long-established market player in the provision of corporate banking products and services to many of the most respected businesses in the Kingdom. The Corporate Banking Group aims to provide the best solutions with flawless service to small, medium-sized and large corporate customers.

Corporate Banking comprises two segments: Institutional Banking for large corporations and Corporate Banking for small and medium-sized enterprises and mid-tier corporations. This segmentation focuses resources to ensure that customer expectations are exceeded across all segments.

The bank's achievements in the Small and Medium-Sized segment was acknowledged during 2016 by an award for the "Best SME Customer Service in Saudi Arabia" from The Banker Middle East Magazine.

Treasury, Alawwal Invest, Alawwal Real Estate and Islamic Banking.

Treasury, Alawwal Invest and Alawwal Real Estate provide products, services and advisory expertise to the bank's corporate and personal banking customers. The Treasury unit provides corporate and personal banking customers with hedging solutions and investment yield enhancement offerings. Alawwal Invest offers a full range of brokerage, asset management and investment banking products. Alawwal Real Estate provides real estate purchase and registration services in support of the Bank's Home Finance business.

Additionally, the bank continues to invest in its Islamic business and is aiming to be a leader in this field. To this end, the Islamic Banking Unit provides expertise and support to all business units in the bank.

3. RISK MANAGEMENT

3.1 Introduction

Risk management is of paramount importance in a banking environment. Sound risk management ensures that all material risks are identified, measured, monitored and reported and that the risk appetite set by the Board is adhered to in the pursuit of the bank's strategic objectives.

Alawwal bank's risk management approach is guided by its Risk Governance Framework. This Framework sets out the bank's risk management principles, the roles and responsibilities of the Risk Management function and the methods used to manage risk. These methods include: internal policies; procedures; limits; stress-testing; risk monitoring; and reporting as well as regulatory requirements as set out by the Saudi Arabian Monetary Agency (SAMA). Risk management methods extend to specific guidance and techniques to be considered when structuring transactions.

The bank's Board Risk Committee (BRC) provides guidance and strategic direction to management with respect to the bank's Risk Governance Framework. The BRC is responsible for advising the Board on matters such as risk appetite and strategy, risk assessment processes, policies, regulatory developments and risk infrastructure considerations, and to provide remedial guidance should material breaches of limits occur.

3.2 Overview of risk-weighted assets and capital approach

Alawwal bank's main business activities are corporate relationship banking and retail banking in the Kingdom of Saudi Arabia. Many of the bank's corporate customers have a long-standing relationship with the bank and have stable credit histories and experience in operating through multiple economic cycles enabling the bank to take a long term view.

Over recent years, the bank has improved asset diversification by significantly growing its retail business. This has been achieved in part through the expansion of the bank's branch network and also through extending the retail product offering, notably the Home Finance product.

Being predominantly a commercial bank, Alawwal bank's balance sheet is dominated by Credit Risk assets, as demonstrated in the Pillar I risk-weighted assets as at the end of 2016.

Figure 1 Risk-Weighted Assets by type

3.2.1 Capital adequacy approach

SAMA requires all banks in the Kingdom of Saudi Arabia to operate in accordance with the Basel III framework. In addition to setting minimum international capital requirements, Basel III introduces minimum standards for Liquidity Risk: the Liquidity Coverage Ratio (LCR) and the Net Stable Funding Ratio (NSFR).

The Basel framework consists of three pillars which are intended to increase robustness and transparency within the financial system:

- **Pillar I:** refers to Minimum Capital Requirements relating to Credit Risk, Operational Risk and Market Risk. Alawwal bank prepares its Pillar I capital requirements under the standardised approach; further financial details are provided in Note 35 to the consolidated financial statements;
- **Pillar II:** the Internal Capital Adequacy Assessment Plan (ICAAP) requires banks to assess and demonstrate to the supervisor that the level of capital held adequately supports all relevant current and future risks in their business, further details are provided below in 3.2.2;
- **Pillar III:** aims to promote market discipline through regulatory disclosure requirements by enabling market participants to access key information relating to a bank's regulatory capital and risk exposures in order to increase transparency and enable comparison.

3.2.2 Pillar II ICAAP overview

An internal assessment of the sufficiency of capital against all the risk types to which the bank is exposed is performed through its annual Internal Capital Adequacy Assessment Plan (ICAAP) process. Applying a range of quantitative and qualitative techniques, the

ICAAP is an assessment of the bank's current and projected capital adequacy. Through the ICAAP management ensures and is able to demonstrate to the bank's Board of Directors and to SAMA that the bank holds sufficient capital to support all material risks to which it is exposed. Together with the bank's stress-testing programme, the ICAAP demonstrates the bank's capability to withstand stress events at varying levels of severity. It therefore reinforces the link between risks and capital so that the bank's risk appetite is integrated with its capital planning.

3.2.3 Stress testing overview

Alawwal bank's stress testing programme is performed at the enterprise-wide level and focuses on the key risk types to which the bank is exposed. 'Stress testing' refers to various techniques (quantitative and qualitative) used to gauge the bank's vulnerability to exceptional but plausible events. The bank's stress testing programme incorporates the guidelines set out by SAMA and the principles set out by the Basel committee and is a key-component of the bank's Risk Governance Framework.

In conjunction with the ICAAP, a major objective of stress testing is to demonstrate that the bank is adequately capitalised and sufficiently liquid to withstand a stress event and, in particular, would be able to restore its financial standing and operations to normal levels without undue reliance on external parties. Sensitivities that are identified during the stress-testing process are followed up with management actions with the intention of mitigating their potential impact in the event of an actual stress event.

The primary stresses focus on credit events - in both the corporate and retail portfolios - together with a reduction in earnings, stressed levels of operational losses and market risk stresses. In total, eight stress scenarios are modelled ranging from mild, severe to reverse. Liquidity stress testing scenarios consider a range of cash metrics and stressed Basel III and other regulatory liquidity.

3.3 Principal risk-types and controls

The following section provides an overview of the principal risk-types the bank is exposed to and the associated risk management approach.

The vast majority of principal risk-types have an associated risk appetite metric forming part of the Risk Appetite Statement set by the Board. On a regular basis, the Board, and its committees, monitor the results of these risk appetite metrics to obtain assurance that the bank is operating within appetite and, where adverse trends or breaches may occur, to assess the adequacy of remedial action taken by management.

The bank's Risk Appetite Statement and metrics are reviewed at least annually. Changes to risk-appetite levels may be recommended taking into account the business environment and strategic developments.

3.3.1 Credit Risk

Credit Risk is the risk of loss resulting from the failure of a borrower or counterparty to honour its financial or contractual obligations to the bank. Credit Risk arises from the bank's direct lending operations, its issuance of guarantees, bonds and like instruments, trade finance activities and its investment and trading activities.

The granting of credit to customers is a core business of the bank and accounts for a major portion of the bank's balance sheet and profitability. The quality of the credit portfolio has a direct and important impact on the bank's performance and strength. Credit policies, manuals and procedures specify lending guidelines to manage Credit Risk across the bank's portfolios.

The bank's Corporate Credit Policy & Procedures Manual (CCPPM) ensures that Credit Risk is managed to the highest standard and in a consistent manner throughout the organisation. The CCPPM embodies the core principles for identifying, measuring, approving and managing Credit Risk in all Corporate Banking lending activities and some aspects of Small Medium Enterprises, interbank and Retail Banking lending activities. The CCPPM is reviewed by the Board Risk Committee and approved by the Board.

Credit risk is monitored using a variety of Credit Risk management techniques such as assigning credit ratings, setting limits, monitoring credit exposures, limiting transactions with specific counterparties, continually assessing the creditworthiness of counterparties and through the appropriate structuring of transactions including the use of collateral. Management monitors the market value of collateral on a regular basis and requests additional collateral in accordance with the underlying agreement, if required. In addition, management also assess the market value of collateral when reviewing the adequacy of allowances for impairment losses.

The bank manages credit exposure relating to its treasury trading activities by entering into master netting agreements and collateral arrangements with counterparties in appropriate circumstances, and by limiting the duration of exposure. The bank's Credit Risk exposure on derivatives represents the potential cost of replacing the derivative contracts if counterparties fail to fulfill their obligations. To control the level of Credit Risk taken, management assesses counterparties using the same techniques as for lending activities.

Alawwal bank's financial performance could be affected by concentrations of Credit Risk. Concentrations of Credit Risk

arise when a number of obligors are engaged in similar business activities or have similar attributes that would cause their ability to meet contractual obligations to be similarly affected by a particular change in economic, political or other conditions. Concentration Risk can also arise from large exposures to a single borrower or group of related borrowers. Management seeks to manage concentration of Credit Risk through the diversification of lending activities and through the use of internal and regulatory limits.

The debt securities included in the investment portfolio are mainly sovereign risk. Analysis of investments by class of obligor / issuer is provided in Note 6 of the consolidated financial statements. For details of the composition of loans and advances refer to Note 7 to the consolidated financial statements. Information on Credit Risk relating to derivative instruments and commitments and contingencies are provided in Notes 29 and 19, respectively, to the consolidated financial statements. Information on the bank's maximum credit exposure by operating segment is provided in Note 28 to the consolidated financial statements.

3.3.2 Operational Risk

Operational Risk is the risk of loss, whether direct or indirect, to which Alawwal bank is exposed due to inadequate or failed internal processes or systems, human error, or external events. Operational Risk covers 3 main areas: i) financial losses through operational errors, ii) reputational damage and iii) adverse regulatory impact through legal breaches.

The bank follows the accepted 'best practice' methodology of risk assessments and control evaluations for the identification of residual Operational Risks for both existing products and processes as well as for proposed new products and processes. Operational Risks are identified and assessed using the Risk and Control Self-Assessment and Key Risk Indicator tools. A register of risks, controls and mitigating actions is maintained in a central control repository.

Operational Risk Management (ORM) manages Operational Risk for new or changed initiatives/products through an Operational Risk Assessment Procedure (ORAP) the use of which is governed by the bank's ORAP Policy.

All operating losses and issues are recorded in the bank's Governance, Risk and Control system (GRC). GRC is a joint initiative between Operational Risk Management, Compliance, Internal Audit, and Information Security. This unified platform collects and monitor the risks, controls, deficiencies and actions to ensure that the control activities form an integral part of the daily activities of the bank. The control activities are defined for every business level and every department with automated follow-up on non-compliance through approval workflows. Information in the GRC system is analysed by

the ORM function; this can result in policies and processes being revised or other controls being adopted to mitigate the prospect of any similar loss re-occurrence.

3.3.3 Market Risk

Market Risk is the risk of losses arising from movements in financial market prices (including foreign exchange, commission rates, credit spread, equities, and commodities) that will change the carrying value of certain of the bank's assets and liabilities.

The bank is exposed to Market Risk due to its trading activities. The bank's appetite for Market Risk is low and limits and controls are in place to ensure that market risk positions are maintained within appetite. The limited nature of the bank's market risk taking can be seen in figure 1 on page 5, which shows that just 0.2% of risk weighted assets derive from market risk positions.

The Market Risk for the trading book is managed and monitored using a variety of measures including a Value at Risk (VaR) methodology. Market Risk for the non-trading book is managed and monitored using a combination of VaR, stress testing and sensitivity analysis.

3.3.3.1 Market Risk - Trading book:

The Board of Directors has set limits for the acceptable level of risk in managing the trading book. In order to manage Market Risk in the trading book, management applies a VaR methodology daily to assess the Market Risk positions held and to estimate the potential loss based on a set of assumptions and changes in market conditions.

A VaR methodology estimates the potential negative change in the market value of a portfolio at a given confidence level and over a specified time horizon. The bank uses simulation models to assess the possible changes in the market value of the trading book based on historical data. VaR models are usually designed to measure the Market Risk in a normal market environment. Therefore, the use of VaR has limitations as it is based on historical correlations and volatilities in market prices and assumes that future movements will follow a statistical distribution. The VaR model that management uses provides an estimate, using a confidence level of 99%, of the potential loss that is not expected to be exceeded if the current market positions were to be held unchanged for one day. The use of a 99% confidence level implies that within a one-day horizon, losses exceeding the VaR figure should occur, on average, not more than once every one hundred days.

Whilst a useful tool, VaR does have a number of limitations. In particular, VaR is calculated by the bank based on the risk of portfolios at the close of a business day. Further, VaR does not

account for losses that may occur beyond the defined confidence interval and VaR models rely on historic or implied price movements and correlations being good predictors of future market moves. Actual trading results may differ from the VaR calculations, and the metric needs to be considered with particular care in stressed market conditions.

To overcome the VaR limitations mentioned above, management maintains a framework of non-modeled limits that show potential loss for a given change in a market factor and makes no assumption about the behaviour of market factors. Furthermore, management employs stop loss limits on Market Risk positions and carries out stress tests of its portfolio to simulate conditions outside normal confidence intervals. The potential losses occurring under stress test conditions are reported regularly to the Asset and Liability Committee (ALCO) for review.

3.3.3.2 Market Risk-Non-Trading / Banking Book:

Market Risk on non-trading or banking book positions mainly arises from commission rate, foreign currency exposures and equity price changes.

• Commission Rate Risk

Commission rate risk in the banking book arises from the changes to cash flows on financial assets and liabilities as a result of commission rate changes. The bank is exposed to commission rate risk as a result of mismatches or gaps in the amount of assets and liabilities and other derivative financial instruments that mature or re-price in a given period. This risk is managed by matching the re-pricing of assets and liabilities through risk management strategies. The Board of Directors has established commission rate gap limits for stipulated periods. These limits are monitored daily by the bank's Treasury Division. Management monitors positions and where necessary uses hedging strategies to ensure maintenance of positions within established gap limits.

• Currency Risk

Currency risk represents the risk of change in the value of financial instruments due to changes in foreign exchange rates. Exposure to the effects of fluctuations in prevailing foreign currency exchange rates on the bank's financial position and cash flows is managed by the Board of Directors setting limits on the level of exposure by currency and in total. These limits are monitored daily. Hedging strategies are also used to ensure that positions are maintained within these limits.

• Equity Price Risk

Equity price risk refers to the risk of a decrease in the fair values of equities in the bank's non-trading investment portfolio as a result of

changes in levels of equity indices or the value of individual stocks. The bank has exposure to equity price risk as it holds equities in its investment portfolio - see Note 31, of the consolidated financial statements.

3.3.4 Liquidity Risk

Liquidity Risk is the risk that Alawwal bank is unable to meet its financial obligations in a timely manner at reasonable prices. Financial obligations include liabilities to depositors, payments due under derivative contracts, settlement of repurchase transactions, and lending and investment commitments. To mitigate Liquidity Risk, diversified funding sources are sought by the bank and assets are managed considering liquidity positions to maintain a healthy balance of cash, cash equivalents and readily marketable securities.

The management of liquidity is a core function of any bank, being inherent in the maturity transformation process that underlies corporate and retail banking. Given its wide scope, a single measurement to identify Liquidity Risk rarely suffices. The bank therefore applies two broad approaches in managing Liquidity Risk - forward looking and historical. These are underpinned by the bank's Liquidity Risk Management Framework that contains a variety of risk management-techniques that are consistent with the Basel Committee on Banking Supervision principles for Sound Liquidity Risk Management and Supervision.

Forward looking approaches assess funding needs across the foreseeable future. This is undertaken by the Treasury function who manage funding needs across a variety of time horizons. Regular control and monitoring is undertaken by the Risk Management and Finance functions with select reporting extending to senior committees. Historical monitoring includes a wide range of liquidity ratios, both regulatory and internal applied to the actual balance sheet. Product behaviouralisation based on assumptions are applied to actual balance sheet positions to assess the potential emergence of increasing Liquidity Risk.

The bank performs liquidity stress-testing that, amongst other objectives, is designed to meet SAMA stress-testing requirements. The Basel III 30-day liquidity stress measure, the Liquidity Coverage Ratio (LCR), is the basis of the bank's liquidity stress-testing. Stress scenarios are created by adjusting the assumed behaviour of assets and liabilities. These scenarios are then applied to generate stressed LCRs and other key regulatory and internal liquidity measures including a stressed Net Stable Funding Ratio.

The bank has a Contingency Funding Plan in place that sets out the plan of action the bank would use to fund business activity in crisis situations and periods of market stress.

3.3.5 Macro-Economic and Business Cycle Risk

Macro-Economic and Business Cycle Risk is the risk to earnings as a result of fluctuations in the business cycle. Alawwal bank considers increased financial risk from an economic downturn as part of its assessment of Credit Risk, Market Risk and commission rate risk. Having done this, the bank assesses potential incremental risks to financial performance, not covered by the aforementioned risk types, such as a reduction in fee income.

The risks posed from an economic downturn and the severity and length thereof are uncertain, and historical data can be no more than indicative. As such, specific risk-mitigants cannot be precise. An economic downturn reduces business activity and therefore reduces the bank's ability to write new business and generate income.

3.3.6 Reputational Risk

Reputational Risk covers the risk of losses due to other market participants, including customers, forming an adverse opinion of the bank, irrespective of whether this opinion is based on fact or merely perception. Reputational Risk is primarily a risk derived from other risk types, such as Liquidity Risk, Credit Risk or Operational Risk.

Reputation plays a key role in determining whether the bank has a sustainable future. It helps strengthen the trust and confidence of the bank's major stakeholders, which serves to bolster its safety and soundness, competitiveness and business value. A good reputation may also increase the bank's chance of overcoming a market crisis when it occurs. If, however, the bank's reputation has been badly damaged, and public confidence in the bank is undermined, its business prospects and even survival could be in doubt. Managing Reputational Risk (or, more precisely, those risks consequently affecting reputation) and having in place appropriate plans to identify and mitigate these risks warrant special attention and priority.

The bank's principal strategy for managing Reputational Risk is focused on guiding corporate and employee behaviour using the following core components:

- **Alawwal bank's corporate values;**
- **Alawwal bank's business principles;**
- **Alawwal bank's Reputational Risk management policy;**
- **Policies and procedures covering day to day activities of the bank.**

Among the applicable policies and standards are those dealing with customer Acceptance and Anti-money Laundering, credit policies, the bank's Code of Conduct, and the staff whistle-blowing policy.

Alawwal bank adopts a systematic approach to identify, assess and control any risk or potential threat that may adversely affect the bank's reputation. In terms of measurement, the bank conducts a Reputational Risk Survey. The purposes of the survey is to identify whether risk management policies and processes and operational controls are operating effectively so as to promote the bank's aim of avoiding Reputational Risk. Reputational Risk is a standing agenda item for the bank's Operational Risk Committee.

3.3.7 Risks in the Islamic Banking Division

Alawwal bank considers risks within its Islamic Banking Division separately. The principal risk areas are commodities fulfillment and handling, Operational Risks and Reputational Risks. For all these areas, specific processes, controls and procedures are in place.

Any failure by the bank to conduct its business in compliance with Shari'ah approvals issued by its Shari'ah Board could cause a serious Reputational Risk. The bank follows a strict policy of zero tolerance in failure to comply with the Shari'ah Board's approvals and therefore places emphasis on the following:

- A.** It is mandatory for all staff who are involved with any aspect of Islamic Banking business to complete the Al Yusr Accreditation Programme that consists of basic and advanced level Islamic Banking training;
- B.** Product and business/branch level workshops are conducted to enhance staff understanding of Islamic Banking business;
- C.** Prior to the launch of any new Islamic product, all staff involved in the product are given training on the product structure and procedures;
- D.** The bank regularly arranges customer seminars to increase its customers' understanding of Islamic Banking and finance concepts in general, and Islamic products offered by the bank in particular;
- E.** Shari'ah audits are carried out on a regular basis to ensure Shari'ah compliance.

3.4 Other risk types / control areas

3.4.1 Business Continuity Management

Business Continuity Management (BCM) is defined as the capability of the organisation to continue the delivery of products and services at acceptable, predefined levels following a disruptive event. In order to minimise the risk of business disruption, to respond in an organised way to any potentially disruptive incident and to resume 'business as usual' as soon as possible, the bank has in place a Business Continuity Plan (BCP).

The activation of the BCP is authorised through the Command & Control Centre (CCC), which is the decision making authority during the entire period of a crisis until 'business as usual' resumes. The CCC team is comprised of senior management with nominated alternates for back-up. This centralised approach ensures efficiency and effectiveness in the business recovery process whilst minimising uncertainty in responsibilities and avoiding potential duplication of effort. A number of key business continuity risk scenarios are identified of varying severity levels that could give rise to the BCP being initiated.

Regular reports are circulated to senior management that cover the status of all the key BCM initiatives, completed tasks as well as ongoing tasks.

3.4.2 Information Security

As part of its core business processes, Alawwal bank handles various types of customer information and data relating to its customers. Handling of information and data includes its storage, processing and transmission.

The bank has established an Information Security Department which aims to minimize the risk of damage to or misuse of data held by Alawwal bank. The department acts as the central point of control and processing of any changes in user access rights to the bank's computer systems; it addresses potential security weaknesses of Alawwal bank's enterprise network and aims to provide and maintain a secure information network infrastructure. Further, the Information Security Department conducts on-line monitoring to ensure Alawwal bank's network is secure and is in compliance with Information Security Policies; promotes system security awareness for staff and clients in coordination with concern business departments and acts as a liaison with SAMA and other regulatory bodies. The bank maintains awareness of industry security trends, developments and methods to ensure constant application of the most appropriate system security practices.

3.4.3 Strategic Risk

Strategic Risk is concerned with risks arising from institutional changes in strategy and changes in fundamental market conditions.

Strategic Risk is a key consideration when business planning is undertaken. Excessive Strategic Risk may arise as the result of planning to enter into new markets, into new products, or through geographical expansion. Management does not believe that there are any high risk initiatives currently envisaged that would give rise to undue Strategic Risk.

Alawwal bank has several committees that contribute to the management and mitigation of Strategic Risk. The Strategic

Business & Technology Steering Committee provides the governance framework for the effective selection of investments in portfolios of projects for the bank. The Contracts Committee closely governs the contract approval process. Additionally, senior management has regular sessions at which performance is reviewed against the assigned strategic and tactical goals.

3.4.4 Other

Other risks that the bank considers when the course of business dictates include securitisation and syndication risk. However, the bank has not contracted any new business in these areas during 2016. So-called Global risk is considered in the context of macro-economic and business cycle risk.

Further details on the risks the bank is exposed to are detailed in Notes 29, 31 and 32 of the consolidated financial statements.

4. CREDIT RATING

Alawwal bank's credit rating has been assessed by Moody's and Fitch Group:

Credit Rating Agency	Rating
Moody's	A3
Fitch Group*	A-

* Fitch credit rating revised from A- to BBB+ as of 30 March 2017

5. FINANCIAL HIGHLIGHTS

Alawwal bank generated net profit of SAR 1,065 million for the year compared to SAR 2,022 million in the year 2015.

The variance in operating results of the bank for the year 2016 compared to 2015 is summarised below.

The bank recorded another year of growth in total operating income by 2.4%. This was driven by an increase in net special commission income by 9.1% and an increase in gain on non-trading investments by 502.4%, following liquidation of certain assets in the bank's investment portfolio. This increase was partially offset by decrease in fee and commission income and trading income of 11.5% and 38.2% respectively.

Total operating expenses increased by 66.3% mainly due to an increase in the impairment charge for potential credit losses

and general and administrative expenses by 179.2% and 51.5% respectively. Impairment charges for available for sale investments increased by 100%.

The bank continued its growth momentum in Personal Banking whereby fee and commission income increased by 9.2% over the year. Notably, the year-end balance sheet for Personal Banking closed at a new record high, largely due to the bank's success in the Personal Loans and Home Loans segments.

The cost-income ratio for the year was 36.2%; up from 32.2% in 2015. The increase was partially due to some one-off costs including cost associated with the bank's re-branding and other costs related to the depositors' protection fund scheme and increased rental expenses as a result of the expansion of the branch network.

The balance sheet contracted by SAR 3 billion, or 2.8% year on year. Loans and advances decreased to SAR 72.7 billion, a 4.8% decline compared to 2015. Customers' deposits also decreased, by 4.2% over the year. However, the bank's strong capital and liquidity positions were further strengthened with the bank's Capital Adequacy and Loans to Deposits ratios at 17.8% and 81.3%, respectively.

During 2016, there was a continued emphasis on credit quality and risk-reward ratios and the bank maintained its conservative approach towards credit provisioning. The bank's credit provision coverage of non-performing loans at the end of 2016 was 130% compared to 166.8% in the prior year. The bank's credit provision to total loans coverage was 2.9%, up from 1.8% in 2015.

The Income vs. Cost growth graph below, (excluding provisions for credit losses and impairment charge for available for sale investments), displays the success of the bank's tight cost management over the years.

Liquidity ratio (%)	25.9	25.7	24	25.8	27

*Earnings Per Share has been restated to reflect bonus shares issued during 2016.

The bank's capital ratios have further strengthened with the total capital ratio closing the year at 17.8% and the Tier 1 ratio closing the year at 13.4%. These robust capital levels will allow the bank to meet its growth strategy and dividend policy in future years.

Conclusion

Amid a more challenging economic environment than seen in recent years, Alawwal bank reported net profit of SAR 1,065 million. Prudent provisions for potential credit losses were taken while the bank's core businesses continued to perform well. Core operating profit was flat versus the year prior, while the bank continued to maintain a disciplined approach towards asset quality, and risk-returns. Portfolio diversification improved further following the growth of the Personal Banking business. Alawwal bank's capital base strengthened significantly with the Tier 1 capital at 13.4% and Total capital at 17.8%.

Net profit	1,065	2,022	(47%)
Earnings per share (SAR)	0.93	1.77	(0.84)

8. FINANCIAL REPORTING STANDARDS & AUDIT

Alawwal bank prepares its consolidated financial statements in accordance with accounting standards for Commercial Banks promulgated by the Saudi Arabian Monetary Agency (SAMA) and International Financial Reporting Standards as issued by the International Accounting Standards Board (IASB).

Proper books of account have been maintained. The bank has an Internal Audit department which submits its reports to the Audit Committee which in turn reports to the Board of Directors who have oversight of the bank's Internal Audit processes. The Audit Committee oversees the proper functioning and independence of the Internal Audit department and considers its recommendations. The Audit Committee has periodic discussions with the management, the internal auditors and the external auditors on matters affecting consolidated financial statements, internal controls and various governance and control issues and advises the Board of Directors accordingly. The Board acknowledges receipt of that advice.

9. EFFECTIVENESS OF INTERNAL CONTROL SYSTEM

The Board of Directors, assisted by the Audit Committee, is responsible for ensuring that an adequate and effective internal control system exists in the bank and that senior management is maintaining and monitoring the performance of that system.

Management is responsible for the appropriate design and functioning of the internal control system, while the Risk Management, Internal Audit, Compliance and other internal control

departments are responsible for the continuous monitoring and evaluation of the system. The external auditors are responsible for determining the adequacy of the system of internal controls to decide on the level of reliance they can place on the effectiveness of the bank's internal controls and to design their audit procedures.

All employees are ultimately responsible for operating and maintaining an efficient internal control system at their respective levels.

Systems and procedures have been designed to ensure effective and efficient operations, safeguarding assets against unauthorised use or dispositions, maintaining proper accounting records, providing reliable financial information used within the business or for publication, compliance with applicable laws and regulations and for monitoring internal policies in relation to business performance. The system in place is designed to manage, rather than to eliminate, the risks of failure to achieve business objectives. It can only provide reasonable and not absolute assurance against material errors, losses or fraud.

During its normal course of business, the bank is exposed to credit, market and operational risks. Policies, procedures and processes are in place to identify, measure, control, and mitigate such risks. There is an ongoing process for identifying, evaluating, and managing the significant risks faced by the bank and for ensuring there are appropriate controls in place to manage them. In addition to regular reviews by the concerned departments, exposures to these risks are reviewed by various management committees within the bank.

Systems and procedures are in place to identify, control, and report on the major risks including credit risk, changes in the market prices of financial instruments, liquidity, operational risks, and fraud. Exposure to these risks throughout the bank is monitored by the Operational Risk Committee, the Asset and Liability Committee

(ALCO), and the Head Office Credit Committee (the bank's Senior Credit Committee). These exposures are also monitored by the Executive Committee and the Board Risk Committee.

The Internal Audit function provides management with an independent and objective assessment of the effectiveness of the internal control framework. This objective is achieved by following a risk-based Audit plan which is approved by the Audit Committee. The Operational Risk Management and Compliance functions also monitor the control environment during their respective reviews in close coordination with each other.

As part of Alawwal bank's commitment to provide an effective internal control a state-of-the-art Governance, Risk and Control system (GRC) has been put in place. GRC ensures that all material risks that could adversely affect the achievement of the bank's goals are recognised and are continually assessed. The GRC initiative is a joint effort by Operational Risk Management, Compliance, Internal Audit, Internal Control and Information Security. This unified platform to collect and monitor the risks, controls, deficiencies and actions also ensures that the control activities form an integral part of the daily activities of the bank. The control activities are being defined for every business level and every department with automated follow-up on non-compliance through approval workflows.

Alawwal bank's GRC thus facilitates a unified picture of risk factors and thresholds. It clarifies responsibilities and creates more transparency in risk ownership allowing the bank to close any control gaps and to present full coverage of the various types of risks. Moreover, the bank's GRC goes hand in hand with the integration of risk management with the bank's governance processes as it consolidates all risk registers and controls to optimise the functions of all the Bank's internal control departments. The bank also continually refines and realigns its GRC initiatives as markets and circumstances change to avert future risks. The initiative has also

involved a communication and training programme to ensure that all staff fully understand and adhere to policies and procedures affecting their duties and responsibilities.

By considering all the factors in the preceding paragraphs, the control environment in place and the yearly reviews of its effectiveness, and the confirmation made by Management, the Board is of the opinion that the functioning of the internal control system is effective and nothing has come to the attention of the Board that causes it to believe that the system of internal control has not been properly designed or implemented or that effective and efficient internal controls have not been in place throughout the year 2016.

10.ALAWWAL BANK’S ETHICAL STANDARDS AND CODE OF CONDUCT

Alawwal bank’s Ethical Standards and Code of Conduct represent a standard and guide for high ethical principles and professional business dealings practices. Through its Code of Conduct, the bank is committed to instill and maintain a culture of professionalism where the utmost ethical standards prevail. The bank’s Code of Conduct is based on fundamental principles of integrity, confidentiality and professionalism. It applies to all Directors, employees, consultants, affiliates and any other person associated with the bank. The bank’s Board of Directors oversees the implementation and effectiveness of the bank’s Ethical Standards and Code of Conduct.

11. SUBSIDIARIES AND ASSOCIATES

A. Alawwal Invest (AI) (formerly known As Saudi Hollandi Capital)

Alawwal Invest was formed in accordance with the Capital Market Authority’s (CMA) Resolution number 1-39-2007 under commercial registration number 1010242378 dated 30 Dhul Hijja 1428H (corresponding to January 09, 2008) to take over and manage the bank’s Investment Services and Asset Management activities related to dealing, managing, arranging, advising and taking custody of securities regulated by the CMA. Alawwal Invest is effectively wholly-owned by the bank through direct and beneficial ownership and commenced its operations effective 2 Rabi’II 1429H (corresponding to April 8, 2008). Alawwal Invest head office is in Riyadh, and it operates within the Kingdom.

The authorised, issued and fully paid-up share capital of Alawwal Invest is SAR 400 million, consisting of 400,000 shares of SAR 1,000 each.

B. Alawwal Real Estate Company (AREC) (formerly known As Saudi Hollandi Real Estate Company)

Alawwal Real Estate Company, an effectively wholly-owned subsidiary of the bank through direct and beneficial ownership, was established under commercial registration number 1010250772 dated 21 Jumada I 1429H (corresponding to May 26, 2008), with the approval of the Saudi Arabian Monetary Agency (SAMA). AREC engages in the activities of the purchase, sale and leasing of real estate. It further engages in the registration of real estate title deeds of financed products and manages real estate funds. AREC head office is in Riyadh, and it is operating within the Kingdom.

The authorised, issued and fully paid-up share capital of Alawwal Real Estate is SAR 500 thousand, consisting of 500 shares of SAR 1,000 each.

C. Alawwal Insurance Agency Company (AIAC) (Formerly known As Saudi Hollandi Insurance Agency Company)

Alawwal Insurance Agency, an effectively wholly-owned subsidiary of the bank through direct and beneficial ownership was established under commercial registration number 1010300250 dated 29 Muharram 1432H (corresponding to January 4, 2011), with the approval of SAMA. The Company was formed to act as an agent for Wataniya Insurance Company, an associate, selling its products. AIAC head office is in Riyadh, and it is operating within the Kingdom.

The authorised, issued and fully paid-up share capital of Alawwal Insurance Agency is SAR 500 thousand, consisting of 50,000 shares of SAR 10 each.

D. Wataniya Insurance Company (WIC)

The bank purchased a 20% equity stake in the Wataniya Insurance Company during 2008 at a cost of SAR 20 million. During the year, one-for-one right issue was made by WIC which was fully subscribed the bank and resulted in total cost of investment to reach to SAR 40 million. WIC is classified as an associate company. This strategic acquisition enables the bank to have an insurance capability to complement the existing retail banking offering. Wataniya was incorporated on 15th May 2010 and commenced trading on 1st July 2010.

12. LONG TERM BORROWINGS

As of 31st December 2016, the bank’s long-term borrowings comprise of two outstanding Shari’ah-compliant subordinated Sukuk. The 2012 Sukuk issue of SAR 1,400 million will mature in 2019 and the 2013 Sukuk issue of SAR 2,500 million will mature in 2023. Both of these Sukuk are callable at the option of Alawwal bank after five years from their issuance date, subject to SAMA approval.

Further details are provided in Note 14 of the consolidated financial statements.

13. DIVIDEND POLICY

A. Article (49) of the bank’s bylaws states that the net annual profits shall be distributed after deducting all general expenses, other expenses and after taking necessary provisions for possible credit and investment losses and contingent liabilities and any other necessary deductions proposed by the Board of Directors in accordance with the Saudi Arabian Banking Control Law. After these deductions, dividend distribution is subject to the following:

- 1. The Zakat due on the Saudi Shareholders and Tax due on the non-Saudi Shareholders will be calculated according to the laws of the Kingdom of Saudi Arabia. The bank shall settle these amounts to the concerned Authority on behalf of Saudi and foreign shareholders.
- 2. 25% (Twenty Five percent) of the net profit shall be allocated for the purpose of constituting a Statutory Reserve. The General Assembly may reduce or suspend such allocation in case the total reserve has reached an amount equal to the paid up capital.
- 3. Out of the remaining net profit after deducting the Statutory Reserve, 0.1% (one tenth of a percent) at least of the paid up capital shall be allocated for distribution to the Saudi and non-Saudi shareholders based on their respective contribution in the share capital as per recommendations of board of directors and approved by the shareholders General Assembly. In case such remaining net profit is not sufficient for paying such dividend, shareholders will not be entitled to claim the balance of said percentage in the subsequent year or years. The shareholders General Assembly cannot resolve to pay dividends unless the Board recommends the payment of such dividends, nor can the

General Assembly pay dividends at a higher percentage than what was recommended by the Board.

- 4. The remaining amount after deducting the amounts in para (2) and (3) if any, shall be utilized at the Board’s recommendation and as approved by the shareholders General Assembly.
- 5. The bank must maintain the share percentage of Saudi and non-Saudi shareholders when determining the necessary deduction for the Statutory Reserve and other reserves from the net profit, provided these two groups (Saudi and non-Saudi Shareholders) shall contribute in these reserves on pro-rata to their share in the capital which shall be deducted from their respective share in the net profit.

B. Guiding Principles

In reviewing and setting the annual dividend policy the Board and senior management will be guided by the following principles:

1. Dividend sustainability:

To build long-term shareholder value and market confidence in the

15. SIGNIFICANT SHAREHOLDINGS

Material shareholdings (i.e. in excess of 5%) during 2016.

	31 December 2016		1 January 2016		
	Shares Held	%	Shares Held	%	Change
ABN AMRO Bank N. V.	457,228,800	40%	228,614,400	40%	-
Olayan Saudi Investment Company	248,760,002	21.76%	124,200,000	21.73%	-
General Organisation for Social Insurance	120,116,916	10.51%	65,769,179	11.51%	(1%)

16. RELATED PARTY TRANSACTIONS

During its ordinary course of business, the bank conducts business with its related parties. These transactions are conducted on an arm’s length basis, undergoing the same fair dealing conditions of other parties and are subject to the limits stipulated in the Banking Control Law and instructions issued by the Saudi Arabian Monetary Agency as well as the bank’s internal related party transaction policy.

bank’s future, the amount and frequency of dividends to be paid shall be evaluated based on the bank’s ability to continue paying at an equal or increased level in the foreseeable future. Risks that may threaten the bank’s ability to maintain current levels of dividends need to be identified and evaluated;

2. Growth of the bank:

The amount, frequency and type of dividends paid shall not impede the ability of the bank to meet its strategic growth plans;

3. Capital management:

During the annual review and while setting the dividend policy for the current year, the Board and senior management must ensure that the bank:

- maintains sufficient levels of capital to meet the minimum regulatory requirements as set by SAMA;
- maintains sufficient levels of capital levels to support the bank’s strategic growth objectives as presented in the bank’s ICAAP;

- considers any proposed changes to future minimum capital levels made by the Basel committee; does not hold capital in excess of the requirements as summarized in items 1) and 2) above.

14.PROPOSED DIVIDEND, AND BONUS SHARES ISSUED DURING THE YEAR

The Board of Directors resolved on its meeting held on Monday 23 January 2017 to recommend to the General Assembly of Shareholders that no dividends will be distributed for the fiscal year 2016. This will be subject to ratification of the Extraordinary General Shareholders Assembly due in the first half of 2017.

During the year, the shareholders of the Bank approved a bonus issue of one-for-one share in their Extra Ordinary General Assembly meeting held on May 2, 2016. As a result 571.54 million shares, of SR 10 each, were issued by capitalizing statutory reserve and retained earnings.

The balances at reporting date, unless reported elsewhere in the financial statements, resulting from such transactions are as follows:

(SAR '000)	2016	2015
ABN AMRO Bank N. V.		
Due From Banks and other financial institutions	243,509	13,744

Board Committees:

The Board of Directors has four committees - the Executive Committee, the Audit Committee, the Nomination and Remuneration Committee, and the Board Risk Committee.

1. Executive Committee

The Executive Committee is empowered by the Board of Directors in accordance with article 26 of the bank's Bylaws. The Executive Committee shall assist the Board of Directors within the powers determined for it by the Board, and deal with all matters referred to it by the Board, though the Committee shall not have power to alter any decision, rules or regulations taken or laid down by the Board. The Executive Committee consists of the Chairman and four members of the Board.

The Executive Committee convened six times during the year.

Members

Eng. Mubarak Abdullah Al-Khafrah (Chairman)

Mrs. Lubna Sulaiman Al-Olayan

Mr. Abdulhadi Ali Shayif

Mr. Soren Kring Nikolajsen

Dr. Bernd van Linder

2. Audit Committee

The Audit Committee is a sub committee of the Board of Directors, and is formed by a resolution of the General Assembly of Shareholders. The Committee is responsible for monitoring all control issues of the bank. This Committee oversees the functioning and independence of the Internal Audit department and considers its recommendations. The Committee has periodic discussions with management, the internal auditors and the external auditors on matters affecting consolidated financial statements and internal controls and advises the Board of Directors accordingly.

The Audit Committee convened five times during the year.

Members

Mr. Sulaiman Abdullah Al-Kadi (Chairman)

Mr. Saleh Hassan Husain

Mr. Muffadal Abbas Mohammed Ali

3. Nomination and Remuneration Committee

In accordance with article (15) of the Corporate Governance regulation Issued by CMA decision no. 1-212-2006 dated 21/10/1427H corresponding to 12/11/2006 and after having the approval of General Shareholders Assembly in its meeting held on 29th March 2008, the Board of Directors established a separate committee for nomination and remuneration. The duties and responsibilities of the Nomination and Remuneration Committee include the following:

1. Recommendation of appointments to the Board;
2. Annual review of the requirement of suitable skills for membership of the Board of Directors;
3. Review the structure of the Board of Directors and the absence of conflict of interest of their membership;
4. Establish clear policies for the remuneration of Board members and the bank's senior management.

The Nomination and Remuneration Committee convened three times during the year.

Members

Mr. Abdulhadi Ali Shayif (Chairman)

Mrs. Lubna Sulaiman Al-Olayan

Engr. Mubarak Abdullah Al-Khafrah

Mr. Soren Kring Nikolajsen*

Mr. Sulaiman Abdullah Al-Kadi

Mr. Ahmed Farid Al-Aulaqi

*Mr. Javier Maldonado stepped down as a member of the Nomination and Remuneration Committee on 17/02/2016. Mr. Soren Nikolajsen replaced Mr. Maldonado in the Nomination and Remuneration Committee membership as of the same date.

The bank's compensation policies have also been amended where necessary to comply with the Basel accord.

4. Board Risk Committee

In accordance with article (78) of the Saudi Arabian Monetary Agency's Corporate Governance Principles issued in June 2012, the Board of Directors established a separate committee for risk governance, headed by a non-executive director to assist the Board in overseeing the risk management process. The Board Risk Committee reports directly to the Board of Directors. The

Committee's responsibilities include the following:

1. Provide oversight and advice to the Board in relation to current and potential risk exposures, including, but not limited to, credit, market, liquidity, operational, compliance, legal, strategic and reputational risks;
2. Evaluate, monitor and oversee the adequacy and effectiveness of the banks' risk management framework to ensure appropriate risk identification, measurement, aggregation and reporting including the determination of risk appetite and tolerance;
3. Assist the Board on any other matter upon request.

The Board Risk Committee convened four times during the year.

Members

Mr. Ahmed Farid Al-Aulaqi (Chairman)

Mr. Eyad Abdulrahman Al-Hussain

Mr. Soren Kring Nikolajsen

18. BOARD OF DIRECTORS AND SENIOR EXECUTIVE COMPENSATION

Details	Executive Board Members	Non-Executive Board Members	Six Executive Managers in the Bank Receiving Highest Compensation, including MD and CFO
Salaries & Compensations	Nil	Nil	9,403
Allowances	Nil	Nil	3,395

Incentives	Nil	Nil	15,565
Any other Compensations or benefits (in kind paid monthly or annually)	Nil	4,432	Nil

19. DIRECTORS & SENIOR MANAGEMENT INTERESTS (INCLUDING THEIR SPOUSES AND MINORS)

Board Members

Including the 1,000 qualification shares held by each Board Member during their term of office, shares held by the Directors at the beginning and end of 2016 are set out in the table below.

Name	Shares Held as of 31st Dec 2016	Shares Held as of 1st Jan 2016
Eng. Mubarak Abdullah Al-Khafrah (Chairman)	6,320	3,160
Mrs. Lubna Sulaiman Al-Olayan (Vice Chairperson)	60,912	30,456
Mr. Ahmed Farid Al-Aulaqi	3,456	1,728
Mr. Sulaiman Abdullah Al-Kadi	35,778	21,439
Mr. Abdulhadi Ali Shayif	40,000	120,000
Mr. Eyad Abdulrahman Al-Hussain	-	-
Members appointed ABN AMRO Bank N. V.	4,000	4,000

Senior Management:

Shares held by senior management at the beginning and end of 2016 are set out in the table below:

Name	Shared Held as of 31st Dec 2016	Shared Held as of 1st Jan 2016
Fawaz Al-Onazi	Nil	718
Hussam Al-Khayal	Nil	7,929

20. EXTERNAL AUDITORS

At the Extraordinary General Meeting of the bank’s shareholders held on 25/07/1437H (2 May, 2016), Messrs KPMG Al Fozan & Partners and Messrs Ernst & Young were appointed as joint external auditors for the year ended 31 December 2016.

21. PAYMENT OF ZAKAT, INCOME TAX & OTHERS

Zakat and income tax liabilities for the year 2016 are as follows:

a. Saudi Shareholders

Zakat attributable to Saudi Shareholders for the year is estimated to be SAR 18 million (2015: SAR 35 million), which will be deducted from their share of future dividends.

b. Non-Saudi Shareholders

Income tax payable on the current year’s share of income of foreign shareholders is estimated to be SAR 99 million (2015: SAR 164 million) which will be deducted from future dividends.

c. Governmental agencies

The below table displays the major payments made to governmental agencies.

Payment (SAR 000)	2016	2015
Zakat & Income Tax	326,637	263,901
GOSI	58,351	56,668
Visas and passports	690	669
Total	385,678	321,238

22. SHARE PLAN

In January 2008, Alawwal bank and its Subsidiaries (the Group) launched an equity settled share-based payment plan (“the Plan”) for executives and senior employees (eligible employees). The initial Plan was approved by the Board of Directors in their meeting held on 10 Dhu-al-Qa’dah 1428H (corresponding November 20, 2007) and SAMA in their letter dated 26 Safar 1429H (corresponding March 4, 2008). The vesting conditions were amended in 2009 as

per approval by the Board of Directors in their meeting held on 5 Shabaan 1430H (corresponding July 27, 2009) and SAMA in their letter dated 20 Dhu-al-Qa’dah 1430H (corresponding November 9, 2009). According to the amended Plan, eligible employees will receive shares in the bank if the following terms and conditions are met:

- Eligible employees are required to continue their employment with the Group for a period of two years from the grant date to have half of their shares vest and another year for the remainder to vest; and
- The Group achieves specific growth thresholds as approved by the Board of Directors where each threshold will accrue a certain value of shares to the eligible employees.

Under the provisions of the Plan, the Group at no point becomes the legal owner of the underlying shares. Until such time as these shares vest they will not carry voting rights. As per the Plan, Alawwal Invest manages the Staff Share Plan Fund (the Fund) which will operate in accordance with the terms and conditions as approved by the Board of Directors in their above referred meeting and by SAMA in their above referred letter. Any further modifications in the terms and conditions of the Plan require prior approval of SAMA.

Further details are provided in Note 37 of the consolidated financial statements.

23. APPLICABLE REGULATIONS

Alawwal bank has adhered to the provisions of the Banking Control Law, Saudi Companies’ Law, and regulations issued by the Saudi Arabian Monetary Agency (SAMA) and the Capital Market Authority (CMA). In the event of conflicting regulation, the bank adheres to the existing rules governing banks and joint stock companies prior to the foundation of the Capital Market Authority.

During 2016 the bank paid SAR 1,900,328 in respect of penalties levied by regulatory authorities in the Kingdom as per the following table:

Authority Imposing the Penalty	Amount (SAR)
Saudi Arabian Monetary Agency	1,392,328
Capital Market Authority	200,000
ATM signage and municipality penalty	308,000
Total	1,900,328

24. DECLARATIONS

The Board of Directors hereby declares that:

- Proper books of account have been maintained;
- The system of internal control is sound in design and has been effectively implemented;
- The bank has no existing contracts in which a Director, the MD, the CFO or a party related to any of them has a material interest, except for those that were mentioned in the related party transactions section of this report;
- There is no doubt as to the bank’s ability to continue as a going concern.
- After the review of the Audit Committee, the Board of Directors approved the consolidated financial statements for the year 2016 on 23/02/ 2017 as recommended by the Committee.

By a resolution issued by the Extra Ordinary General Shareholders Assembly held on May 2, 2016, Alawwal bank has adopted the cumulative voting method for election of Saudi Board members, and the bank’s Bylaws were amended accordingly.

With that, the bank has implemented all provisions of the Corporate Governance Regulations issued by CMA.

CONCLUSION

The Board of Directors of Alawwal bank extends its regards and gratitude to the government of the Custodian of the Two Holy Mosques, His Majesty, and to HRH the Crown Prince, HRH the Second Deputy Prime Minister, HE the Minister of Finance, HE the Minister of Commerce & Investment HE the Governor of the Saudi Arabian Monetary Agency and HE the Chairman of the Capital Market Authority for their continued support to the banking community.

The Board of Directors also extends its thanks and appreciation to the shareholders, customers and correspondents of Alawwal bank for their continuing confidence and support.

Finally, appreciation must be given to the bank’s management and staff for their dedication and team work, without which this year’s achievements would not have been possible.

Board of Directors

Statement of Internal Control

Management is responsible for establishing and maintaining an adequate and effective internal control system. An Internal control system includes the policies, procedures and processes, which are designed under supervision of the Board to achieve the strategic objectives of the Bank.

The scope of the Internal Audit department, independent from line management, includes the assessment of the adequacy and effectiveness of the internal control system across the Bank, as well as to provide reasonable assurance as to whether management has implemented and complied with prescribed policies and procedures. All significant and material findings of Internal Audit assessments are reported to the Audit Committee of the Board. The Audit Committee actively monitors the adequacy and effectiveness of the internal control system to ensure that identified risks are mitigated to safeguard the interest of the Bank.

Concerted and integrated efforts are made by all functions of the Bank to improve the Control Environment at grass root level through continuous reviewing and streamlining of procedures to prevent and rectify any control deficiencies. Each function, under the supervision of the senior executive management, is entrusted with the responsibility to oversee rectification of control deficiencies identified by internal and external auditors. The Compliance function, through centrally automated applications and physical examinations, ensures adherence to regulatory requirements and the Bank’s internal policies and procedures.

The Banks’ Internal control system has been designed to provide reasonable assurance to the Board on the management of risks to achieve the Bank’s strategic objectives. Internal controls systems, no matter how well designed, have inherent limitations, and may not prevent or detect all control deficiencies. Moreover, the projection of current evaluations of the effectiveness to future periods is subject to a limitation that controls may become inadequate due to changes in conditions or compliance with policies or procedures.

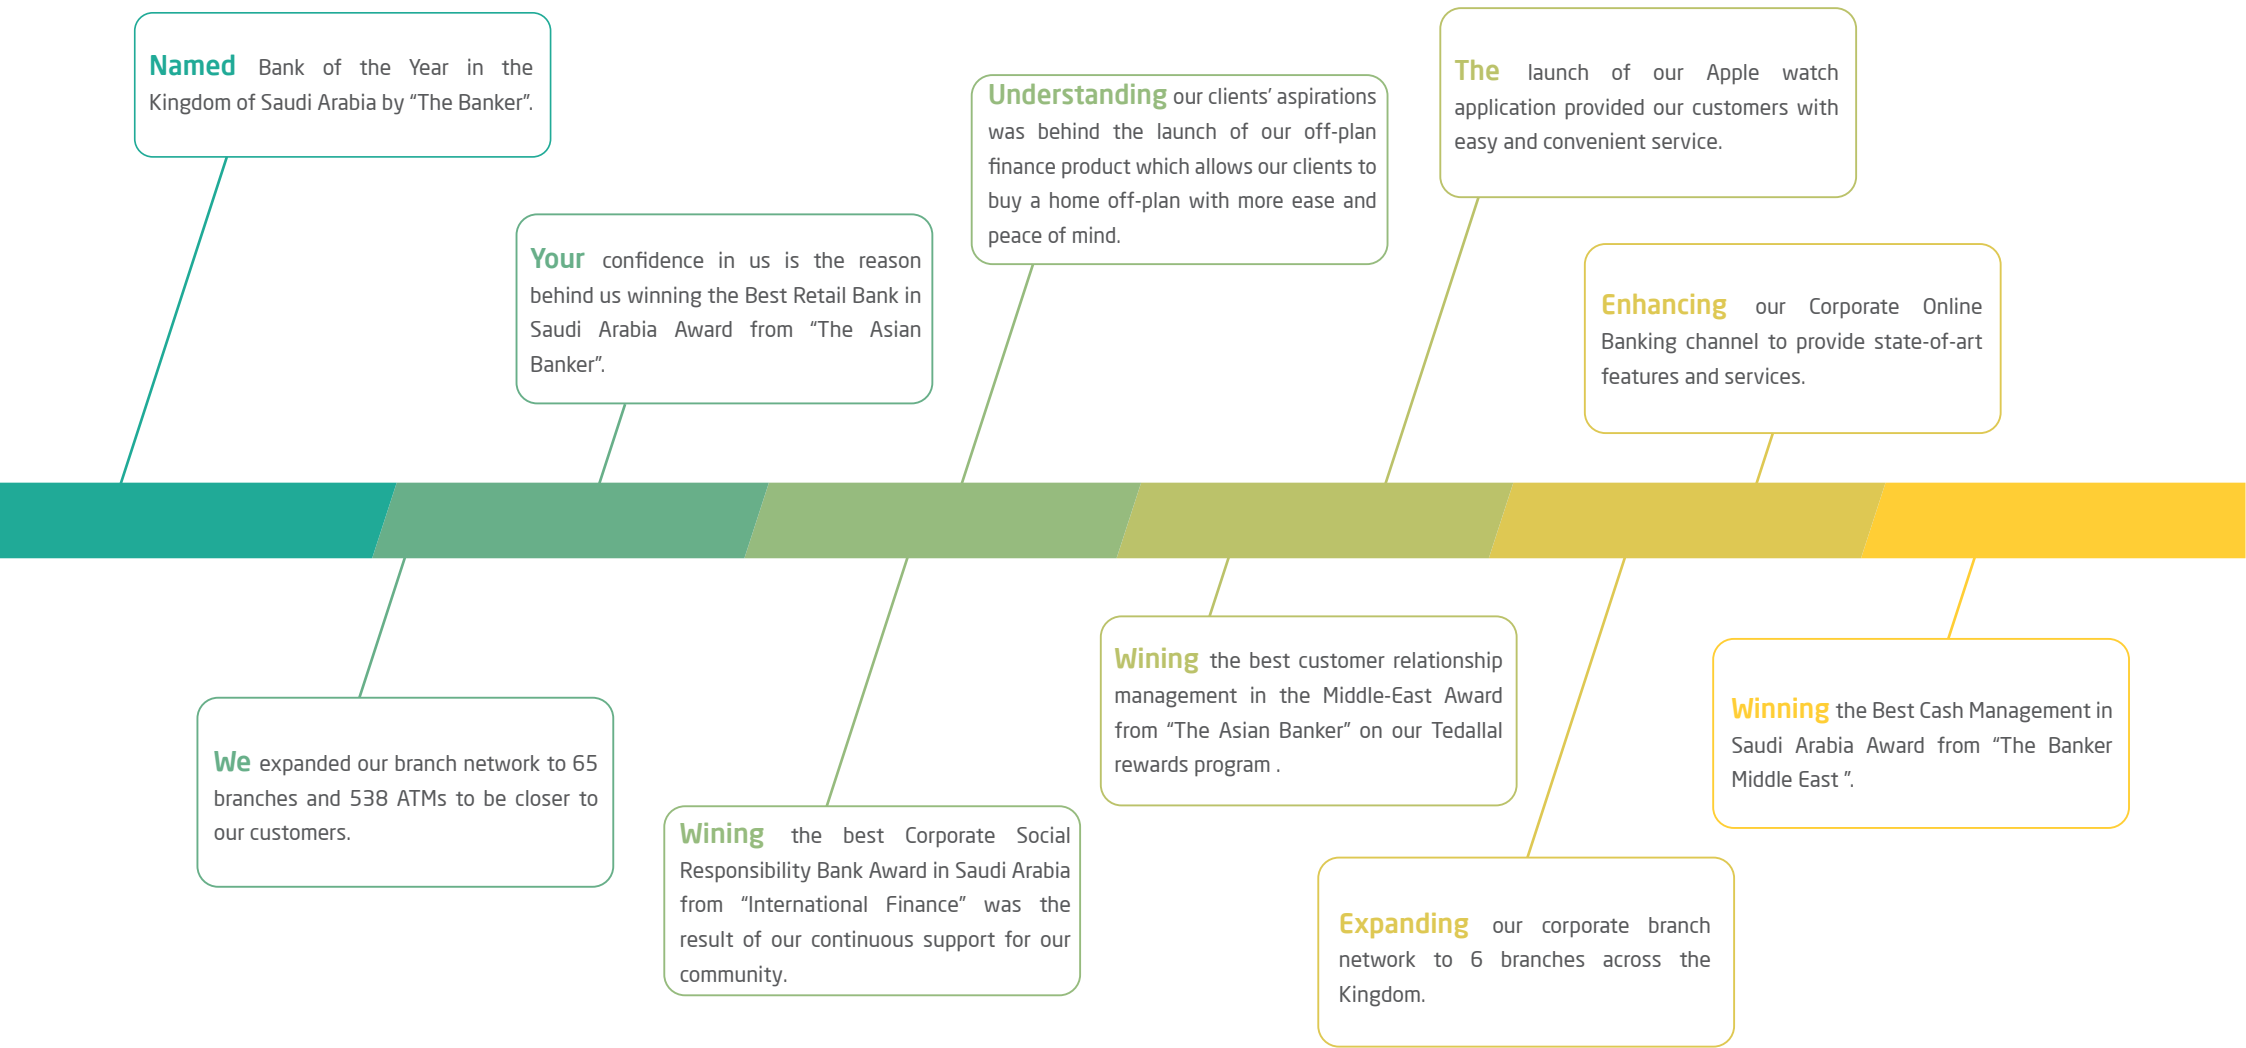

Management has adopted The Internal Controls integrated framework as recommended by SAMA through its guidelines on Internal Controls.

The Audit Committee also reviews the assessment report on the effectiveness of the internal control system, as prepared by the Internal Audit department of the Bank. The report on the assessment of internal controls does not contain material weaknesses in the bank’s internal control framework that have not been adequately addressed by the management.

Based on the results of the ongoing evaluation of internal controls carried out by Management during the year, Management considers the Bank’s existing internal control system to be adequately designed, operating effectively, and monitored consistently. Nevertheless, Management continuously endeavors to enhance and further strengthen the internal control system of the Bank.

Based on the above, the Board of Directors has duly endorsed Managements’ evaluation of the internal control system, as prescribed by SAMA.

AUDITORS' REPORT

Independent Auditors' Report

For The Year Ended
31 December 2016

TO THE SHAREHOLDERS OF ALAWWAL BANK

(A Saudi Joint Stock Company)
(formerly known as Saudi Hollandi Bank)

OPINION

We have audited the consolidated financial statements of Alawwal Bank (formerly known as Saudi Hollandi Bank) (the "Bank") and its subsidiaries (collectively referred to as the "Group"), which comprise the consolidated statement of financial position as at December 31, 2016, and the consolidated statement of income, consolidated statement of comprehensive income, consolidated statement of changes in equity and consolidated statement of cash flows for the year then ended, and summary of significant accounting policies and other explanatory notes from 1 to 40.

In our opinion, the accompanying consolidated financial statements taken as a whole:

- present fairly, in all material respects, the consolidated financial position of the Group as at December 31, 2016, and its consolidated financial performance and its consolidated cash flows for the year then ended in accordance with Accounting Standards for Commercial Banks issued by the Saudi Arabian Monetary Authority ("SAMA") and with International Financial Reporting Standards ("IFRS"); and
- comply with the requirements of the Regulations for Companies, the Banking Control Law in the Kingdom of Saudi Arabia and the Bank's Bye-laws in so far as they affect the preparation and presentation of the consolidated financial statements.

Basis for Opinion

We conducted our audit in accordance with generally accepted auditing standards in the Kingdom of Saudi Arabia and International Standards on Auditing ("ISAs"). Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Consolidated Financial Statements section of

our report. We are independent of the Group in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants ("IESBA Code") together with the ethical requirements that are relevant to our audit of the financial statements in the Kingdom of Saudi Arabia, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the consolidated financial statements of the current period. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. For each key audit matter, a description of how our audit addressed the matter is set out below:

Impairment of loans and advances:

Key Audit Matter

At December 31, 2016, the gross loans and advances were Saudi Riyals 74,895 million against which an impairment provision of Saudi Riyals 2,152 million was maintained. This include impairment against specific loans and collective impairment recorded on a portfolio basis.

We considered this as a key audit matter as the Group makes complex and subjective judgements and makes assumptions to determine the amount of impairment and the timing of recognition of such impairment.

In particular the determination of impairment against loans and advances includes:

- The identification of impairment events and judgments used to calculate the impairment against specific corporate loans and advances;

- The use of assumptions underlying the calculation of collective impairment for portfolios of loans and advances, and the use of models to make those calculations;
- An assessment of the Group's exposure to certain industries affected by current economic conditions.

Refer to the significant accounting policies note 3(l)(i) to the consolidated financial statements for the significant accounting policy relating to impairment of loans and advances, note 2(d)(i) which contains the disclosure of significant accounting estimates relating to impairment against loans and advances and note 7(b) which contains the disclosure of impairment against loans and advances.

How the matter was addressed in our audit:

We assessed the design and implementation, and tested the operating effectiveness of the key controls over management's processes for establishing and monitoring both specific and collective impairment.

We tested a sample of loans and advances to form our own assessment as to whether impairment events had occurred and to assess whether impairment had been identified and recorded in a timely manner.

Where impairment was individually calculated, we tested the assumptions underlying the calculation of impairment including forecasted future cash flows, discount rates and estimated recovery from any underlying collateral etc. For individually assessed loans, we also selected a sample of loans for industries adversely affected by the economic conditions to evaluate management's impairment assessment for such loans. For collective impairment model used by the Group among other procedures we tested:

- On a sample basis, the extracts of historical data to the underlying systems.
- The assumptions used by management including probability of default, loss given default and delinquency days analysis etc used in the models.

Independent Auditors' Report

For The Year Ended
31 December 2016

- On a sample basis, the calculations within the models.

Zakat

Key Audit Matter

The Group files its zakat return with the General Authority of Zakat and Tax ("GAZT") on an annual basis. The GAZT has issued assessment orders for the years from 2005 up to 2013, which resulted in additional zakat exposure amounting to Saudi Riyals 281.6 million. The additional zakat exposure resulted mainly due to disallowance of certain long-term investments and the addition of long term financing to the zakat base by the GAZT. The interpretation of the GAZT is being challenged by the Group and the appeal proceedings are underway at various levels of available appellate forums.

Assessments for the years 2014 and 2015 are yet to be raised. However, in line with the assessments finalized by the GAZT for the years 2005 to 2013, if long-term investments are disallowed and long-term financing is added to the zakat base this would result in additional zakat exposure. The amount of the potential additional zakat exposure is not disclosed in the consolidated financial statements as management believes that this might affect the Bank's position in this matter.

Management makes judgments about the incidence and quantum of zakat liabilities (which are subject to the future outcome of assessments by the GAZT) and based on such judgments management is confident of a favourable outcome of the appeal process.

We considered this as a key audit matter as it involves significant management judgment and the additional assessments by the GAZT are material to the consolidated financial statements.

Refer to note 3(y) for the accounting policy relating to zakat and note 26 for the related disclosures for zakat.

How the matter was addressed in our audit:

- In order to assess the status and likely outcome of the matter, we obtained correspondence between the Group, GAZT and

the Group's zakat consultants to determine the amount of the additional demand made by the GAZT.

- We held meetings with those charged with governance and senior management of the Group to obtain an update on the zakat matter and the results of their interactions with the relevant appellate forums.
- We also used our internal specialist to assess the adequacy of the net exposure disclosed for the years assessed by the GAZT and the appropriateness of management's judgments relating to the zakat matter in light of the facts and circumstances of the Group.
- We also assessed the appropriateness of the disclosures included in the consolidated financial statements of the Group.

Fee from banking services

Key Audit Matter

The Group charges loan transaction and service fees upfront to customers on corporate and retail loan financing. Due to the large volume of transactions with mostly insignificant fee amounts, adjustments to the effective yield of loan financing is made by management based on certain thresholds and such adjustments are recognised within consolidated income statement.

All such fees which are an integral part of generating an involvement with the resulting financial instrument should be recognized, regardless of the thresholds, as an adjustment to the effective yield of loan financing.

We considered this as a key audit matter since the use of assumptions for setting these thresholds by management could result in a material over / under statement of the Group's profitability.

Refer to the significant accounting policies note 3g (iii) to the consolidated financial statements.

How the matter was addressed in our audit:

We assessed the design and implementation and tested the

operating effectiveness of the control over the consistent application of the thresholds by management.

We considered the assumptions made and evaluated the thresholds established by the Group for making adjustments to the effective yield of loan financing and recording such adjustments within consolidated income statement.

We obtained management's assessment of the impact of the use of the aforementioned thresholds and:

- On a test basis, traced the historical and current year data used by management to the underlying accounting records; and
- Assessed the impact of the use of thresholds (alongwith the related assumptions used in this calculation) on the recognition of fee and commission income and special commission income.

Impairment of non-trading investments

Key Audit Matter

As at 31 December 2016, the Group had non-trading investments of Saudi Riyals 21,258 million. These non-trading investments include equities, corporate bonds and sukuk, which are subject to the risk of impairment due to either adverse market situation and / or liquidity constraints faced by the issuers.

For assessing the impairment of equities, management monitors volatility of share prices and uses the criteria of significant or prolonged decline in their fair values below their costs as the basis for determining impairment. A significant or prolonged decline in fair value of an equity instrument below its cost represents objective evidence of impairment. The determination of what is significant or prolonged requires judgment. In assessing whether it is significant, the decline in fair value is evaluated against the cost of the equity instrument. In assessing whether it is prolonged, the decline is evaluated against the time-period for which the fair value of the equity instrument has been below its cost.

For debt instruments such as corporate bonds/sukuk, management considers them to be impaired when there is evidence of a deterioration in the financial condition of the issuer, industry or

Independent Auditors' Report

For The Year Ended
31 December 2016

sector performance, changes in technology and operational and/or financing cash flows of the issuer.

We considered this as a key audit matter since the assessment of impairment requires significant judgment by management and the potential impact of impairment could be material to the consolidated financial statements.

Refer to note 3(l) of the consolidated financial statements for the accounting policy relating to the impairment of non-trading investments, note 2(d)(iii) for the critical accounting estimates and judgements, and notes 29 and 31 for the disclosures of credit and market risks respectively.

How the matter was addressed in our audit:

We assessed the design and implementation and tested the operating effectiveness of the key controls over management's processes for assessing impairment of non-trading investments including:

- Management's identification of indicators of impairment such as significant or prolonged decline in the fair value of equities and/or any issuer defaults relating to corporate bonds/sukuk;
- Management's review and approval of the impairment methodology and outcome.

For equity investments, on a sample basis, we:

- Assessed the appropriateness of management's criteria for determining the significant or prolonged decline in the fair value of investments;
- Evaluated the basis for determining the cost and fair value of investments;
- Traced the cost of investments to underlying accounting records and traced the valuation of investments to management's working of the fair valuation of investments (based on either mark to market or mark to model approach); and;
- Considered the price fluctuation / movement during the holding period to determine if the significant or prolonged criteria is met.

For corporate bonds/sukuk, on a sample basis, we assessed the creditworthiness of counterparties based on readily available market information and assessed cash flows from the instruments to consider whether there were any defaults based on the terms and conditions of the issuance of these corporate bonds/sukuk.

Other assets:

Key Audit Matter

As at 31 December 2016, other assets of the Group included an amount of Saudi Riyals 437 million. This amount was originally disbursed to a third party who defaulted on payment and the management expects to recover this balance from a related party. The Group has reached a settlement agreement with the related party for recovery of this amount.

The Group maintains an impairment allowance of Saudi Riyals 150 million as at 31 December 2016 against the outstanding balance due to uncertainty around the timing of recoverability of this balance.

This is considered a key audit matter due to uncertainty around the timing of the recovery of this amount and conditions attached to the settlement agreement that may impact the recoverability of the balance.

Refer to note 10 to the consolidated financial statements for disclosure of the aforementioned receivable.

How the matter was addressed in our audit:

We performed the following procedures

- Read the settlement agreement, reached with the related party to assess the terms and conditions attached to the settlement agreement.
- Held meetings with those charged with governance and senior management of the Group to obtain an update on this matter and the results of their interactions with the related party.
- Held meetings with the representative of the related party to discuss the progress on the settlement.

- Evaluated the basis used by management to assess the adequacy of the impairment allowance against the receivable.

- Assessed the appropriateness of the disclosures included in the consolidated financial statements of the Group.

Other Information included in the Bank's 2016 Annual Report

Management is responsible for the other information in its annual report. Other information consists of the information included in the Bank's 2016 annual report, other than the consolidated financial statements and our auditors' report thereon. The annual report is expected to be made available to us after the date of this auditors' report.

Our opinion on the consolidated financial statements does not cover the other information and we do not and will not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

When we read the other information, if we conclude that there is a material misstatement therein, we are required to communicate the matter to those charged with governance.

Responsibilities of Management and Those Charged with Governance for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with Accounting Standards for Commercial Banks issued by SAMA, IFRSs, the applicable requirements of the Regulations for Companies, the Banking Control Law in the Kingdom of Saudi Arabia and the Bank's Bye-laws, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Independent Auditors' Report

For The Year Ended
31 December 2016

In preparing the consolidated financial statements, management is responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Group's financial reporting process.

Auditors' Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with generally accepted auditing standards in the Kingdom of Saudi Arabia and ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with generally accepted auditing standards in the Kingdom of Saudi Arabia and ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit

in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Group to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and communicate with them all relationships and

other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditors' report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended December 31, 2016

1) GENERAL

Alawwal bank (Formerly known as Saudi Hollandi Bank) (the “Bank”), is a Saudi Joint Stock Company incorporated in the Kingdom of Saudi Arabia and was formed pursuant to Royal Decree No. M/85 dated 29 Dhul Hijjah 1396H (corresponding to December 21, 1976). The Bank commenced business on 17 Shaaban 1397H (corresponding to August 2, 1977) when it took over the operations of Algemene Bank Nederland N.V. in the Kingdom of Saudi Arabia. The Bank operates under commercial registration No. 1010064925 dated 6 Jumada II 1407H (corresponding to February 5, 1987) through its 65 branches (2015: 60 branches) in the Kingdom of Saudi Arabia. The registered address of the Bank’s head office is:

Alawwal bank (Formerly known as Saudi Hollandi Bank)
Head Office
Al-Dhabab Street P. O. Box 1467
Riyadh 11431, Kingdom of Saudi Arabia.

The objective of the Bank and its subsidiaries (collectively referred to as “the Group”) is to provide a full range of banking and investment services. The Group also provides to its customers Islamic (non commission based) banking products which are approved and supervised by an independent Shariah Board established by the Bank.

With effect from 27 Safar 1438H (Corresponding to November 27, 2016), the name of the Bank was changed from Saudi Hollandi Bank to Alawwal bank.

The consolidated financial statements comprise of the financial statements of the Bank and its subsidiaries. The details of these subsidiaries are set out below:

Alawwal Invest (AI) (Formerly known As Saudi Hollandi Capital) (SHC)

Alawwal Invest, a limited liability company incorporated in the Kingdom of Saudi Arabia, a wholly owned subsidiary of the Bank, was formed in accordance with the Capital Market Authority’s (CMA) Resolution number 1-39-2007 under commercial registration number 1010242378 dated 30 Dhul Hijjah 1428H (corresponding

to January 9, 2008) to take over and manage the Group’s Investment Services and Asset Management activities regulated by CMA related to dealing, managing, arranging, advising and taking custody of securities. Alawwal Invest commenced its operations effective on 2 Rabi’II 1429H (corresponding to April 8, 2008).

Alawwal Real Estate Company (AREC) (Formerly Known As Saudi Hollandi Real Estate Company) (SHREC)

AREC, a limited liability company incorporated in the Kingdom of Saudi Arabia, a wholly owned subsidiary of the Bank through direct ownership was established under commercial registration number 1010250772 dated 21 Jumada I 1429H (corresponding to May 26, 2008) with the approval of the Saudi Arabian Monetary Agency (SAMA). The Company was formed to register real estate assets under its name which are received by the Bank from its borrowers as collaterals.

Alawwal Insurance Agency Company (AIAC) (Formerly Known As Saudi Hollandi Insurance Agency Company) (SHIAC)

AIAC, a limited liability company incorporated in the Kingdom of Saudi Arabia, a wholly owned subsidiary of the Bank through direct ownership was established under commercial registration number 1010300250 dated 29 Muharram 1432H (corresponding to January 4, 2011) with the approval of SAMA. The Company was formed to act as an agent for Wataniya Insurance Company (WIC), an associate, for selling its insurance products.

2) BASIS OF PREPARATION

a) Statement of compliance

The consolidated financial statements are prepared in accordance with Accounting Standards for Commercial Banks promulgated by SAMA and International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB). The consolidated financial statements are prepared to comply with the requirements of the Banking Control Law, the provisions of the Regulations for Companies in the Kingdom of Saudi Arabia and the Bank’s By-Laws.

b) Basis of measurement and presentation

The consolidated financial statements are prepared under the historical cost convention except for the following measured at fair value:

- derivatives;
- available for sale investments;
- recognised financial assets and financial liabilities designated as hedged items in qualifying fair value hedge relationships which are adjusted for changes in fair value attributable to the risk being hedged.

c) Functional and presentation currency

These consolidated financial statements are presented in Saudi Arabian Riyals (SAR), which is the Bank’s functional currency. Financial information has been rounded off to the nearest thousand, except where otherwise indicated.

d) Critical accounting judgements, estimates and assumptions

The preparation of the consolidated financial statements in conformity with IFRS requires the use of certain critical accounting judgments, estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires management to exercise its judgement in the process of applying the Group’s accounting policies. Such judgments, estimates and assumptions are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances and obtaining professional advices. Significant areas where management has used estimates, assumptions or exercised judgments are as follows:

(i) Impairment for losses on loans and advances

Management reviews its loan portfolio to assess specific and collective impairment on a monthly basis. In determining whether an impairment loss should be recorded, management applies judgement when assessing whether there is any observable data indicating that there is a measurable decrease in the estimated future cash flows. This evidence may include observable data indicating that there has been an adverse change in the payment status of borrowers in a group. Management uses estimates based

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended December 31, 2016

on historical loss experience for loans with similar credit risk characteristics where objective evidence of impairment exists. The methodology and assumptions used for estimating both the amount and the timing of future cash flows are reviewed regularly to reduce any differences between loss estimates and actual loss experience (See note 7).

(ii) Fair value measurement

The Group measures financial instruments, such as, derivatives, FVIS and available for sale investments at fair value at each statement of financial position date. Fair values of financial instruments held at amortised cost and held to maturity are disclosed in note 6(d).

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or the most advantageous market must be accessible by the Group. The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest. The Group uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs. All assets and liabilities for which fair value is measured or disclosed in the annual consolidated financial statements are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

Level 1 – Quoted (unadjusted) market prices in active markets for identical assets or liabilities

Level 2 – Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable

Level 3 – Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For assets and liabilities that are recognised in the annual consolidated financial statements on a recurring basis, the Group determines whether transfers have occurred between levels in the hierarchy by re-assessing categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period. External valuers are involved for valuation of significant assets, such as properties and AFS financial assets, and significant liabilities, such as contingent consideration. Involvement of external valuers is decided upon annually by the valuation committee after discussion with and approval by the Bank's audit committee. Selection criteria include market knowledge, reputation, independence and whether professional standards are maintained.

(iii) Impairment of available-for-sale equity and debt investments

The Group exercises judgement to consider impairment on the available-for-sale equity and debt investments at each reporting date. This includes determination of a significant or prolonged decline in the fair value below its cost. In assessing whether it is significant, the decline in fair value is evaluated against the original cost of the asset at initial recognition of equity instruments. In assessing whether it is prolonged, the decline is evaluated against the period in which the fair value of the asset has been below its original cost at initial recognition.

The determination of what is "significant" requires judgement. In making this judgement, the Group evaluates among other factors, the normal volatility in instrument price, deterioration in the financial health of the investee, industry and sector performance, changes in technology, and operational and financing cash flows.

In assessing objective evidence of impairment of available for sale debt investments at the reporting date, the Bank considers all available evidence, including observable data or information about events specifically relating to the securities which may result in a shortfall in recovery of future cash flows. Financial difficulties of the issuer, as well as other factors such as information about the issuers' liquidity, business and financial risk exposures, levels of

and trends in default for similar financial assets, national and local economic trends and conditions, and the fair value of collateral and guarantees may be considered individually, or in combination, to determine if there is objective evidence of impairment.

(iv) Classification of held-to-maturity investments

The Group follows the guidance of IAS 39 in classifying non-derivative financial assets with fixed or determinable payments and fixed maturity as held-to-maturity. In making this judgement, Management evaluates its intention and ability to hold such investments to maturity. If the Group fails to keep these investments to maturity other than in certain specific circumstances – for example, selling close to maturity or an insignificant amount, it will be required to reclassify the entire class as available-for-sale investments.

(v) Determination of control over investees

The control indicators as set out in note 3 (a) are subject to management's judgement that can have a significant effect in the case of the Group's interests in investments funds.

Investment funds

The Group acts as Fund Manager to a number of investment funds. Determining whether the Group controls such an investment fund usually focuses on the assessment of the aggregate economic interests of the Group in the Fund (comprising any carried interests and expected management fees) and the investors rights to remove the Fund Manager. The Group has conducted a detail assessment and as a result the Group has concluded that it acts as an agent for the investors in all cases, and therefore has not consolidated any of these funds. See notes 6 and 36.

e) Provisions for liabilities and charges

The Group receives legal claims in the normal course of business. Management has made judgments, as to the likelihood of any claim succeeding, in making provisions. The time of concluding legal claims is uncertain, as is the amount of possible outflow of economic benefits. Timing and cost ultimately depends on the due process being followed as per law.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended December 31, 2016

f) Going concern

Management has made an assessment of the Group's ability to continue as a going concern and is satisfied that the Group has the resources to continue in business for the foreseeable future. Furthermore, management is not aware of any material uncertainties that may cast significant doubt upon the Group's ability to continue as a going concern. Therefore, the annual consolidated financial statements continue to be prepared on a going concern basis.

3) SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The significant accounting policies adopted in the preparation of these consolidated financial statements are set out below.

Change in accounting policies

The accounting policies used in the preparation of these consolidated financial statements are consistent with those used in the preparation of the annual consolidated financial statements for the year ended December 31, 2015 except for the adoption of the following amendments to existing standards and a new interpretation mentioned below which has had no material impact on the consolidated financial statements of the Group on the current period or prior periods and is expected to have an insignificant effect in future periods:

A summary of the amendments is contained as under:

- Amendments to IFRS 10 – "Consolidated Financial Statements", IFRS 12 – "Disclosure of Interests in Other Entities" and IAS 28 – "Investments in Associates", applicable for the annual periods beginning on or after 1 January 2016, address three issues that have arisen in applying the investment entities exception under IFRS 10. The amendments to IFRS 10 clarify that the exemption from presenting consolidated financial statements applies to a parent entity that is a subsidiary of an investment entity, when the investment entity measures its subsidiaries at fair value. Furthermore, only a subsidiary of an investment entity that is not an investment entity itself and that provides support services to the investment entity is consolidated. All other subsidiaries of an investment entity are measured at fair value. The amendments to IAS 28 allow the investor, when applying the equity method,

to retain the fair value measurement applied by the investment entity associate or joint venture to its interests in subsidiaries.

- Amendments to IAS 1 – "Presentation of Financial Statements", applicable for the annual periods beginning on or after 1 January 2016, clarify, existing IAS 1 requirements in relation to;
 - The materiality requirements in IAS 1
 - That specific line items in the statement(s) of profit or loss and other comprehensive income ("OCI") and the statement of financial position may be disaggregated
 - That entities have flexibility as to the order in which they present the notes to financial statements
 - That the share of OCI of associates and joint ventures accounted for using the equity method must be presented in aggregate as a single line item and classified between those items that will or will not be subsequently reclassified to profit or loss.

The amendments further clarify the requirements that apply when additional subtotals are presented in the statement of financial position and the income statement and statement of comprehensive income.

- Amendments to IAS 16 – "Property, Plant and Equipment" and IAS 38 – "Intangible Assets", applicable for the annual periods beginning on or after 1 January 2016, restricts the use of ratio of revenue generated to total revenue expected to be generated to depreciate property, plant and equipment and may only be used in very limited circumstances to amortise intangible assets.

- Amendments to IAS 16 – "Property, Plant and Equipment" and IAS 41 – "Agriculture", applicable for the annual periods beginning on or after 1 January 2016, change the scope of IAS 16 to include biological assets that meet the definition of bearer plants. Agricultural produce growing on bearer plants will remain within the scope of IAS 41. In addition, government grants relating to bearer plants will be accounted for in accordance with IAS 20 – "Accounting for Government Grants and Disclosure of Government Assistance", instead of IAS 41.

- Amendments to IAS 27 – "Separate Financial Statements", applicable for the annual periods beginning on or after 1 January 2016, allows an entity to use the equity method as described

in IAS 28 to account for its investments in subsidiaries, joint ventures and associates in its separate financial statements.

Annual improvements to IFRS 2012-2014 cycle applicable for annual periods beginning on or after 1 January 2016. A summary of the amendments is as follows:

- IFRS 5 – "Non-current Assets Held for Sale and Discontinued Operations", amended to clarify that changing from one disposal method to the other would not be considered a new plan of disposal, rather it is a continuation of the original plan. There is, therefore, no interruption of the application of the requirements in IFRS 5.

- IFRS 7 – "Financial Instruments: Disclosures" has been amended to clarify that a servicing contract that includes a fee can constitute continuing involvement in a financial asset. The nature of the fee and the arrangement should be assessed in order to consider whether the disclosures are required under IFRS 7 and the assessment must be done retrospectively. IFRS 7 has been further amended to clarify that the offsetting disclosure requirements do not apply to condensed interim financial statements, unless such disclosures provide a significant update to the information reported in the most recent annual report.

- IAS 19 – "Employee Benefits" – amendment clarifies that market depth of high quality corporate bonds is assessed based on the currency in which the obligation is denominated, rather than the country where the obligation is located. When there is no deep market for high quality corporate bonds in that currency, government bond rates must be used.

a) Basis of consolidation

The consolidated financial statements comprise the financial statements of Alawwal bank (Formerly Known as Saudi Hollandi Bank) and its subsidiaries drawn up to December 31 of each year. The financial statements of the subsidiaries are prepared for the same reporting period as that of the Bank and changes have been made to their accounting policies where necessary to align them with the accounting policies of the Bank.

Subsidiaries are investees controlled by the Group. The Group

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended December 31, 2016

controls an investee when it is exposed to, or has rights to, variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. The financial statements of subsidiaries are included in the consolidated financial statements from the date that control commences until the date that control ceases.

The results of subsidiaries acquired or disposed of during the year, if any, are included in the consolidated income statement from the date of the acquisition or up to the date of disposal, as appropriate. The consolidated financial statements have been prepared using uniform accounting policies and valuation methods for like transactions and other events in similar circumstances.

Specifically, the Group controls an investee if and only if the Group has:

- Power over the investee (i.e. existing rights that give it the current ability to direct the relevant activities of the investee);
- Exposure, or rights, to variable returns from its involvement with the investee, and
- The ability to use its power over the investee to affect its returns
- When the Group has less than a majority of the voting or similar rights of an investee, the Group considers all relevant facts and circumstances in assessing whether it has power over an investee, including:
- The contractual arrangement with the other vote holders of the investee
- Rights arising from other contractual arrangements
- The Group's voting rights and potential voting rights granted by equity instruments such as shares

The Group re-assesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control. Consolidation of a subsidiary commences when the Group obtains control over the subsidiary and ceases when the Group loses control of the subsidiary. Assets, liabilities, income and expenses of a subsidiary acquired or disposed

of during the year are included in the consolidated statement of comprehensive income from the date the Group gains control until the date the Group ceases to control the subsidiary.

All intra-group assets and liabilities, equity, income, expenses and cash flows relating to transactions between members of the Group are eliminated in full on consolidation.

The Group manages and administers assets held in unit trusts and other investment vehicles on behalf of investors. The financial statements of these entities are not included in these consolidated financial statements except when the Group controls the entity.

A change in the ownership interest of a subsidiary, without a loss of control, is accounted for as an equity transaction. If the Group loses control over a subsidiary, it:

- Derecognises the assets (including goodwill, if any) and liabilities of the subsidiary
- Derecognises the carrying amount of any non-controlling interests
- Derecognises the cumulative translation differences recorded in equity
- Recognises the fair value of the consideration received
- Recognises the fair value of any investment retained
- Recognises any surplus or deficit in profit or loss
- Reclassifies the parent's share of components previously recognised in the consolidated comprehensive income to consolidated income statement or retained earnings, as appropriate, as would be required if the Group had directly disposed of the related assets or liabilities.

b) Investments in associates

Investments in associates are initially recognised at cost and subsequently accounted for under the equity method of accounting based on annual audited or latest available financial statements. An associate is an entity in which the Group has significant influence (but not control), over financial and operating policies and which is neither a subsidiary nor a joint venture. Investments in associates

are carried in the consolidated statement of financial position at cost plus post-acquisition changes in the Group's share of net assets, less any impairment in the value of individual investments. The Group's share of its associate's post-acquisition profits or losses is recognised in the consolidated income statement, and its share of post-acquisition movements in statement of comprehensive income is recognised in reserves. The cumulative post-acquisition movements are adjusted against the carrying amount of the investment. When the Group's share of losses in an associate equals or exceeds its interest in the associate, including any other unsecured receivables, the Group does not recognise further losses, unless it has incurred obligations or made payments on behalf of the associate. Unrealized gains and losses on transactions between the Group and its associates are eliminated to the extent of the Group's interest in the associates. The consolidated income statement reflects the Group's share of the results of associate's operations. When there has been a change recognised directly in the equity of the associate, the Group recognises its share of any changes and discloses it in the consolidated statement of changes in shareholders' equity.

The Group's share of profit / loss of an associate is shown on the face of the consolidated income statement. This is the profit / loss attributable to equity holders of the associate and, therefore, is profit / loss after tax and non-controlling interests in the subsidiaries of the associate. The financial statements of the associate are prepared for the same reporting period as the Group. When necessary, adjustments are made to bring the accounting policies in line with those of the Group. After application of the equity method, the Group determines whether it is necessary to recognise an additional impairment loss on its investment in its associate. The Group determines at each reporting date whether there is any objective evidence that the investment in the associate is impaired. If this is the case, the Group calculates the amount of impairment as the difference between the recoverable amount of the associate and its carrying value and recognises the amount in the "share" of earning of an "associate" in the consolidated income statement.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended December 31, 2016

c) Trade date accounting

All "regular-way" purchases and sales of financial assets are initially recognised and derecognised on trade date, i.e. the date that the Group becomes a party to the contractual provisions of the instrument. "Regular-way" purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame generally established by regulation or convention in the market place.

A contract that requires or permits net settlement of the change in the value of the contract is not a regular way contract. Instead, such a contract is accounted for as a derivative in the period between the trade date and the settlement date.

d) Derivative financial instruments and hedge accounting

Derivative financial instruments, including foreign exchange contracts, foreign exchange and commodity forward contracts, commission rate swaps, commodity options, futures and forward rate agreements, currency and commission rate swaps, currency and commission rate options (both written and purchased) are initially recognised at fair value on the date on which the derivative contract is entered into and are subsequently re-measured at fair value in the consolidated statement of financial position with transaction costs recognised in the consolidated income statement.

All derivatives are carried at their fair value as assets where the fair value is positive and as liabilities where the fair value is negative. Fair values are derived by applying discounted cash flow models or pricing models as appropriate. The treatment of changes in their fair value depends on their classification into the following categories:

i) Derivatives held for trading

Any changes in the fair value of derivatives held for trading are taken directly to the consolidated income statement and disclosed in net trading income. Derivatives held for trading include all those derivatives which do not qualify for hedge accounting including embedded derivatives.

ii) Embedded derivatives

Derivatives embedded in other financial instruments are treated

as separate derivatives and recorded at fair value if their economic characteristics and risks are not closely related to those of the host contract, and the host contract is not itself held for trading or designated at fair value through income statement (FVIS). Embedded derivatives separated from the host contracts are carried at fair value in the trading portfolio with changes in fair value recognised in the consolidated income statement.

iii) Hedge accounting

The Group designates certain derivatives as hedging instruments in qualifying hedging relationships to manage exposures to interest rate, foreign currency, and credit risks, including exposures arising from highly probable forecast transactions and firm commitments. In order to manage particular risk, the Group applies hedge accounting for transactions that meet specific criteria.

For the purpose of hedge accounting, hedges are classified into two categories: (a) fair value hedges that hedge the exposure to changes in the fair value of a recognised asset or liability (or assets or liabilities in case of portfolio hedging) or an unrecognised firm commitment or an identified portion of such an asset, liability or firm commitment, that is attributable to a particular risk and could affect the reported net gain or losses; and (b) cash flow hedges which hedge exposure to variability in cash flows that is either attributable to a particular risk associated with a recognised asset or liability or to a highly probable forecasted transaction that affects the reported net gains or loss.

In order to qualify for hedge accounting, hedge should be expected to be highly effective, i.e. changes in the fair value or cash flows of the hedging instruments should effectively offset corresponding changes in the hedged item and should be reliably measurable. At inception of the hedge, the risk management objective and strategy is documented including the identification of the hedging instrument, the related hedged item the nature of risk being hedged, and how management will assess the effectiveness of the hedging relationship. Subsequently hedges are assessed for effectiveness on an on-going basis.

At each hedge effectiveness assessment date, a hedge relationship must be expected to be highly effective on a prospective basis and

demonstrable that it was effective (retrospective effectiveness) for the designated period in order to qualify for hedge accounting. A formal assessment is undertaken by comparing the hedging instrument's effectiveness in offsetting the changes in fair value or cash flows attributable to the hedged risk in the hedged item, both at inception and at each quarter end on an ongoing basis. A hedge is expected to be highly effective if the changes in fair value or cash flows attributable to the hedged risk during the period for which the hedge is designated were offset by the hedging instrument in a range of 80% to 125% and were expected to achieve such offset in future periods. Hedge ineffectiveness is recognized in the consolidated income statement in 'Net trading income'. For situations where the hedged item is a forecast transaction, the Bank also assesses whether the transaction is highly probable and presents an exposure to variations in cash flows that could ultimately affect the consolidated income statement.

Fair Value Hedges

When a derivative is designated as a hedging instrument in a fair value hedge relationship, any gain or loss from re-measuring the hedging instruments to fair value is recognised in the consolidated income statement together with the change in the fair value of the hedged item attributable to the hedged risk.

Where the fair value hedge of a commission bearing hedged item measured at amortized cost ceases to meet the criteria for hedge accounting or is sold, exercised or terminated, the difference between the carrying value of the hedged item on termination and the face value is amortised over the remaining term of the original hedge using the effective commission rate. If the hedged item is derecognised, the unamortised fair value adjustment is recognised immediately in the consolidated income statement.

Cash Flow Hedges

For designated and qualifying cash flow hedging, derivative instruments are used in a hedge of a variability in cash flows attributable to a particular risk associated with recognised asset or a liability or a highly probable forecast transaction that could affect the consolidated income statement. The portion of the gain or loss on the hedging instrument that is determined to be an effective

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended December 31, 2016

portion is recognised directly in other comprehensive income and the ineffective portion, if any, is recognised in the consolidated income statement. For cash flow hedges affecting future transactions, the gains or losses recognised in other reserves, are transferred to the consolidated income statement in the same period in which the hedged item affects the consolidated income statement. However, if the Group expects that all or a portion of a loss recognized in other comprehensive income will not be recovered in one or more future periods, it shall reclassify into the consolidated income statement as a reclassification adjustment the amount that is not to be recognized.

Where the hedged forecasted transaction results in the recognition of a non- financial asset or a non-financial liability, then at the time such asset or liability is recognised the associated gains or losses that had previously been recognised directly in other comprehensive income are included in the initial measurement of the acquisition cost or other carrying amount of such asset or liability. When the hedging instrument is expired or sold, terminated or exercised, or no longer qualifies for hedge accounting, or the forecast transaction is no longer expected to occur or the Bank revokes the designation then hedge accounting is discontinued prospectively. At that point of time, any cumulative gain or loss on the cash flow hedging instrument that was recognised in other comprehensive income from the period when the hedge was effective is transferred from equity to consolidated income statement when the forecasted transaction occurs. Where the hedged forecasted transaction is no longer expected to occur and affects the consolidated income statement, the net cumulative gain or loss recognised in “other comprehensive income” is transferred immediately to the consolidated income statement for the year.

e) Foreign currencies

The Group's consolidated financial statements are presented in Saudi Arabian Riyals, which is also the Bank's functional currency. Each entity in the Group determines its own functional currency and items included in the financial statements of each entity are measured using that functional currency. Transactions in foreign currencies are translated into Saudi Arabian Riyals at the spot rates prevailing at transaction dates. Monetary assets and liabilities

at year-end (other than monetary items that form part of the net investment in a foreign operation), denominated in foreign currencies, are translated into Saudi Arabian Riyals at rates of exchange prevailing at the reporting date. The foreign currency gain or loss on monetary items is the difference between amortised cost in the functional currency at the beginning of the year adjusted for the effective interest rate and payments during the year, and the amortised cost in foreign currency translated at the exchange rate at the end of the year. All differences arising on non-trading activities are taken to other non-operating income in the consolidated income statement, with the exception of differences on foreign currency borrowings that provide an effective hedge against a net investment in foreign entity.

Foreign exchange gains or losses from settlement of transactions and translation of period end monetary assets and liabilities denominated in foreign currencies are recognised in the consolidated income statement, except for differences arising on the retranslation of available for sale equity instruments or when deferred in other comprehensive income as qualifying cash flow hedges and qualifying net investment hedges to the extent hedges are effective. Translation gains or losses on non-monetary items carried at fair value are included as part of the fair value adjustment, unless the non-monetary items have an effective hedging strategy. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value is determined.

f) Offsetting financial instruments

Financial assets and liabilities are offset and reported net in the consolidated statement of financial position when there is a legally enforceable right to set off the recognised amounts and when the Group intends to settle on a net basis, or to realise the asset and settle the liability simultaneously.

Income and expenses are not offset in the consolidated income statement unless required or permitted by any accounting standard or interpretation, and as specifically disclosed in the accounting

policies of the Group.

g) Revenue / expense recognition

i) Special commission income and expenses

Special commission income and expenses for all financial instruments, except for those classified as held for trading or at fair value through income statement (FVIS), are recognised in the consolidated income statement using effective special commission rate.

The effective special commission rate is the rate that exactly discounts the estimated future cash payments and receipts through the expected life of the financial asset or liability (or, where appropriate, a shorter period) to the carrying amount of the financial asset or liability. When calculating the effective special commission rate, the Group estimates future cash flows considering all contractual terms of the financial instrument but excluding future credit losses.

The carrying amount of the financial asset or financial liability is adjusted if the Group revises its estimates of payments or receipts. The adjusted carrying amount is calculated based on the original effective special commission rate and the change in carrying amount is recorded as special commission income or expense. Subsequent to the recognition of an impairment loss on a financial asset or a group of financial assets, special commission income continues to be accounted for in consolidated statement of financial position on the effective special commission rate basis, on the asset's carrying value. The calculation of the effective special commission rate takes into account all contractual terms of the financial instruments (prepayment, options etc.) and includes all fees paid or received, transaction costs, and discounts or premiums that are an integral part of the effective special commission rate. Transaction costs are incremental costs that are directly attributable to the acquisition, issue or disposal of a financial asset or a liability.

ii) Exchange income / (loss)

Exchange income / (loss) is recognised when earned/incurred, as discussed in the foreign currencies policy earlier.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended December 31, 2016

iii) Fee and commission income

Fee and commission income that are integral to the effective special commission rate are included in the measurement of the relevant assets. Fee and commission income that are not integral part of the effective special commission rate calculation on a financial asset or liability are recognised when the related service is provided as follows:

- Portfolio and other management advisory and service fees are recognised over the period of applicable service contracts usually on a time proportionate basis.
- Fee received on asset management, wealth management, financial planning, custody services and other similar services that are provided over an extended period of time, are recognised over the period when the services are being provided.
- Loan commitment fees for loans that are likely to be drawn down and other credit related fees are deferred (together with any incremental costs) and recognised as an adjustment to the effective special commission rate on the loan. When a loan commitment is expected to result in the draw-down of a loan, loan commitment fees are recognised on a straight-line basis over the commitment period.
- Other fee and commission expense relate mainly to transaction and service fees and are expensed as the services are received and are disclosed net of the related fee and commission income.

iv) Dividend income

Dividend income is recognised when the Group's right to receive dividend is established. Dividends are reflected as a component of net trading income, net income from FVIS financial instruments or other operating income based on the classification of the related equity instrument.

v) Gains / (loss) from FVIS (Fair value through Income Statement) financial instruments

Net income from FVIS financial instruments relates to financial assets and liabilities designated as FVIS and include all realised and unrealised fair value changes, special commission, dividends and

foreign exchange differences.

vi) Trading income / (loss), net

Results arising from trading activities include all realised and unrealised gains and losses from changes in fair value and related special commission income or expense, dividends for financial assets and financial liabilities held for trading and foreign exchange differences. This includes any ineffectiveness recorded in hedging transactions.

h) Day one profit or loss

Where the transaction price differs from the fair value of other observable current market transactions in the same instrument or based on a valuation technique whose variables include only data from observable markets, the Group immediately recognises the difference between the transaction price and fair value (a 'Day one' profit or loss) in the consolidated income statement in 'Net trading income'. In cases where use is made of data which is not observable, the difference between the transaction price and model value is only recognised in the consolidated income statement when the inputs become observable, or when the instrument is derecognised.

i) Sale and repurchase agreements

Assets sold with a simultaneous commitment to repurchase at a specified future date (repos) continue to be recognised in the consolidated statement of financial position as the Group retains substantially all the risks and rewards of ownership. These assets are continued to measure in accordance with related accounting policies for investments held as FVIS, available for sale, held to maturity and other investments held at amortized cost. The transactions are treated as collateralised borrowing and counter-party liability for amounts received under these agreements is included in “Due to banks and other financial institutions” or “Customer deposits”, as appropriate.

The difference between sale and repurchase price is treated as special commission expense and accrued over the life of the repo agreement on an effective special commission rate basis. Assets purchased with a corresponding commitment to resell at a specified future date (reverse repo) are not recognised in the consolidated

statement of financial position, as the Group does not obtain control over the assets. Amounts paid under these agreements are included in “Cash and balances with SAMA”, “Due from banks and other financial institutions” or “Loans and advances”, as appropriate. The difference between purchase and resale price is treated as special commission income and accrued over the life of the reverse repo agreement on an effective special commission rate basis.

j) Investments

Initial recognition

All investment securities are initially recognised at fair value plus incremental direct transaction costs. These are subsequently accounted for depending on their classification as either held to maturity, FVIS, available for sale or other investments held at amortised cost. Premiums are amortised and discounts accreted using the effective special commission rate basis and are taken to special commission income.

Determination of fair value

For securities traded in organised financial markets, fair value is determined by reference to quoted market average bid / ask prices at the close of business. Fair value of managed assets and investments in mutual funds are determined by reference to declared net asset values which approximate the fair value.

For securities where there is no quoted market price, a reasonable estimate of the fair value is determined by reference to the current market value of another instrument which is substantially the same, or is based on the expected cash flows or the underlying net asset base of the security. Where the fair values cannot be derived from active markets, they are determined using a variety of valuation techniques that include the use of mathematical models.

Reclassification

Investments at FVIS are not reclassified subsequent to their initial recognition, except for non-derivative FVIS instrument, other than those designated as FVIS upon initial recognition (i.e. trading investments) which may be reclassified out of the FVIS category if they are no longer held for the purpose of being sold or repurchased

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended December 31, 2016

in the near term, and the following conditions are met:

- If the investments would have met the definition of “held at amortised cost” and had not been required to be classified as held for trading at initial recognition, these may be reclassified if the Group has the intention and ability to hold the investments for the foreseeable future or until maturity.
- If the investments would not have met the definition of held at amortised cost, and then it is reclassified out of the trading category only in ‘rare circumstances’.

A security held as available for sale may be reclassified to “Other investments held at amortised cost” if it otherwise would have met the definition of “Other investments held at amortised cost” and if the Group has the intention and ability to hold that financial asset for the foreseeable future or until maturity.

Subsequent measurement

The investments under each class are accounted for and presented using the basis set out in the following paragraphs:

i) Held as FVIS

Investments in this category are classified if they are held for trading or designated by management as FVIS on initial recognition. Investments classified as trading are acquired principally for the purpose of selling or repurchasing in the short term and are recorded in the consolidated statement of financial position at fair value. Changes in fair value are recognized in net trading income / (loss).

An investment may be designated at FVIS by the management, at initial recognition if doing so significantly reduces measurement inconsistencies which would otherwise arise except for equity instruments that do not have a quoted price in an active market and whose fair values cannot be reliably measured.

Investments at FVIS are recorded in the consolidated statement of financial position at fair value. Changes in the fair value are recognised in the consolidated income statement for the year in which it arises. Special commission income and dividend income on financial assets held as FVIS are reflected as either trading income

or income from FVIS financial instruments in the consolidated income statement.

ii) Available for sale

Available-for-sale investments (AFS) are those non-derivative equity and debt securities which are neither classified as held to maturity (HTM) investments, other investments held at amortized cost (OI) nor designated as FVIS, that are intended to be held for an unspecified period of time, which may be sold in response to needs for liquidity or changes in special commission rates, exchange rates or equity prices.

Investments which are classified as AFS are initially recognised at fair value plus direct and incremental transaction costs and subsequently measured at fair value except for unquoted equity securities whose fair value cannot be reliably measured and are carried at cost. Unrealised gains or losses arising from a change in its fair value is recognised in consolidated other comprehensive income until the investment is de- recognised or impaired whereupon any cumulative gain or loss previously recognized in other comprehensive income is reclassified to consolidated income statement.

iii) Held to maturity

Investments with fixed or determinable payments and fixed maturity that the Group has the positive intention and ability to hold to maturity are classified as held to maturity (HTM). Held to maturity investments are initially recognised at fair value including direct and incremental transaction costs and subsequently measured at amortised cost, less provision for impairment in value. Amortised cost is calculated by taking into account any discount or premium on acquisition using an effective special commission rate method. Any gain or loss on such investments is recognised in the consolidated income statement when the investment is derecognised or impaired.

Investments classified as held to maturity cannot ordinarily be sold or reclassified without impacting the Group's ability to use this classification and cannot be designated as a hedged item with respect to special commission rate or prepayment risk, reflecting

the longer-term nature of these investments. However, sales and reclassifications in any of the following circumstances would not impact the Group's ability to use this classification;

- Sales or reclassifications that are so close to maturity that the changes in market rate of special commission would not have a significant effect on the fair value;
- Sales or reclassifications after the Group has collected substantially all the assets' original principal; and
- Sales or reclassifications attributable to non recurring isolated events beyond the Group's control that could not have been reasonably anticipated.

iv) Other investments held at amortised cost

Investment securities with fixed or determinable payments that are not quoted in an active market are classified as Other investments held at amortised cost (OI). Such investments whose fair values have not been hedged are stated at amortised cost using effective special commission rate method basis, less provision for impairment. Any gain or loss is recognised in the consolidated income statement when the investment is derecognised or impaired.

k) Loans and advances

Loans and advances are non-derivative financial assets originated or acquired by the Group with fixed or determinable payments. Loans and advances are recognised when cash is advanced to borrowers. They are derecognised when either the borrower repays the obligations, the loans are written off or substantially all the risks and rewards of ownership are transferred. All loans and advances are initially measured at fair value, including acquisition charges associated with the loans and advances.

Subsequently loans and advances that are not quoted in an active market and for which fair value has not been hedged, are stated at amortised cost less any amount written off and impairment for credit losses. For loans and advances which are hedged, the related portion of the hedged fair value is adjusted against the carrying amount.

If, in a subsequent period, the amount of the impairment loss

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended December 31, 2016

decreases and the decrease can be related objectively to an event occurring after the impairment was recognised (such as an improvement in the debtor's credit rating), the previously recognised impairment loss is reversed by adjusting the allowance account. The amount of the reversal is recognised in the consolidated income statement in impairment charge for credit losses.

(i) Impairment of financial assets held at amortised cost

A financial asset or group of financial assets is classified as impaired when there is objective evidence of impairment as a result of one or more events that occurred after the initial recognition of the financial asset or group of financial assets and that a loss event has an impact on the estimated future cash flows of the financial asset or group of financial assets that can be reliably estimated.

A specific allowance for credit losses due to impairment of a loan or any other financial asset held at amortised cost is established if there is objective evidence that the Group will not be able to collect all amounts due. The amount of the specific allowances is the difference between the carrying amount and the estimated recoverable amount. The estimated recoverable amount is the present value of expected future cash flows, including amounts estimated to be recoverable from guarantees and collateral, discounted based on the original effective special commission rate.

Consumer loans are considered to be impaired when a payment is overdue for specified number of days as per related product programs. Since the risk metrics for consumer loans are based on a collective “pool” basis, rather than on individual loans, the provisions for consumer loans are also computed on a “pool basis” using the “flow rate” methodology. The provision coverage is 70% for the non-performing loans (other than home finance), which are overdue by 90 days whereas the loans are considered as a total write off once overdue by 180 days. In case of home finance, provision is raised for non performing loans overdue by 90 days and above and are considered write off once overdue by 720 days.

In addition to specific provision for credit losses, provision for collective impairment is made on a portfolio basis for credit losses where there is objective evidence that unidentified losses exist at the reporting date. These are based on any deterioration in the risk rating (i.e. downward migration of risk ratings) of the financial

assets since it was originally granted. This provision is estimated based on various factors including credit ratings allocated to a borrower or group of borrowers, the current economic conditions, the experience that the Group has had in dealing with a borrower or group of borrowers and available historical default information.

Loans whose terms have been renegotiated are no longer considered to be past due but are treated as new loans. Restructuring policies and practices are based on indicators or criteria, which indicate that payment will most likely continue. The loans continue to be subject to an individual or collective impairment assessment, calculated using the loan's original effective special commission rate.

Loans and advances are generally renegotiated either as part of an ongoing customer relationship or in response to an adverse change in the circumstances of the borrower. In the latter case, renegotiation can result in an extension of the due date of payment or repayment plans under which the Group offers a revised rate of special commission to genuinely distressed borrowers. This results in the asset continuing to be overdue and individually impaired as the renegotiated payments of special commission and principal do not recover the original carrying amount of the loan. In other cases, renegotiation lead to a new agreement, this is treated as a new loan. Restructuring policies and practices are based on indicators or criteria which, indicate that payment will most likely continue. The loans continue to be subject to an individual or collective impairment assessment, calculated using the loan's original effective special commission rate.

(ii) Impairment of available-for-sale financial assets

In the case of debt instruments classified as available for sale, Management assesses individually whether there is objective evidence of impairment based on the same criteria as financial assets carried at amortised cost. However, the amount recorded for impairment is the cumulative loss measured as the difference between the amortised cost and the current fair value, less any impairment loss on that investment previously recognised in the consolidated income statement.

If, in a subsequent period, the fair value of a debt instrument increases and the increase can be objectively related to a credit event occurring after the impairment loss was recognised in the

consolidated income statement, the impairment loss is reversed through the consolidated income statement.

For equity investments held as available for sale, a significant or prolonged decline in fair value below its cost represents objective evidence of impairment. The impairment loss cannot be reversed through the consolidated income statement as long as the asset continues to be recognised

i.e. any increase in fair value after impairment has been recorded can only be recognised in the consolidated statement of changes in shareholders' equity. On derecognition, any cumulative gain or loss previously recognised in the consolidated statement of changes in shareholders' equity is included in the consolidated income statement for the year.

m) Other real estate

The Group, in the ordinary course of business, acquires certain real estate against settlement of due loans and advances. Such real estate assets are considered as assets held for sale and are initially stated at the lower of net realisable value of due loans and advances and the current fair value of the related properties, less any costs to sell (if material). No depreciation is charged on such real estate assets. Rental income from other real estate is recognised in the consolidated income statement. Subsequent to initial recognition, any subsequent write down to fair value, less costs to sell, are charged to the consolidated income statement. Any subsequent revaluation gain in the fair value less costs to sell these assets to the extent this does not exceed the cumulative write down is recognised in the consolidated income statement. Gains or losses on disposal are recognised in the consolidated income statement.

n) Impairment of non-financial assets

The Group assesses at each reporting date whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Group estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating units (CGU) fair value less costs to sell and its value in use. Where the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended December 31, 2016

amount. In assessing value in use, the estimated future cash flows are discounted to their present value using a discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs to sell, an appropriate valuation model is used. These calculations are corroborated by valuation multiples, quoted share prices for publicly traded entities or other available fair value indicators.

For assets excluding goodwill, if any, an assessment is made at each reporting date as to whether there is any indication that previously recognised impairment losses may no longer exist or may have decreased. If such indication exists, the Group estimates the asset's or CGU's recoverable amount. A previously recognised impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognised. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceeds the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognised for the asset in prior years. Such reversal is recognised in the consolidated income statement.

o) Property and equipment

Property and equipment are measured at cost less accumulated depreciation and accumulated impairment loss. Freehold land is not depreciated. Changes in the expected useful life are accounted for by changing the period or method, as appropriate, and treated as changes in accounting estimates. The residual values and useful lives of assets are reviewed, and adjusted if appropriate, at each reporting date. The cost of other items property and equipment is depreciated / amortised on the straight-line method over the estimated useful lives of the assets as follows:

Buildings	33 Years
Leasehold improvements	Over the shorter of lease period or economic useful life i.e 10 years
Furniture and fixtures, computer hardware and software and motor vehicles	3 to 10 years

Gains and losses on disposals are determined by comparing proceeds with carrying amount. These are included in the consolidated income statement.

All assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. Any carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount.

p) Financial Liabilities

All money market deposits, customer deposits, subordinated debts and other debt securities in issue are initially recognised at fair value less transaction costs. Financial liabilities classified as FVIS are recognised initially at fair value and transaction costs are taken directly to the consolidated income statement. Subsequently all financial liabilities other than those held at FVIS or where fair values have been hedged are measured at amortised cost. Amortised cost is calculated by taking into account any discount or premium. Premiums are amortised and discounts accreted on an effective special commission rate method to maturity and taken to special commission expense.

Financial liabilities are designated as FVIS on initial recognition if doing so significantly reduces measurement inconsistencies which would otherwise arise. After initial recognition these liabilities are measured at fair value and the resulting gain or loss is included in the consolidated income statement.

Financial liabilities in an effective fair value hedge relationship are adjusted for fair value changes to the extent of the risk being hedged. The resultant gain or loss is recognised in the consolidated income statement. For financial liabilities carried at amortised cost, any gain or loss is recognised in the consolidated income statement when derecognised.

q) Financial guarantees and loan commitments

In the ordinary course of business, the Group issues financial guarantees, letters of credit and acceptances. A financial guarantee contract is a contract that requires the issuer to make specified payments to reimburse the holder for the loss it incurs because

a specified debtor fails to make payment when due in accordance with the original or modified terms of a debt arrangement. Financial guarantees are initially recognised in the consolidated financial statements at fair value in other liabilities, being the value of the premium received. Subsequent to the initial recognition, the Group's liability under each guarantee is measured at the higher of the unamortised premium and the best estimate of expenditure required to settle any financial obligations arising as a result of guarantees. Any increase in the liability relating to the financial guarantee is taken to the consolidated income statement in "impairment charge for credit losses, net". The premium received is recognised in the consolidated income statement in "fees and commission income, net" on a straight line basis over the life of the guarantee.

Loan commitments are firm commitments to provide credit under pre-specified terms and conditions.

r) Provisions

Provisions are recognised when management can reliably estimate a present legal or constructive obligation as a result of past events and it is more likely than not that an outflow of resources will be required to settle the obligation.

s) Accounting for leases

Leases entered into by the Group as a lessee are all operating leases. Payments made under operating leases are charged to the consolidated income statement on a straight-line basis over the period of the lease.

When an operating lease is terminated before the lease period has expired, any penalty required to be paid to the lessor is recognised as an expense in the period in which termination takes place.

t) Cash and cash equivalents

For the purpose of the consolidated statement of cash flows, "cash and cash equivalents" include notes and coins on hand, balances with SAMA excluding statutory deposit, and due from banks and other financial institutions with original maturity of three months or less which are subject to insignificant risk of changes in their fair value.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended December 31, 2016

u) Derecognition of financial instruments

A financial asset (or a part of a financial asset, or a part of a group of similar financial assets) is derecognised, when contractual rights to receive the cash flows from the financial asset expire or the asset is transferred and the transfer qualifies for de-recognition. In instances where the Group is assessed to have transferred a financial asset, the asset is derecognised if the Group has transferred substantially all the risks and rewards of ownership. Where the Group has neither transferred nor retained substantially all the risks and rewards of ownership, the financial asset is derecognised only if the Group has not retained control of the financial asset. The Group recognises separately as assets or liabilities any rights and obligations created or retained in the process.

A financial liability or a part of a financial liability can only be derecognised when it is extinguished, that is when the obligation specified in the contract is either discharged, cancelled or expires.

v) Share based plan transactions

The Group's share plan is classified as an equity settled plan. The fair value of shares which the Group expects will eventually vest is determined at the grant date and is expensed on a straight line basis over the vesting period with corresponding increase in share based plan reserve. Details regarding the plan and determination of the fair value are set out in note 37.

At each reporting date, management revises its estimates of the number of equity instruments expected to vest. The impact of the revision of the original estimates, if any, is recognised in the consolidated income statement over the remaining vesting period, with a corresponding adjustment to the share base plan reserve.

w) End of service benefits

The liability for employees' end of service benefits is determined based on an actuarial valuation conducted by an independent actuary. The actuarial valuation process takes into account the provisions of the Saudi Arabian Labour Law.

x) Short term employee benefits

Short term employee benefits are measured on a undiscounted

basis and is expensed as the related service is provided. A liability is recognized for the amount expected to be paid under short term cash bonus or profit sharing plans if the Group has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee and the obligation can be estimated reliably.

y) Zakat and income tax

Under Saudi Arabian Zakat and Income tax laws, Zakat and income taxes are the liabilities of Saudi and foreign shareholders, respectively. Zakat is computed on the Saudi shareholders' share of Zakat base or adjusted net income using the basis defined under the Zakat regulations. Income taxes are computed on the foreign shareholders' share of adjusted net income for the year.

Zakat and income taxes are not charged to the Group's consolidated income statement and are deducted from current and future dividends payable to shareholders.

z) Investment management services

The Group offers investment services to its customers through its subsidiary AI. The services include the management of certain investment funds in consultation with professional investment advisors. The Group's share of these funds is included in available-for-sale investments and fees earned are disclosed under related parties' transactions.

Assets held in trust or in a fiduciary capacity are not treated as assets of the Group and accordingly are not included in the consolidated financial statements.

aa) Non-special commission based banking products

In addition to conventional banking, the Group also offers its customers certain non-special commission based banking products, which are approved by its independent Shariah Board, as follows:

All non-special commission based banking products are included in loans and advances, customers' deposits and due from and to banks and other financial institutions and are in conformity with the related accounting policies described in these consolidated financial statements.

High level definitions of non-special commission based products:

1. Murabaha:

is an agreement whereby the Group sells to a customer a commodity or an asset, which the Group has purchased and acquired based on a promise received from the customer to buy. The selling price comprises the cost plus an agreed profit margin.

2. Ijarah

is an agreement whereby the Group, acting as a lessor, purchases or constructs an asset for lease according to the customer request (lessee), based on his promise to lease the asset for an agreed rent and specific period that could end by transferring the ownership of the leased asset to the lessee.

3. Musharaka

is an agreement between the Group and a customer to contribute to a certain investment enterprise or the ownership of a certain property ending up with the acquisition by the customer of the full ownership. The profit or loss is shared as per the terms of the agreement.

4. Tawaruq

is a form of Murabaha transactions where the Group purchases a commodity and sells it to the customer. The customer sells the underlying commodity at spot and uses the proceeds for his financing requirements.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

4) CASH AND BALANCES WITH SAMA

	2016	2015
Cash in hand	767,363	775,893
Current accounts	123,532	151,917
Balances with SAMA:		
- Statutory deposit	4,427,484	4,476,152
- Reverse repo with SAMA	2,169,000	2,233,907
TOTAL	7,487,379	7,637,869

In accordance with the requirements of the Banking Control Law and Regulations issued by SAMA, the Group is required to maintain a statutory deposit with SAMA at stipulated percentages of its demand, savings, time and other deposits, calculated at the end of each month. The statutory deposit with SAMA is not available to finance the Group's day-to-day operations and therefore does not form part of cash and cash equivalents (note-27).

5) DUE FROM BANKS AND OTHER FINANCIAL INSTITUTIONS

	2016	2015
Current accounts	428,893	546,888
Money market placements	595,476	187,727
TOTAL	1,024,369	734,615

The credit quality of due from banks and other financial institutions is managed using credit ratings from reputable external credit rating agencies. The table below shows the credit quality of balances due from banks and other financial institutions.

	2016	2015
Investment grade (credit rating AAA to BBB-)	1,015,728	723,802
Unrated	8,641	10,813
TOTAL	1,024,369	734,615

6) INVESTMENTS, NET

a) Investments are classified as follows:

	DOMESTIC		INTERNATIONAL		TOTAL	
I) AVAILABLE- FOR- SALE, NET	2016	2015	2016	2015	2016	2015
Fixed rate securities	-	13,885	-	-	-	13,885

b) Investments reclassification

Management identified certain AFS investments, for which at July 1, 2008, it had a clear intention to hold the instruments for the foreseeable future rather than to exit or trade in the short term. As a result these instruments were reclassified at that date from AFS to other investments held at amortised cost at fair value. Had the reclassification not been made, other reserves would have included unrealised fair value income amounting to SAR 8.59 million (2015: SAR 8.66 million) and loss of SAR 1.15 Million (2015: SAR 1.99 Million) recognised in the statement of income relating to such reclassified investments.

The following table shows carrying values and fair values of the reclassified investments:

	2016		2015	
	CARRYING VALUE	FAIR VALUE	CARRYING VALUE	FAIR VALUE
Available for sale securities reclassified to other investments held at amortised cost	65,725	64,860	68,255	68,297

c) The composition of investments is as follows:

	2016			2015		
	QUOTED	UNQUOTED	TOTAL	QUOTED	UNQUOTED	TOTAL
Fixed rate securities	344,335	12,936,413	13,280,748	326,508	18,569,076	18,895,584
Floating rate securities	756,511	6,927,602	7,684,113	840,433	1,037,425	1,877,858
Equities	138,972	3,438	142,410	338,850	3,438	342,288
Mutual funds	151,227	-	151,227	147,566	-	147,566

c) Credit quality of loans and advances

i) Loans and advances neither past due nor impaired

The Group has categorised the loans and advances portfolio that is neither past due nor impaired into three sub categories according to its internal rating system, i.e. strong, satisfactory and watch.

Loans and advances under the strong category are performing, have sound fundamental characteristics and include those that exhibit characteristics that are expected to allow them to weather adverse business, financial or economic conditions without materially impairing the obligor's ability to meet its commitments.

Loans and advances under the satisfactory category are loans where borrowers are capable to meet their financial obligations and are expected to remain able to do so in the medium term. However, unexpected adverse business, financial or economic conditions could impair the obligor's ability to meet its commitments in future.

The watch category includes loans and advances that are performing, current and up-to date in terms of principal and special commission payments. However, the obligors require close management attention as their ability to meet their financial commitments has deteriorated and currently exhibits vulnerability to default or non-payment. Such borrowers may be dependent upon more favorable business, financial, and economic conditions to meet their financial commitments in full and on time..

Loans and advances, include Islamic products amounting to SAR 50 billion (2015: SAR 42 billion)

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended December 31, 2016
Amounts in SAR'000

e) Collateral

The Group, in the ordinary course of its lending activities holds collaterals to mitigate the associated credit risk. These mostly consists of time, demand and other cash deposits, financial guarantees, local and international equities, real estate and other fixed assets. Collaterals are mainly held against commercial and consumer loans and are managed against relevant exposures at their net realisable value. Total collateral fair value at December 31, 2016 amounted to SAR 30.68 billion (2015: SAR 30.36 billion).

8) INVESTMENT IN AN ASSOCIATE

	2016	2015
Balance at beginning of the year	12,567	12,793
Additional investment made during the year	20,000	-
Share in earning / (loss) of an associate	3,130	(226)
BALANCE AT END OF THE YEAR	35,697	12,567

Investment in an associate represents a 20% (2015: 20%) shareholding in Wataniya Insurance Company (WIC) formed in the Kingdom of Saudi Arabia, pursuant to Royal Decree No. M/53 dated Shawwal 21, 1430H (corresponding to October 10, 2009). During the year one-for-one right issue was made by WIC which was fully subscribed by the Bank and resulted in total cost of the investments to reach SAR 40 million.

Accounts receivables, net	727,233	833,842
Others	119,425	67,312
TOTAL	846,658	901,154

As at 31 December 2016, other assets of the Group included an amount of SAR 437.15 million (2015: SAR 437.49 million). This amount was originally disbursed to a third party who defaulted on payment and the Management expects to recover this balance from a related party. The Group has reached a settlement agreement with the related party for recovery of this amount. The Group has maintained an impairment allowance of SAR 149.91 million as at December 31, 2016 (2015: SAR 149.91 million) against the outstanding balance due to uncertainty around the timing of recoverability of this balance.

11) DERIVATIVES

In the ordinary course of business, the Group utilises the following derivative financial instruments for both trading and hedging purposes:

a) Swaps

Swaps are commitments to exchange one set of cash flows for another. For commission rate swaps, counterparties generally exchange fixed and floating rate commission payments in a single currency without exchanging principal. For cross-currency commission rate swaps, principal and fixed and floating commission payments are exchanged in different currencies.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended December 31, 2016

b) Forwards and futures

Forwards and futures are contractual agreements to either buy or sell a specified currency, commodity or financial instrument at a specified price and date in the future. Forwards are customised contracts transacted in the over-the-counter market. Foreign currency and commission rate futures are transacted in standardised amounts on regulated exchanges and changes in futures contract values are settled daily.

c) Forward-rate agreements

Forward-rate agreements are individually negotiated commission rate contracts that call for a cash settlement of the difference between a contracted commission rate and the market rate on a specified future date on a notional principal for an agreed period of time.

d) Options

Options are contractual agreements under which the seller (writer) grants the purchaser (holder) the right, but not the obligation, to either buy or sell at a fixed future date or at any time during a specified period a specified amount of a currency, commodity or financial instrument at a pre-determined price.

Derivatives held for trading purposes

Most of the Group's derivative trading activities relate to sales, positioning and arbitrage. Sales activities involve offering products to customers and banks in order to inter alia, enable them to transfer, modify or reduce current and future risks. Positioning involves managing market risk positions with the expectation of profiting from favourable movements in prices, rates or indices. Arbitrage involves identifying price differentials between markets or products with the expectation of profiting.

Derivatives held for hedging purposes

The Group has adopted a comprehensive process for the measurement and management of risk. Part of the risk management process involves managing the Group's exposure to fluctuations in foreign exchange and special commission rates to acceptable levels as determined by the Board of Directors and management.

The Board of Directors has established risk appetite for market risks including currency and special commission rate risk. Management, through the bank's Asset and Liability Committee, have established a framework of limits to ensure that risk is maintained within the appetite set by the Board. As part of its asset and liability management process, positions are monitored regularly and the Group uses derivatives for hedging purposes in order to adjust its exposure to currency and special commission rate risks. This is generally achieved by hedging specific transactions

The Group uses commission rate swaps to hedge against the commission rate risk arising from specifically identified fixed commission rate exposures. The Group also uses commission rate swaps to hedge against the cash flow risk arising on certain floating-rate exposures. In all such cases, the hedging relationship and objective, including details of the hedged items and hedging instrument, are formally documented and the transactions are accounted for as fair value or cash flow hedges.

The tables below summarises the positive and negative fair values and notional amounts of derivative financial instruments, analysed by the term to maturity and monthly average. The notional amounts, which provide an indication of the volumes of transactions outstanding at year-end, do not necessarily reflect the amounts of future cash flows involved. These notional amounts are, therefore, not indicative of the Group's exposure to market risk and credit risk. The latter is generally limited to the positive fair value of derivatives.

14) SUBORDINATED DEBT

Subordinated debt represents the following debt securities:

Issued on December 12, 2013:

The Group issued SAR 2,500 million unsecured subordinated Tier II Sukuk which is due in 2023. The Group has the option, subject to the prior written approval of SAMA, to redeem these Sukuk at their redemption amount in December 2018 or in the event of certain changes affecting the taxation and regulatory capital treatment of these Sukuk. The commission rate paid on the above averaged 6 months SIBOR plus 155 basis points (2015: 6 months SIBOR plus 155 basis points).

Issued on November 26, 2012:

The Group issued SAR 1,400 million unsecured subordinated Tier II Sukuk which is due in 2019. The Group has the option, subject to the prior written approval of SAMA, to redeem these Sukuk at their redemption amount in November 2017 or in the event of certain changes affecting the taxation and regulatory capital treatment of these Sukuk. The commission rate paid on the above averaged 6 months SIBOR plus 115 basis points (2015: 6 months SIBOR plus 115 basis point).

The Group has not defaulted on any principal or commission repayments and there has been no breaches with regard to any of these liabilities during 2016 or 2015.

15) OTHER LIABILITIES

	2016	2015
Accrued expenses and accounts payable	779,391	1,110,131

16) SHARE CAPITAL

The authorised, issued and fully paid share capital consists of 1,143.07 million shares of SAR 10 each (2015: 571.54 million shares of SAR 10 each).

The ownership of the Bank's share capital is as follows:

	PERCENTAGE	2016	2015
Saudi shareholders	60%	6,858,432	3,429,216
ABN AMRO Bank N.V	40%	4,572,288	2,286,144
TOTAL	100%	11,430,720	5,715,360

The shareholders of the Bank approved a bonus issue of one-for-one share in their Extra Ordinary General Assembly meeting held on May 2, 2016. As a result 571.54 million shares (2015: 95.26 million shares, one share for every five shares held) of SR 10 each, were issued by capitalizing statutory reserve and retained earnings.

During the year the Group also paid a cash dividend of SAR 297.20 million (2015: SAR 619.16 million). A net dividend of SAR 0.25 per share (2015: SAR 1 per share) and SAR 0.22 per share (2015: SAR 0.92 per share) was paid to Saudi shareholders and foreign shareholder, respectively.

17) STATUTORY RESERVE

In accordance with Saudi Arabian Banking Control Law and the By-Laws of the Bank, a minimum of 25% of the annual net income is required to be transferred to a statutory reserve until this reserve equals the paid up share capital of the Bank. Accordingly, SAR 266.18 million (2015: SAR 505.61 million) has been transferred from retained earnings to the statutory reserve.

18) OTHER RESERVES

	2016	2015
Balance at beginning of the year	(37,691)	3,564
Net changes in fair value	(4,178)	(28,192)
Net amounts transferred to consolidated income statement	83,016	(13,063)
BALANCE AT END OF THE YEAR	41,147	(37,691)

19) COMMITMENTS AND CONTINGENCIES

a) Legal proceedings

As at December 31, 2016 and 2015, there were certain legal proceedings outstanding against the Group that arose in the normal course of business. No provision was raised during the year (2015: Nil) as professional legal advice indicates that it is not probable that any further losses will arise with respect to these proceedings.

b) Capital commitments

The Group has capital commitments of SAR 96.7 million (2015: SAR 93.1 million) in respect of leasehold improvements and computer hardware and software purchases.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended December 31, 2016
Amounts in SAR'000

c) Credit related commitments and contingencies

The primary purpose of these instruments is to ensure that funds are available to customers as required.

Letters of guarantees and stand-by letters of credit, which represent irrevocable assurances that the Group will make payments in the event that a customer cannot meet its obligations to third parties, carry the same credit risk as loans and advances. Cash requirements under guarantees and standby letters of credit are considerably less than the amount of the commitment because the Group does not generally expect the third party to draw the full funds under the agreement.

Documentary letters of credit are written undertakings by the Group on behalf of a customer authorising a third party to draw drafts on the Group up to a stipulated amount under specific terms and conditions and are generally collateralised by the underlying shipments of goods to which they relate and therefore, have significantly less risk.

Acceptances comprise undertakings by the Group to pay bills of exchange drawn on customers. The Group expects most acceptances to be presented before being reimbursed by the customers.

Irrevocable commitments to extend credit represent the unused portion of authorisations to extend credit, principally in the form of loans and advances, guarantees and letters of credit. With respect to credit risk on commitments to extend credit, the Group is potentially exposed to a loss of an amount equal to the total unused commitments. However, the likely amount of loss, which cannot readily be quantified, is expected to be considerably less than the total unused commitment as most commitments to extend credit are contingent upon customers maintaining specific credit standards. The total outstanding commitments to extend credit do not necessarily represent future cash requirements as many of the commitments could expire or terminate without being funded.

i) The contractual maturities of the Group's commitments and contingencies are as follows:

2016	WITHIN 3 MONTHS	3 TO 12 MONTHS	1 TO 5 YEARS	OVER 5 YEARS	TOTAL
Letters of guarantee	1,647,581	9,384,876	8,371,940	174,590	19,578,987
Letters of credit	2,199,274	2,449,522	313,422	-	4,962,218
Acceptances	1,324,996	874,903	31,143	-	2,231,042
Irrevocable commitments to extend credit	-	-	176,934	1,952,475	2,129,409
TOTAL	5,171,851	12,709,301	8,893,439	2,127,065	28,901,656

2015	WITHIN 3 MONTHS	3 TO 12 MONTHS	1 TO 5 YEARS	OVER 5 YEARS	TOTAL
Letters of guarantee	3,049,649	10,779,773	8,632,804	255,069	22,717,295
Letters of credit	2,075,680	3,090,345	179,630	-	5,345,655
Acceptances	3,311,798	20,774	988	-	3,333,560
Irrevocable commitments to extend credit	-	26,786	544,397	2,299,589	2,870,772
TOTAL	8,437,127	13,917,678	9,357,819	2,554,658	34,267,282

Outstanding and unused portion of commitments that can be revoked unilaterally at any time by the Group amounts to SAR 38.06 billion (2015: SAR 36.85 billion).

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended December 31, 2016
Amounts in SAR'000

ii) Commitments and contingencies by counterparty are as follows:

	2016	2015
Government and quasi-government	86,636	191,392
Corporate	24,261,880	30,758,558
Banks and other financial institutions	3,168,426	3,081,726

Other employee related expenses accrued during the year		36,150			
Total salaries and employee related expenses		676,258			

Senior executives requiring SAMA's no objection:

This comprises senior management having responsibility and authority for formulating strategies and directing and controlling the activities of the Group. This covers the Managing Director (MD) and certain other employees directly reporting to the MD.

Employees engaged in control and risk management functions:

This refers to employees working in divisions that are not involved in risk taking activities but are engaged in review and control functions, for example Risk Management, Compliance, Internal Audit, Operations and Finance. These functions are fully independent from the risk taking units.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended December 31, 2016
Amounts in SAR'000

Employees engaged in risk taking activities:

This comprises staff within business lines (Corporate Banking, Personal Banking, Treasury and Alawwal Invest), who are responsible for executing and implementing the business strategy on behalf of the Group, for example staff involved in recommending credit limits, pricing of loans, undertaking and executing business proposals, treasury dealing activities, investment management and brokerage services.

Other employees:

This includes all other employees of the Group, excluding those already mentioned above.

Group Compensation policy:

The purpose of the policy is to establish and apply compensation policies and processes which support delivery of business strategy, reinforce the desired organisational culture, reflect prudent risk management and comply with SAMA Regulations.

The Group's compensation policy is aimed at rewarding both risk-adjusted performance and appropriate behaviour in line with the Group's core values. To this end, performance measurements are risk adjusted and reviewed by the independent Risk Management function. In addition, the Compensation Policy is reviewed by Risk Management to ensure rewards are adjusted for the level of risk incurred.

The Board of Directors are responsible for ensuring the effective implementation of the compensation policy. The Board is advised by the Nominations and Remuneration Committee (the "Committee"), which comprises of six Non Executive Directors out of which two are independent. The Committee receives reports and recommendations from Executive Management supported by Human Resources. The Committee reviews and approves all compensation decisions relating to all employees.

Heads of business units and control functions being monitored and/or controlled by Internal Audit, Compliance, Risk Management and Credit Risk will not have any input to compensation decisions of

employees in the control functions. Compensation recommendations are determined based on a clear understanding of the intended total reward package and decisions are taken considering the balance between external competitiveness and affordability together with focusing attention on building motivational and performance related compensation arrangements.

25) BASIC AND DILUTED EARNINGS PER SHARE (EPS)

Basic and diluted earnings per share for the year 2016 and 2015 are calculated by dividing the net income for the year attributable to the equity shareholders by 1,143.07 million shares to give a retrospective effect of change in the number of shares increased as a result of one for one bonus shares issued during the year.

26) DIVIDENDS, ZAKAT AND INCOME TAX

The Board of Directors has proposed not to distribute any dividends for the current year (2015: SAR 297.20 million). Zakat and income tax liabilities for Saudi and non-Saudi shareholder are as follow:

a) Saudi shareholders:

Zakat attributable to Saudi Shareholders for the year is estimated to be SAR 18 million (2015: SAR 35 million), which will be deducted from their share of future dividends.

b) Non-Saudi shareholders:

Income tax payable on the current year's share of income of foreign shareholders is estimated to be SAR 99 million (2015: SAR 164 million) which will be deducted from future years' dividends.

c) Status of Zakat and Income Tax assessments

The Bank has filed its Zakat and income tax returns for the financial years upto and including the year 2015 with the General Authority of Zakat and Tax ("GAZT"). The Bank has received Zakat and income tax assessments for the years 2005 to 2013 raising additional demands aggregating to SAR 281.6 million. This additional exposure is mainly relating to Zakat arising on account of disallowances of certain long term investments and addition of long term financing

to Zakat base by the GAZT. The basis for this additional liability is being contested by the Bank in conjunction with all the other banks in Saudi Arabia. The Bank has also formally contested these assessments and is awaiting a response from GAZT. Management is confident of a favourable outcome on the aforementioned appeals and have therefore not made any provisions in respect of the above.

Assessments for the years 2014 and 2015 are yet to be raised. However, in line with the assessments finalized by the GAZT for the years 2005 to 2013, if long-term investments are disallowed and long-term financing is added to the Zakat base, this would result in an additional Zakat exposure which remains an industry wide issue and disclosure of which might affect the Bank's position in this matter.

27) CASH AND CASH EQUIVALENTS

Cash and cash equivalents included in the consolidated statement of cash flows comprise the following:

	2016	2015
Cash and balances with SAMA (note 4)	7,487,379	7,637,869
Statutory deposit	(4,427,484)	(4,476,152)
	3,059,895	3,161,717
Due from banks and other financial institutions maturing within three months or less from the acquisition date	879,369	734,615
TOTAL	3,939,264	3,896,332

28) OPERATING SEGMENTS

Operating segments are identified on the basis of internal reports about components of the Group that are regularly reviewed by the senior management responsible for operational decision making in the Bank in order to allocate resources to the segments and to assess performance. Transactions between operating segments are on normal commercial terms and conditions. Funds are ordinarily reallocated between operating segments, resulting in funding cost transfers. Special commission is charged to operating segments based on a pool rate, which approximates the marginal cost of

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended December 31, 2016
Amounts in SAR'000

funds. The revenue from external parties reported to the senior management, is measured in a manner consistent with that in the consolidated income statement. There have been no changes in the measurement basis for the segment profit or loss since December 31, 2015. Following are the reportable operating segments of the Group:

Corporate banking

The corporate banking segment offers a range of products and services to corporate and institutional customers. It accepts customer deposits and provides financing, including term loans, overdrafts, syndicated loans and trade finance services. Services provided to customers include internet banking, global transaction services and a centralised service that manages all customer transfers, electronic or otherwise.

Personal banking

The personal banking group operates through a national network of branches and ATMs supported by a 24-hour phone banking centre. This segment accepts customers' deposits in various savings and deposit accounts and provides retail banking products and services, including consumer loans, overdrafts and credit cards to individuals and small-to-medium-sized enterprises.

Investment banking and investment services

The investment banking and investment services segment offers security dealing, managing, arranging, advising and maintaining custody services in relation to securities.

Central treasury and ALCO

Treasury transacts mainly in money market, foreign exchange, special commission rate and other derivatives for corporate and institutional customers as well as for the Group's own benefit. It is also responsible for managing the Group's funding and centralized risk management and investment portfolio. ALCO include the group-wide assets and liabilities other than the business and treasury's core activities maintaining Group-wide liquidity and managing its consolidated financial position. It also includes the net interdepartmental revenues / charges on Funds Transfer Pricing as approved by ALCO and unallocated income and expenses relating to Head Office and other departments.

a) The following is an analysis of the Group's assets, revenues and results by operating segments for the years ended December 31, 2016 and 2015.

2015	PERSONAL BANKING	INVESTMENTS BANKING AND INVESTMENTS SERVICES	CENTRAL TREASURY & ALCO	TOTAL
Non derivative financial assets	59,069,226	17,342,964	22,556,777	98,968,967
Commitments and contingencies	16,198,324	-	-	16,198,324
Derivatives	710,186	-	1,035,666	1,745,852

Credit exposure comprises the carrying value of non derivative financial assets, excluding cash and balances with SAMA and property and equipment. The credit equivalent value of commitments, contingencies and derivatives are also included in credit exposure.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended December 31, 2016
Amounts in SAR'000

29) CREDIT RISK

Credit risk is the risk that one party to a financial instrument will fail to discharge an obligation and cause the other party to incur a financial loss. Credit exposures arise principally in lending activities that lead to loans and advances and investment activities. There is also a credit risk on credit related commitments, contingencies and derivatives. The Group controls credit risk by monitoring credit exposures, limiting transactions with specific counterparties and continually assessing the creditworthiness of counterparties.

In addition to monitoring credit limits, the Group manages the credit exposure relating to its trading activities by entering into master netting agreements and collateral arrangements with counterparties in appropriate circumstances, and by limiting the duration of exposure. In certain cases management may also close out transactions or assign them to other counterparties to mitigate credit risk. The Group's credit risk on derivatives represents the potential cost to replace the derivative contracts if counterparties fail to fulfill their obligation. To control the level of credit risk taken, management assesses counterparties using the same techniques as for its lending activities. Concentrations of credit risk arise when a number of counterparties are engaged in similar business activities or activities in the same geographic region, or have similar economic features that would cause their ability to meet contractual obligations to be similarly affected by changes in economic, political or other conditions. Concentrations of credit risk indicate the relative sensitivity of the Group's performance to developments affecting a particular industry or geographical location.

Management seeks to manage concentration of credit risk within Board approved Risk Appetite and in line with SAMA guidelines, through a system of limits and strategies designed to ensure appropriate diversification of lending activities and to prevent undue concentration of risks with individuals or groups of customers in specific locations or businesses. The Group also takes security when appropriate or seeks additional collateral from the counterparty as soon as impairment indicators are noticed. Management monitors on a regular basis the market value of collateral and requests additional collateral in accordance with the underlying agreement, if required. In addition it also specifically monitors the market value of collateral during its review of the adequacy of the allowances for impairment losses. Management regularly reviews its risk management policies and systems to reflect changes in markets products and emerging best practice.

The debt securities included in the investment portfolio are mainly sovereign risk. Analysis of investments by class of issuer is provided in note 6. For details of the composition of loans and advances refer to note 7. Information on credit risk relating to derivative instruments and commitments and contingencies are provided in notes 11 and 19, respectively . Information on the Group's maximum credit exposure by operating segment is provided in note 28.

The Group's maximum exposure to credit risk computed as per SAMA guidelines as at December 31, 2016 and 2015, without taking into account any collateral held or credit enhancements attached is reflected below:

	2016	2015
Due from banks and other financial institutions	1,024,369	734,615
Investments, net	21,116,088	20,921,008
Loans and advances, net	72,743,097	76,412,190
Other assets, net	846,658	901,154
Derivatives	1,627,474	1,745,852
Credit related commitments and contingencies	12,531,882	16,198,324
TOTAL	109,889,568	116,913,143

The Group uses a credit classification system as a tool to assist in managing the quality of credit risk within the lending portfolio. In addition to the three categories mentioned in note 7, management maintains further classification grades that differentiates between performing and impaired portfolios and allocates portfolio and specific allowances respectively. Management determines each individual borrower's grade based on specific objectives and criteria such as activity, cash flows, capital structure, security, quality of management and borrower's character. A further quality classification is performed over existing borrowers and the results of this exercise are validated by the independent risk management unit.

Credit equivalent amounts reflect the amounts that result from translating the Group's contingent liabilities and commitments and derivatives into the risk equivalents using credit conversion factors prescribed by SAMA. The credit conversion factor is meant to capture the potential credit risk related to the exercise of that commitment. Impaired loans and advances and allowances for credit losses are all within the Kingdom of Saudi Arabia.

31) MARKET RISK

Market risk is the risk that the fair value or future cash flows of financial instruments will fluctuate due to changes in market variables such as special commission rates, foreign exchange rates, and equity prices. Management classifies exposures to market risk into either trading, non-trading or banking book.

The market risk for the trading book is managed and monitored using a Value at Risk (VaR) methodology. Market risk for the non-trading book is managed and monitored using a combination of VaR, stress testing and sensitivity analysis.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended December 31, 2016
Amounts in SAR'000

a) MARKET RISK - TRADING BOOK

The Board of Directors has set limits for the acceptable level of risk in managing the trading book. In order to manage market risk in the trading book, Management applies a VaR methodology daily to assess the market risk positions held and also to estimate the potential economic loss based on a set of assumptions and changes in market conditions.

A VaR methodology estimates the potential negative change in the market value of a portfolio at a given confidence level and over a specified time horizon. The Group uses simulation models to assess the possible changes in the market value of the trading book based on historical data. VaR models are usually designed to measure the market risk in a normal market environment and therefore the use of VaR has limitations because it is based on historical correlations and volatilities in market prices and assumes that the future movements will follow a statistical distribution.

VaR that management uses is an estimate, using a confidence level of 99% of the potential loss that is not expected to be exceeded if the current market positions were to be held unchanged for one day. The use of 99% confidence level depicts that within a one-day horizon, losses exceeding VaR figure should occur, on average, not more than once every hundred days. The VaR represents the risk of portfolios at the close of a business day, and it does not account for any losses that may occur beyond the defined confidence interval. The actual trading results may differ from the VaR calculations and, in particular, the calculation does not provide a meaningful indication of profits and losses in stressed market conditions.

To overcome the VaR limitations mentioned above, management maintains a framework of non-modeled limits that show potential loss for a given change in a market factor and makes no assumption about the behaviour of market factors. Furthermore, management employs stop loss limits on market risk positions and carries out stress tests of its portfolio to simulate conditions outside normal confidence intervals. The potential losses occurring under stress test conditions are reported regularly to the Asset and Liability Committee (ALCO) for review.

The Group's VaR related information for the year ended December 31, 2016 and 2015 is as provided below.

2016 (VaR)	FOREIGN EXCHANGE RATE RISK	SPECIAL COMMISSION RATE RISK	FOREIGN EXCHANGE FORWARDS	OVERALL RISK
As at December 31	53	132	51	236
Average for the year	387	512	80	979

2015 (VaR)	FOREIGN EXCHANGE RATE RISK	SPECIAL COMMISSION RATE RISK	FOREIGN EXCHANGE FORWARDS	OVERALL RISK
As at December 31	35	341	133	509
Average for the year	157	276	56	489

b) MARKET RISK - NON-TRADING OR BANKING BOOK

Market risk on non-trading or banking positions mainly arises from special commission rate, foreign currency exposures and equity price changes.

i) SPECIAL COMMISSION RATE RISK

Special commission rate risk arises from the possibility that changes in special commission rates will affect either the fair values or the future cash flows of the financial instruments. The Board of Directors has established special commission rate gap limits for stipulated periods. Management monitors positions daily and uses hedging strategies to ensure maintenance of positions within established gap limits.

The following table depicts the sensitivity to a reasonable possible change in special commission rates, with other variables held constant, on the Group's consolidated income statement or equity. The sensitivity of the income is the effect of the assumed changes in special commission rates on the net special commission income for one year, based on the floating rate non-trading financial assets and financial liabilities held at year end including the effect of hedging instruments. The sensitivity of equity is calculated by revaluing the fixed rate available for sale financial assets, including the effect of any associated hedges at year end for the effect of assumed changes in special commission rates. The sensitivity of equity is analyzed by maturity of the asset or swap.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

The exposure to the effect of various risks associated with fluctuations in the prevailing levels of market special commission rates on the Group's financial position and cash flows is managed.

The Board of Directors sets limits on the level of special commission rate risk to which the Group may be exposed. These limits are monitored by the Group's Asset and Liability Committee, Risk Management and Treasury departments. The Group is exposed to special commission rate risk as a result of mismatches or gaps in the amounts of assets and liabilities and other financial instruments that mature or re-price in a given period. This risk is managed by matching the re-pricing of financial assets and liabilities through risk management strategies. The table below summarises the Group's exposure to special commission rate risks. Included in the table are the Group's financial assets and liabilities at carrying amounts, categorised by the earlier of the contractual re-pricing or the maturity dates.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended December 31, 2016
Amounts in SAR'000

Special commission rate sensitivity on derivative financial instruments represents the net notional amounts that are used to manage special commission rate risk. The effective yield of a monetary financial instrument is the yield that the Group earns from its clients taking into consideration the contractual special commission rate.

ii) CURRENCY RISK

Currency risk represents the risk of change in the value of financial instruments due to changes in foreign exchange rates. The Board of Directors have set risk appetite for market risks including currency risk and the Group's Asset and Liability Committee have set a framework of limits on positions by currency and in aggregate, which are monitored daily. Hedging strategies are also used to ensure that positions are maintained within these limits. The table below shows the currencies to which the Group has a significant exposure as at year end on its non-trading monetary assets and liabilities and forecasted cash flows. The analysis calculates the effect on the consolidated income statement (due to the fair value of the currency sensitive non-trading monetary assets and liabilities) of a potential movement in the foreign currency against SAR, with all other variables held constant. A positive effect shows a potential increase in consolidated income statement or equity, whereas a negative effect shows a potential net reduction in consolidated income statement or equity.

2016		
CURRENCY EXPOSURE	CHANGE IN CURRENCY RATE (%)	EFFECT ON NET INCOME
USD	5	2,265
	(5)	(2,265)
AED	5	64
	(5)	(64)

JPY	5	69
	(5)	(69)
Others	5	137
	(5)	(137)

At the end of the year, the Group had the following significant net exposures denominated in foreign currencies:

	LONG / (SHORT) SAR ' 000	
	2016	2015
US Dollar	45,297	(48,527)
UAE Dirham	1,270	84,888
Swiss Franc	99	(3)
Euro	113	(123)
Pound Sterling	525	(109)
Japanese Yen	1,382	(54)
Others	2,740	2,540

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended December 31, 2016
Amounts in SAR'000

iii) EQUITY PRICE RISK

Equity price risk refers to the risk of a decrease in the fair values of equities in the Group's non-trading investment portfolio as a result of reasonable possible changes in levels of equity indices and the value of individual stocks. The effect on the Group's equity investments held as available for sale due to reasonable possible change in equity indices, with all other variables held constant is as follows:

MARKET INDICIES - TADAWUL	2016		2015	
	CHANGE IN EQUITY PRICES %	EFFECT IN SAR '000	CHANGE IN EQUITY PRICES %	EFFECT IN SAR '000
	+ 5	6,949	+ 5	16,943
	- 5	(6,949)	- 5	(16,943)
	+ 10	13,897	+ 10	33,885
	- 10	(13,897)	- 10	(33,885)

32) LIQUIDITY RISK

Liquidity risk is the risk that the Group will encounter difficulty in meeting obligations associated with its financial liabilities that are settled by delivering cash or other financial assets. Liquidity risk can be caused by market disruptions or credit downgrades, which may cause certain sources of funding to dry up at short notice.

To mitigate this risk, management has diversified funding sources and assets are managed considering liquidity positions to maintain a healthy balance of cash and cash equivalents and readily marketable securities.

i) Maturity profile of assets and liabilities

The tables below summarise the maturity profile of the Group's assets and liabilities. The contractual maturities of assets and liabilities have been determined on the basis of the remaining period to contractual maturity date as at year end and do not take into account the effective maturities as indicated by the Group's deposit retention history. Management monitors the maturity profile to ensure that adequate liquidity is maintained. The daily liquidity position is monitored and regular liquidity stress testing is conducted under a variety of scenarios covering both normal and more severe market conditions. All liquidity policies and procedures are subject to review and approval by ALCO. Daily reports cover the liquidity position of both the Bank and other operating subsidiaries. A summary report, including any exceptions and remedial action taken, is submitted regularly to ALCO and the Board and its Committees also receive regular reporting on key liquidity risk indicators.

In accordance with the Banking Control Law and the regulations issued by SAMA, the Bank maintains a statutory deposit with SAMA equal to 7 % (2015: 7%) of total demand deposits and 4% (2015: 4 %) of savings and time deposits. In addition to the statutory deposit, the Bank also maintains liquid reserves of no less than 20% of its deposits liabilities, in the form of cash, Saudi Government Development Bonds or assets which can be converted into cash within a period not exceeding 30 days or the Bank may raise additional funds through repo facilities available with SAMA against securities issued by the Saudi Government up to 75% of the nominal value of bonds held.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended December 31, 2016
Amounts in SAR'000

The cumulative maturity of commitments and contingencies and derivatives are given in note 19 (c) and note 11 of the consolidated financial statements respectively.

iii) Analysis of financial liabilities by remaining contractual maturities

The table below summarises the maturity profile of the Group's financial liabilities at year end based on contractual undiscounted repayment obligations. As special commission payments upto contractual maturity are included in the table, totals do not match with the consolidated statement of financial position. The contractual maturities of liabilities have been determined based on the remaining period at year end to the contractual maturity date and do not take into account the effective expected maturities. The Group expects that many customers will not request repayment on the earliest date the Group could be required to pay and therefore the table does not reflect the expected cash flows indicated by the Group's deposit retention history.

2016	NO FIXED MATURITY	WITHIN 3 MONTHS	3 TO 12 MONTHS	1 TO 5 YEARS	OVER 5 YEARS	TOTAL

33) FAIR VALUES OF FINANCIAL INSTRUMENTS

Determination of fair value and the fair value hierarchy

Management uses the following hierarchy for determining and disclosing the fair value of financial instruments:

Level 1: Quoted prices in active markets for the same instrument (i.e., without modification or repacking):

Level 2: Quoted prices in active markets for similar assets and liabilities or other valuation techniques for which all significant inputs are based on observable market data; and

Level 3: valuation techniques for which significant inputs are not based on observable market data.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended December 31, 2016

The fair values of financial instruments included in the consolidated statement of financial position, except for those held to maturity, other investments held at amortised cost and loans and advances that are carried at amortised cost, are not significantly different from the carrying values included in the consolidated financial statements. The estimated fair values of other investments held at amortised cost and held-to-maturity investments are based on quoted market prices, when available, or pricing models in the case of certain fixed rate bonds. The fair value of special commission-bearing customers' deposits are not significantly different from their book values since the current market special commission rates for similar financial assets are not significantly different from the contracted rates.

The fair values of cash and balances with SAMA, due from banks and other financial institutions and due to banks and other financial institutions, other assets and other liabilities are not significantly different from the carrying values since the underlying amounts for these categories are for shorter durations which indicates that their booking rates are not significantly different from the current market rates. The fair value of subordinated debt approximates carrying value since this is a floating rate liability with special commission rates re-priced every six months. The value obtained from a valuation model may differ from the transaction price of a financial instrument on transaction date. The difference between the transaction price and the model value is commonly referred to as 'day one profit and loss. It is either amortised over the life of the transaction, deferred until the instrument's fair value can be determined using market observable data or realised through disposal. Subsequent changes in fair value are recognised immediately in the consolidated income statement without reversal of deferred day one profits and losses.

The objective of valuation techniques is to arrive at a fair value measurement that reflects the price that would be received to sell the asset or paid to transfer the liability in an orderly transaction between market participants at the measurement date. The Group uses widely recognized valuation models for determining the fair value of common and simpler financial instruments. Observable prices or model inputs are usually available in the market for listed debt and equity securities, exchange-traded derivatives and simple over-the-counter derivatives such as interest rate swaps. Availability of observable market prices and model inputs reduces the need for management judgment and estimation and also reduces the uncertainty associated with determining fair values. Availability of observable market prices and inputs varies depending on the products and markets and is prone to changes based on specific events and general conditions in the financial markets.

The following table shows the valuation techniques used in measuring fair values at December 31, as well as the significant unobservable inputs used.

TYPE	VALUATION TECHNIQUE	SIGNIFICANT UNOBSERVABLE INPUTS	INTER- RELATIONSHIP BETWEEN SIGNIFICANT UNOBSERVABLE INPUTS AND FAIR VALUE MEASUREMENT
Available for sale investments	Valuation techniques include net present value and discounted cash flow models, comparison with similar instruments for which market observable prices exist. Assumptions and inputs used in valuation techniques include risk-free and benchmark interest rates, credit spreads and other premium used in estimating discount rates, bond and equity prices and foreign currency exchange rates.	None	Not applicable
Other investments held at amortised cost	Valuation techniques include net present value and discounted cash flow models, comparison with similar instruments for which market observable prices exist. Assumptions and inputs used in valuation techniques include risk-free and benchmark interest rates, credit spreads and other premium used in estimating discount rates, bond and equity prices and foreign currency exchange rates.	None	Not applicable
Loans and advances	Fair valued using discounted cash flow techniques that use observable market data inputs for yield curves and credit spread	Credit spreads	The wider the credit spread the higher the difference between the carrying values and fair values

34) RELATED PARTY TRANSACTIONS

In the ordinary course of its activities, the Group transacts business with related parties. The related party transactions are performed on an arm's length basis. Banking transactions with related parties are governed by limits set by the Banking Control Law and regulations issued by SAMA.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended December 31, 2016
Amounts in SAR'000

The balances at reporting date, unless reported elsewhere in the financial statements, resulting from such transactions are as follows:

ABN AMRO BANK N.V	2016	2015
Due from banks and other financial institutions	243,509	13,744
Due to banks and other financial institutions	3,129	28,307
Derivatives at fair value, net	(1,710)	(1,976)
Commitments and contingencies	81,256	160,677
ASSOCIATES & OTHER MAJOR SHAREHOLDERS AND THEIR AFFILIATE ENTITIES WITH SIGNIFICANT INFLUENCE:		
Loans and advances	749,019	711,330
Derivatives at fair value, net	9,972	11,205

Directors' remuneration and other related expenses	4,792	3,708
Compensation paid to key management personnel	48,641	47,829
End of service benefits paid to key management personnel	3,949	-

Key management personnel are those persons having responsibility and authority for formulating strategies and directing and controlling the activities of the Group.

35) CAPITAL ADEQUACY

The Group's objectives when managing capital are to comply with the capital requirements set by SAMA and to safeguard the Group's ability to continue as a going concern by maintaining a strong capital base.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended December 31, 2016
Amounts in SAR'000

Capital adequacy and the use of regulatory capital are monitored daily by management. SAMA requires holding the minimum level of regulatory capital and maintaining a ratio of total regulatory capital to the Risk-Weighted Assets (RWA) at or above the agreed minimum of 8%.

Management monitors the adequacy of its capital using ratios established by SAMA. These ratios expressed as a percentage, measure capital adequacy by comparing the Group's eligible capital with its consolidated statement of financial position assets, commitments and contingencies and notional amount of derivatives at amounts weighted to reflect their relative risk. During the year, the Group has fully complied with regulatory capital requirement.

The components of RWA, capital and ratios are as follows:

	2016	2015
Credit Risk RWA	90,214,396	96,325,986
Operational Risk RWA	5,498,588	4,710,338
Market Risk RWA	210,754	278,356
TOTAL PILLAR-I RWA	95,923,738	101,314,680
Tier I Capital	12,862,794	11,729,995
Tier II Capital	4,220,937	4,058,774
TOTAL TIER I & II CAPITAL	17,083,731	15,788,769
Capital Adequacy Ratio %		
Tier I	13.41	11.58
Tier I + Tier II	17.81	15.58

36) INVESTMENT MANAGEMENT AND BROKERAGE SERVICES

The Group offers investment management services to its customers that include the management of investment funds and discretionary portfolios with total assets of SAR 3.29 billion (2015: SAR 3.59 billion), in consultation with professional investment advisors. This includes funds managed under Shariah approved portfolios amounting to SAR 1.55 billion (2015: SAR 1.39 billion). The financial statements of these funds are not consolidated with the consolidated financial statements of the Group. The Group's investment in these funds is included in available for sale investments. Fees earned from management services are disclosed under "related party transactions". Assets held in trust or in a fiduciary capacity are not treated as assets of the Group and, therefore, are not included in the consolidated financial statements.

37) SHARE BASED PLAN RESERVE

In January 2008, the Group launched an equity settled share-based payment plan (the "Plan") for executives and senior employees ("Eligible Employees"). The initial Plan was approved by the Board of Directors in their meeting held on 10 Dhu-al-Qa'dah 1428H (corresponding to November 20, 2007) and SAMA in their letter dated 26 Safar 1429H (corresponding March 4, 2008). The vesting conditions were amended in 2009 as approved by the Board of Directors in their meeting held on 5 Shabaan 1430H (corresponding July 27, 2009) and SAMA in their letter dated 20 Dhualqada 1430H (corresponding November 9, 2009). According to the amended Plan, Eligible Employees will receive shares in the Bank if the following terms and conditions are met:

- Eligible Employees are required to continue their employment with the Group for a period of two years from the grant date to have half of their shares vest and another year for the remainder to vest; and
- The Group achieves specific growth thresholds as approved by the Board of Directors where each threshold will accrue a certain value of shares to the Eligible Employees.

Under the provisions of the Plan, the Group at no point becomes the legal owner of the underlying shares. Until such time as these shares vest they will not carry voting rights. As per the plan, Alawwal Invest manages the Staff Share Plan Fund (the Fund) which will operate in accordance with the terms and conditions as approved by the Board of Directors in their above referred meeting and by SAMA in their above referred letter. Any further modifications in the terms and conditions of the Plan require prior approval of SAMA.

During 2008, the Fund purchased 2.15 million Bank's shares for a total consideration of SR 114 million which are held by it in fiduciary capacity until the shares vest to the eligible employees. The Fund purchased one Million shares in 2012 and 999,063 shares in 2016 worth of SAR 27 million and 25 Million respectively. At the vesting date the ownership of these shares will pass to the employees. The number of shares granted is

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended December 31, 2016
Amounts in SAR'000

calculated in accordance with the performance based formula approved by the Board of Directors and is subject to approval of the Nomination and Remuneration Committee.

In accordance with the terms of the Plan, shares will be granted to eligible employees annually and will vest as described above. The first tranche was granted in 2008 and was vested in year 2011. The second tranche was granted in March 2011 and vested in January 2013 and 2014. The Group granted further five tranches of the Plan in March 2012, 2013, 2014, 2015 and 2016 respectively. The Plans from 2014 to 2016 are currently under their vesting periods. The Plan details are as follows:

	GRANT IN 2016	GRANT IN 2015	GRANT IN 2014
Plan Commencement date	March 2016	March 2015	March 2014
Value of shares granted on the grant date	26,301,969	28,538,602	21,007,936
Fair value per share at grant date	27	45.56	40.24
Number of shares granted	974,147	626,396	522,066
Vesting period	March 2018 - 2019	March 2017 - 2018	March 2016 - 2017
Method of settlement	Bank's shares	Bank's shares	Bank's shares

During 2015, the Bank reassessed its position and consolidated the Staff Share Plan Fund (the «Fund») in its consolidated financial statements. Consequently, the Group had recongised the Bank's shares held by the Fund as treasury shares amounting to SAR 86.48 million and presented these under share based plan reserve in the consolidated statement of changes in shareholders' equity.

The following is the movement in number of shares in grant at December 31, 2016 and 2015.

	NUMBER OF SHARES	
	2016	2015
Beginning of the year	1,863,294	1,598,345
Granted during the year	3,065,214	942,845
Vested during the year	(759,038)	(621,020)
Forfeited during the year	(752,469)	(56,876)
	3,417,001	1,863,294

During the year Share Based Plan related charge to consolidated income statement amounted to SAR 10.81 million (2015: SAR 16.18 million).

38) PROSPECTIVE CHANGES IN THE INTERNATIONAL FINANCIAL REPORTING FRAMEWORK

The Group has opted not to early adopt the amendments and revisions to the following standards which have been published and are mandatory for compliance for future years by the Group's.

Following is a brief on the new IFRSs and amendments to IFRSs, effective for future periods:

- IFRS 9 Financial Instruments:

IFRS 9 Financial Instruments will be effective from 1 January 2018 and will replace IAS 39. The Group will recognize loss allowances based on Expected Credit Loss (ECL) considering forward-looking information. Framework with detailed policies and controls including roles and responsibilities will be implemented. The Group is in the process of evaluating how the new ECL model will impact its ongoing regulatory capital structure planning.

- IFRS 15 Revenue from Contracts with Customers:

IFRS 15 -- "Revenue from contracts with customers", applicable for the annual periods beginning on or after 1 January 2018. The new standard presents a five-step model to determine when to recognize revenue, and

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended December 31, 2016

at what amount. The application of this standard will have a significant impact on how and when you recognize revenue, with new estimates and judgments, and the possibility of revenue recognition being accelerated or deferred.

- Amendments to IAS 12:

Amendments to IAS 12 - "Income Taxes", applicable for the annual periods beginning on or after 1 January 2017. The amendments clarify that the existence of a deductible temporary difference depends solely on a comparison of the carrying amount of an asset and its tax base at the end of the reporting period, and is not affected by possible future changes in the carrying amount or expected manner of recovery of the asset. Therefore, assuming that the tax base remains at the original cost of the debt instrument, there is a temporary difference.

- Amendments to IFRS 2:

Amendments to IFRS 2 -- "Share-based Payment", applicable for the period beginning on or after 1 January 2018. The amendments cover classification and measurement of three accounting areas, first, measurement of cash-settled share-based payments, second, classification of share-based payments settled net of tax withholdings, and third, accounting for a modification of a share-based payment from cash-settled to equity-settled.

- IFRS 16 Leases:

IFRS 16 - "Leases", applicable for the period beginning on or after 1 January 2019. The new standard eliminates the current dual accounting model for lessees under IAS 17, which distinguishes between on-balance sheet finance leases and off-balance sheet operating leases. Instead, IFRS 16 proposes on-balance sheet accounting model.

39) COMPARATIVE FIGURES

Certain prior year figures have been reclassified to conform to the current year's presentation. The impact of these reclassifications on the consolidated financial statements is disclosed below:

	AS ORIGINALLY REPORTED	RECLASSIFICATION	AMOUNTS REPORTED AFTER RECLASSIFICATION
December 31, 2015			
Assets:	76,143,850	268,340	76,412,190
