**The Saudi British Bank**  
**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**  
**31 December 2012**

**1. General**

The Saudi British Bank (SABB) is a Saudi Joint Stock Company and was established by Royal Decree No. M/4 dated 12 Safar 1398H (21 January 1978). SABB formally commenced business on 26 Rajab 1398H (1 July 1978) with the taking over of the operations of The British Bank of the Middle East in the Kingdom of Saudi Arabia. SABB operates under Commercial Registration No. 1010025779 dated 22 Dhul Qadah 1399H (13 October 1979) as a commercial bank through a network of 79 branches (2011: 80 branches) in the Kingdom of Saudi Arabia. SABB employed 3,049 staff as at 31 December 2012 (2011: 3,123). The address of SABB's head office is as follows:

The Saudi British Bank  
P.O. Box 9084  
Riyadh 11413  
Kingdom of Saudi Arabia

The objectives of SABB are to provide a range of banking services. SABB also provides Shariah approved products, which are approved and supervised by an independent Shariah Board established by SABB.

SABB has 100% (2011:100%) ownership interest in a subsidiary, SABB Securities Limited, a Saudi limited liability company formed in accordance with Capital Market Authority's Resolution No. 2007-35-7 dated 10 Jumada II 1428H (25 June 2007) and registered in the Kingdom of Saudi Arabia under Commercial Registration No. 1010235982 dated 8 Rajab 1428H (22 July 2007). Effective 1 July 2011 the assets and liabilities of the Company have been transferred to HSBC Saudi Arabia Limited, an associate company of SABB in lieu of additional shares (see note 7). The Company is in the process of being liquidated. The principal activities of the subsidiary were to engage in the business of custody and dealing as an agent excluding underwriting.

SABB has 100% (2011:100%) ownership interest in a subsidiary, SABB Insurance Agency, a limited liability company registered in the Kingdom of Saudi Arabia under commercial registration No. 1010235187 dated 18 Jumada II 1428H (3 July 2007). SABB has 98% direct and 2% indirect ownership interest in its subsidiary (the indirect ownership is held via a subsidiary registered in the Kingdom of Saudi Arabia). The principal activity of the subsidiary is to act as sole insurance agent for SABB Takaful Company (an associate company- see note 7) within the Kingdom of Saudi Arabia as per the agreement between them. However, the Articles of Association do not restrict the Company from acting as an agent to any other insurance company in the Kingdom of Saudi Arabia.

SABB has 100% (2011:100 %) ownership interest in a subsidiary, Arabian Real Estate Company Limited, a limited liability company registered in the Kingdom of Saudi Arabia under commercial registration No. 1010188350 dated 12 Jumada I 1424H (12 July 2003). SABB has 99% direct and 1% indirect ownership interest in its subsidiary (the indirect ownership is held via a subsidiary registered in the Kingdom of Saudi Arabia). The company is engaged in the purchase, sale and lease of land and real estate for investment purpose.

SABB had 51% ownership interest in a subsidiary, SABB Insurance Services Limited, a limited liability company registered in the Kingdom of Saudi Arabia under commercial registration number 1010241209 dated 24 Dhul Qadah 1428H (4 December 2007). During 2012, SABB sold its entire investment in SABB Insurance Services Limited to Marsh Saudi Arabia. The principal activity of SABB Insurance Services Limited was to act as an insurance broker and consultant to consumers operating within the Kingdom of Saudi Arabia.

**1.1. Basis of preparation**

**a) Statement of compliance**

The consolidated financial statements have been prepared in accordance with the Accounting Standards for Financial Institutions promulgated by the Saudi Arabian Monetary Agency (SAMA) and International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB). SABB prepares its consolidated financial statements to comply with the Banking Control Law, the Regulations for Companies in the Kingdom of Saudi Arabia and SABB's articles of association.

**b) Basis of measurement**

These consolidated financial statements have been prepared under the historical cost convention except for the measurement at fair value of derivatives, financial assets held at fair value through income statement (FVIS) and available for sale. In addition, assets and liabilities that are hedged in a fair value hedging relationship are carried at fair value to the extent of the risks that are being hedged.

**c) Functional and presentation currency**

These consolidated financial statements are expressed in Saudi Arabian Riyals (SAR), rounded off to the nearest thousands, which is the functional currency of SABB and its subsidiaries.

**d) Basis of consolidation**

The consolidated financial statements comprise the financial statements of SABB and its subsidiaries, SABB Securities Limited and Arabian Real Estate Company Limited (collectively referred to as “the Bank”). The financial statements of the subsidiaries are prepared for the same reporting year as that of SABB, using consistent accounting policies. The Bank has not consolidated SABB Insurance Agency as its total assets, liabilities and its income and expenses are not significant to the Bank's overall consolidated financial statements.

A subsidiary is an entity over which SABB has the power to govern the financial and operating policies, so as to obtain benefits from its activities, generally accompanying an ownership interest of more than half of the voting rights. A subsidiary is consolidated from the date on which control is transferred to SABB and ceases to be consolidated from the date on which the control is transferred from SABB.

Intra- group transactions and balances have been eliminated upon consolidation.

**e) Critical accounting judgements and estimates**

The preparation of consolidated financial statements in conformity with IFRS requires the use of certain critical accounting judgements, estimates, and assumptions that affect the reported amounts of assets and liabilities. It also requires management to exercise its judgement in the process of applying the Bank's accounting policies. Such estimates, assumptions and judgements are continually evaluated and are based on historical experience and other factors, including obtaining professional advice and expectations of future events that are believed to be reasonable under the circumstances. Actual results may differ from these estimates. Revisions to accounting estimates are recognised in the period in which the estimate is revised and future periods. Significant areas where management has used estimates, assumptions or exercised judgements are as follows:

**(i) Impairment losses on loans and advances**

The Bank reviews its non performing loans and advances at each reporting date to assess whether a specific provision for credit losses should be recorded in the consolidated statement of income. In particular, judgement by management is required in the estimation of the amount and timing of future cash flows when determining the level of provision required. Such estimates are based on assumptions about a number of factors and actual results may differ, resulting in future changes to the specific provision.

The Bank reviews its loan portfolios to assess an additional collective impairment provision on each reporting date. In determining whether an impairment loss should be recorded, the Bank makes judgements as to whether there is any observable data indicating that there is a measurable decrease in the estimated future cash flows from a portfolio of loans. This evidence may include observable data indicating that there has been an adverse change in the payment status of borrowers in a group, or national or local economic conditions that correlate with defaults on assets in the group. Management uses estimates based on historical loss experience for assets with credit risk characteristics and objective evidence of impairment similar to those in the portfolio when estimating its cash flows. The methodology and assumptions used for estimating both the amount and the timing of future cash flows are reviewed regularly to reduce any differences between loss estimates and actual loss experience.

**(ii) Fair value of financial instruments that are not quoted in an active market**

The fair values of financial instruments that are not quoted in active markets are determined by using valuation techniques. Where valuation techniques (for example, models) are used to determine fair values, they are validated and periodically reviewed by qualified personnel independent of the area that created them. All models are certified before they are used, and models are calibrated to ensure that outputs reflect actual data and comparative market prices. To the extent practical, models use only observable data, however areas such as credit risk (both own and counterparty), volatilities and correlations require management to make estimates. Changes in assumptions about these factors could affect reported fair value of financial instruments.

**(iii) Impairment of available for sale equity investments**

The Bank exercises judgement to consider impairment on the available for sale equity investments. This includes determination of a significant or prolonged decline in the fair value below its cost. The determination of what is 'significant' or 'prolonged' requires judgement. In making this judgement, the Bank evaluates among other factors, the normal volatility in share price. In addition, the Bank considers impairment to be appropriate when there is evidence of deterioration in the financial health of the investee, industry and sector performance, changes in technology, and operational and financing cash flows.

**(iv) Classification of held to maturity investments**

The Bank follows the guidance of IAS 39 when classifying non-derivative financial assets with fixed or determinable payments and fixed maturity as held to maturity. In making this judgement, the Bank evaluates its intention and ability to hold such investments to maturity.

**(v) Classification of fair value through income statement**

The Bank follows criteria set in IAS 39 when classifying financial assets and liabilities to fair value through income statement. In making this judgement, the Bank evaluates its compliance with the conditions as prescribed in IAS 39.

**f) Going concern**

The Bank's management has made an assessment of the Bank's ability to continue as a going concern and is satisfied that the Bank has the resources to continue in business for the foreseeable future. Furthermore, the management is not aware of any material uncertainties that may cast significant doubt upon the Bank's ability to continue as a going concern. Therefore, the consolidated financial statements continue to be prepared on the going concern basis.

**2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES**

The significant accounting policies adopted in the preparation of these consolidated financial statements are set out below:

**a) Changes in accounting policies**

The accounting policies followed are consistent with those of the previous financial year except for the adoption of -IFRS 7 Financial Instruments: Disclosures (amendment) which has had no financial impact on the consolidated financial statements of the Bank.

**b) Trade date accounting**

All regular way purchases and sales of financial assets are recognised and derecognised on the trade date i.e. the date on which the Bank commits to purchase or sell the assets. Regular way purchases and sales are purchases and sales of financial assets that require delivery of assets within the time frame generally established by regulation or convention in the market place.

**c) Derivative financial instruments and hedge accounting**

Derivative financial instruments including foreign exchange contracts, special commission rate futures, forward rate agreements, currency and special commission rate swaps, currency and special commission rate options (both written and purchased), are measured at fair value (premium received for written options). All derivatives are carried at their fair value as assets where the fair value is positive and as liabilities where the fair value is negative.

Fair values are generally obtained by reference to quoted market prices, discounted cash flow models or pricing models, as appropriate.

The treatment of changes in their fair value depends on their classification into the following categories:

**i) Derivatives held for trading**

Any changes in the fair value of derivatives that are held for trading purposes are taken directly to the consolidated statement of income for the year. Derivatives held for trading also include those derivatives which do not qualify for hedge accounting.

**ii) Embedded derivatives**

Derivatives embedded in other financial instruments are treated as separate derivatives and recorded at fair value if their economic characteristics and risks are not closely related to those of the host contract, and the host contract is not itself held for trading or designated at fair value through profit or loss. The embedded derivatives separated from the host are carried at fair value in the trading derivatives portfolio with changes in fair value recognised in the consolidated statement of income.

**iii) Hedge accounting**

The Bank designates certain derivatives as hedging instruments in qualifying hedging relationships.

For the purpose of hedge accounting, hedges are classified into two categories; (a) fair value hedges which hedge the exposure to changes in the fair value of a recognised asset or liability, and (b) cash flow hedges which hedge exposure to variability in cash flows that is either attributable to a particular risk associated with a recognised asset or liability, or a highly probable forecasted transaction that will affect the reported net gain or loss.

In order to qualify for hedge accounting, it is required that the hedge should be expected to be highly effective i.e. the changes in fair value or cash flows of the hedging instrument should effectively offset corresponding changes in the hedged item, and should be reliably measurable. At the inception of the hedge, the risk management objective and strategy is documented including the identification of the hedging instrument, the related hedged item, the nature of risk being hedged, and how the Bank will assess the effectiveness of the hedging relationship. Subsequently, the effectiveness of the hedge is assessed on an ongoing basis.

In relation to fair value hedges, which meet the criteria for hedge accounting, any gain or loss from remeasuring the hedging instruments to fair value is recognised immediately in the consolidated statement of income. The related portion of the hedged item is recognised in the consolidated statement of income. Where the fair value hedge of a special commission bearing financial instrument ceases to meet the criteria for hedge accounting, the adjustment in the carrying value is amortised to the consolidated statement of income over the remaining life of the instrument. If the hedged item is derecognised, the unamortised fair value adjustment is recognised immediately in the consolidated statement of income.

In relation to cash flow hedges, which meet the criteria for hedge accounting, the portion of the gain or loss on the hedging instrument that is determined to be an effective hedge is recognised in the consolidated statement of comprehensive income. The ineffective portion, if any, is recognised in the consolidated statement of income. For cash flow hedges affecting future transactions, the gains or losses recognised in other reserves are transferred to the consolidated statement of income in the same period in which the hedged transaction affects the consolidated statement of income.

**The Saudi British Bank**  
**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**  
**31 December 2012**

Hedge accounting is discontinued when the hedging instrument expires or is sold, terminated or exercised, or no longer qualifies for hedge accounting. On discontinuation of hedge accounting on cash flow hedges any cumulative gain or loss that was recognised in other reserves, is retained in shareholders' equity until the forecasted transaction occurs. Where the hedged forecasted transaction is no longer expected to occur, the net cumulative gain or loss recognised in other reserves is transferred to the consolidated statement of income for the year.

**d) Foreign currencies**

The consolidated financial statements are denominated and presented in Saudi Arabian Riyals, which is also the functional currency of the Bank.

Transactions in foreign currencies are translated into Saudi Arabian Riyals at the spot exchange rates prevailing at transaction dates. Monetary assets and liabilities at year-end, denominated in foreign currencies, are translated into Saudi Arabian Riyals at the exchange rates prevailing at the reporting date. The foreign currency gain or loss on monetary items is the difference between amortised cost in the functional currency at the beginning of the year adjusted for effective interest and payments during the year, and the amortised cost in foreign currency translated at the exchange rate at the end of the year. All differences arising on non-trading activities are transferred to exchange income in the statement of income, with the exception of differences on foreign currency borrowings that provide an effective hedge against a net investment in foreign entity. Foreign exchange gains or losses on translation of monetary assets and liabilities denominated in foreign currencies are recognised in the consolidated statement of income, except for differences arising on the retranslation of available for sale equity instruments or when deferred in equity as qualifying cash flow hedges and qualifying net investment hedges. Translation gains or losses on non-monetary items carried at fair value are included as part of the fair value adjustment either in the consolidated statement of income or in equity depending on the underlying financial asset.

**e) Offsetting financial instruments**

Financial assets and liabilities are offset and are reported net in the consolidated statement of financial position when there is a legally enforceable right to set off the recognised amounts and when the Bank intends to settle on a net basis, or to realise the asset and settle the liability simultaneously.

**f) Revenue/ expenses recognition**

**Special commission income and expense**

Special commission income and expense for all commission-bearing financial instruments is recognised in the consolidated statement of income on an effective yield basis. The effective commission rate is the rate that exactly discounts the estimated future cash payments and receipts through the expected life of the financial asset or liability (or, where appropriate, a shorter period) to the carrying amount of the financial asset or liability. When calculating the effective commission rate, the Bank estimates future cash flows considering all contractual terms of the financial instrument but not future credit losses

The carrying amount of the financial asset or financial liability is adjusted if the Bank revises its estimates of payments or receipts. The adjusted carrying amount is calculated based on the original effective commission rate and the change in carrying amount is recorded as special commission income or expense.

If the recorded value of a financial asset or a group of similar financial assets has been reduced due to an impairment loss, special commission income continues to be recognised using the original effective commission rate applied to the new carrying amount.

The calculation of the effective yield takes into account all contractual terms of the financial instruments (prepayment, options etc.) and includes all fees paid or received related transaction costs, and discounts or premiums that are an integral part of the effective commission rate. Transaction costs are incremental costs that are directly attributable to the acquisition, issue or disposal of financial asset or liability.

When the Bank enters into special commission rate swap to change special commission from fixed to floating (or vice versa) the amount of special commission income or expense is adjusted by the net special commission on the swap.

**Exchange income/ loss**

Exchange income/loss is recognised when earned/incurred.

**Fees and commission income and expenses**

Fees and commission income are recognised on an accrual basis when the related services has been provided. Loan commitment fees for loans that are likely to be drawn down are deferred and, together with the related direct cost are recognised as an adjustment to the effective yield on the loan. Portfolio and other management advisory and service fees are recognised based on the applicable service contract, usually on a time proportionate basis. Fees received on asset management, wealth management, financial planning, custody services and other similar services that are provided over an extended period of time are recognised rateably over the period when the service is being provided. When a loan commitment is not expected to result in the drawdown of a loan, loan commitment fees are recognised on a straight-line basis over the commitment period. Other fees and commission expense relate mainly to transaction and service fees, which are expensed as the service is received.

**Dividend income**

Dividend income is recognised when the right to receive income is established.

**Net trading income**

Results arising from trading activities include all gains and losses from changes in fair value and related special commission income or expense, dividends from financial assets and financial liabilities held for trading and foreign exchange differences. This includes any ineffectiveness recorded in hedging transactions.

**g) Sale and repurchase agreements**

Assets sold with a simultaneous commitment to repurchase at a specified future date (repos) continue to be recognised in the consolidated statement of financial position as the Bank retains substantially all the risks and reward of ownership and are continued to be measured in accordance with related accounting policies for the underlying financial assets held as FVIS, available for sale, held to maturity and other investments held at amortised cost. The counterparty liability for amounts received under these agreements is included in “due to banks and other financial institutions” or “customers’ deposits”, as appropriate. The difference between sale and repurchase price is treated as special commission expense and amortised over the life of the repo agreement, using the effective yield method.

Assets purchased with a corresponding commitment to resell at a specified future date (reverse repo) are not recognised in the consolidated statement of financial position, as the Bank does not obtain control over the assets. Amounts paid under these agreements are included in “Cash and balances with SAMA”, “Due from banks and other financial institutions” or “Loans and advances”, as appropriate. The difference between purchase and resale price is treated as special commission income and amortised over the life of the reverse repo agreement, using the effective yield method.

**h) Investments**

All investment securities are initially recognised at their fair value which represents the consideration given, including acquisition charges associated with the investment (except for investments held as FVIS, where acquisition charges are not added to the cost at initial recognition and are charged to the consolidated statement of income). Premiums are amortised and discounts accreted using the effective yield method and are taken to special commission income.

Following initial recognition, for securities traded in organised financial markets, fair value is determined by reference to exchange quoted market bid prices at the close of business on the reporting date. Investments in listed equity instruments are valued at the exchange quoted prices as of day close. Fair value of managed assets and investments in mutual funds are determined by reference to declared net asset values which approximate the fair value.

**The Saudi British Bank**  
**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**  
**31 December 2012**

Following initial recognition, for securities where there is no quoted market price, a reasonable estimate of the fair value is determined by reference to the current market value of another instrument which is substantially the same, or is based on the expected cash flows or the underlying net asset base of the security.

Following initial recognition, subsequent transfers between the various classes of investments are not ordinarily permissible. The subsequent period end reporting values for each class of investment are determined on the basis as set out in the following paragraphs.

**(i) Held as FVIS**

Investments in this category are classified as either investment held for trading or those designated as FVIS at inception or on adoption of the revised IAS 39. Investments classified as trading are acquired principally for the purpose of selling or repurchasing in the short term. An investment may be designated as FVIS by the management if it satisfies the criteria set out below (except for equity instruments that do not have a quoted market price in an active market and whose fair values cannot be reliably measured):

- it is a financial instrument containing one or more embedded derivatives that significantly modify the cash flows resulting from the financial instrument, or
- it is a financial instrument with an embedded derivative that is required to be separated from the host contract under IAS 39, but the Bank is unable to measure reliably the embedded derivative separately either at acquisition or at a subsequent reporting date

The fair value designation is made in accordance with the Risk Management Strategy approved by the Bank's Assets and Liabilities Committee (ALCO) and is irrevocable. Designated financial assets are recognised when the Bank enters into the contractual provisions of the arrangements with counterparties on trade date and derecognised when sold.

After initial recognition, investments at FVIS are measured at fair value and any change in the fair value is recognised in the consolidated statement of income for the period in which it arises. Special commission income and dividend income received on financial assets held as FVIS are reflected as income from financial instruments designated as FVIS in the consolidated statement of income. Transaction costs, if any, are not added to the fair value measurement at initial recognition of FVIS investments.

**(ii) Available for sale**

Available-for-sale investments are those intended to be held for an unspecified period of time, which may be sold in response to needs for liquidity or changes in commission rates, exchange rates or equity prices.

Investments, which are classified as "available for sale, are subsequently measured at fair value. For an available-for-sale investment where the fair value has not been hedged, any gain or loss arising from a change in its fair value is recognised directly in the consolidated statement of comprehensive income. On derecognition, any cumulative gain or loss previously recognised in the consolidated statement of comprehensive income is included in the consolidated statement of income for the period.

Equity investments classified under available-for-sale investments whose fair value cannot be reliably measured are carried at cost.

**(iii) Held at amortised cost**

Investment securities with fixed or determinable payments that are not quoted in an active market are classified as "held at amortised cost". Such investments whose fair values have not been hedged are stated at amortised cost, less provision for impairment. Investments in a fair value hedge relationship are adjusted for fair value changes to the extent of the risk being hedged. Any gain or loss is recognised in the consolidated statement of income when the investment is derecognised and is disclosed as gains/ (losses) on non-trading investments. Amortised cost is calculated by taking into account any discount or premium on acquisition using the effective yield method.

**(iv) Held to maturity**

Investments having fixed or determinable payments and fixed maturity that the Bank has the positive intention and ability to hold to maturity other than those that meet the definition of “held at amortised cost” are classified as held to maturity. Held to maturity investments are subsequently measured at amortised cost, less provision for impairment in value. Amortised cost is calculated by taking into account any discount or premium on acquisition using the effective yield method. Any gain or loss on such investments is recognised in the consolidated statement of income when the investment is derecognised or impaired.

Investments classified as held to maturity cannot ordinarily be sold or reclassified without impacting the Bank’s ability to use this classification and cannot be designated as a hedged item with respect to special commission rate or prepayment risk, reflecting the intention to hold them to maturity.

**i) Investment in associates**

Investment in associates is accounted for using the equity method. An associate is an entity in which the Bank has significant influence and which is neither a subsidiary nor a joint venture.

Under the equity method, investment in associates is carried in the statement of financial position at cost plus post acquisition changes in the Bank’s share of net assets of the associates, less any impairment.

The reporting dates of the associates and the Bank are identical and the associate’s accounting policies conform to those used by the Bank for like transactions and events in similar circumstances.

Unrealised profits and losses resulting from transactions between the Bank and its associates are eliminated to the extent of the Bank’s interest in the associates.

**j) Loans and advances**

Loans and advances are non-derivative financial assets originated or acquired by the Bank with fixed or determinable payments that are not quoted in an active market.

All loans and advances are initially measured at cost, being the fair value of consideration given, including acquisition charges associated with the loans and advances.

The Bank’s loans and advances are classified as held at amortised cost less any amount written off and provisions for impairment.

For loans and advances, which are hedged, the related portion of the hedged fair value is adjusted against the carrying amount.

**k) Due from banks and other financial institutions**

Due from banks and other financial institutions are financial assets which are mainly money market placements with fixed or determinable payments and fixed maturities that are not quoted in an active market. Money market placements are not entered into with the intention of immediate or short-term resale. Due from banks and other financial institutions are initially measured at cost, being the fair value of the consideration given.

Following initial recognition, due from banks and other financial institutions are stated at cost less any amount written off and provisions for impairment, if any.

**l) Impairment of financial assets**

An assessment is made at each reporting date to determine whether there is objective evidence that a financial asset or group of financial assets may be impaired. If such evidence exists, the estimated recoverable amount of that asset is determined and any impairment loss, based on the net present value of future anticipated cash flows, is recognised for changes in its carrying amounts.

**The Saudi British Bank**  
**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**  
**31 December 2012**

When a financial asset is uncollectible, it is written off against the related provision for impairment. Financial assets are written off only in circumstances where effectively all possible means of recovery have been exhausted, and the amount of the loss has been determined.

Once a financial asset has been written down to its estimated recoverable amount, special commission income is thereafter recognised based on the rate of special commission that was used to discount the future cash flows for the purpose of measuring the recoverable amount.

If, in a subsequent period, the amount of the impairment loss on investments other than available for sale equity investments decreases and the decrease can be related objectively to an event occurring after the impairment was recognised (such as an improvement in the debtor's credit rating), the previously recognised impairment loss is reversed by adjusting the allowance account. The amount of the reversal is recognised in the consolidated statement of income in provision for credit losses.

**i) Impairment of financial assets held at amortised cost**

A financial asset is classified as impaired when there is objective evidence of credit related impairment as a result of one or more loss events that occurred after the initial recognition of the asset and that a loss event(s) has an impact on the estimated future cash flows of the financial asset or group of financial assets that can be reliably estimated.

A specific provision for credit losses due to impairment of a loan or any other financial asset held at amortised cost, including those arising from sovereign risk exposures, is established if there is objective evidence that the Bank will not be able to collect all amounts due. The amount of the specific provision is the difference between the carrying amount and the estimated recoverable amount. The estimated recoverable amount is the present value of expected cash flows, including amounts estimated to be recoverable from guarantees and collateral, discounted based on the original effective special commission rate.

Loans and advances are generally renegotiated either as part of an ongoing customer relationship or in response to an adverse change in the circumstances of the borrower. Renegotiation can result in an extension of the due date of payment or repayment plans under which the Bank offers a revised rate of commission to genuinely distressed borrowers. This may result in the asset continuing to be overdue and individually impaired as the renegotiated payments of commission and principal do not recover the original carrying amount of the loan. In other cases, renegotiation leads to a new agreement, this is treated as a new loan. Restructuring policies and practices are based on indicators or criteria which indicate that payment will most likely continue. The loans continue to be subject to an individual or collective impairment assessment, calculated using the loan's original effective yield rate.

Consumer loans are considered to be impaired when a payment is overdue for specified number of days as per related product programs. Since the risk metrics for consumer loans are based on a collective "pool" basis, rather than on individual loans, the provisions for consumer loans are also computed on a "pool basis" using the "flow rate" methodology. The provision coverage is 100% for such non-performing loans which reach the "write-off point" (write-off points which are set at 180 days past due). Write off decisions are generally based on a product specific past due status. When a financial asset is uncollectible, it is written off against the related provision for impairment, if any, and any amounts in excess of available provision are directly charged to consolidated statement of income.

In addition to specific provision for credit losses, provision for collective impairment is made on a portfolio basis for credit losses where there is objective evidence that unidentified losses exist at the reporting date. These are based on any deterioration in the risk rating (i.e. downward migration of risk ratings) of the financial assets since it was originally granted. This provision is estimated based on various factors including credit ratings allocated to a borrower or group of borrowers, the current economic conditions, the experience the Bank has had in dealing with a borrower or group of borrowers and available historical default information.

The carrying amount of the asset is adjusted through the use of an allowance account and the amount of the adjustment is included in the consolidated statement of income.

**ii) Impairment of financial assets held at fair value**

For financial assets held at fair value, where a loss has been recognised directly through the consolidated statement of comprehensive income under shareholders' equity, the cumulative net loss recognised in shareholders' equity is transferred to the consolidated statement of income when the asset is considered to be impaired.

**The Saudi British Bank**  
**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**  
**31 December 2012**

For equity investments held as available-for-sale, a significant or prolonged decline in fair value below its cost represents objective evidence of impairment. Unlike debt securities, the previously recognised impairment loss cannot be reversed through the consolidated statement of income as long as the asset continues to be recognised i.e. any increase in fair value after impairment has been recorded can only be recognised in equity. On derecognition, any cumulative gain or loss previously recognised in shareholders' equity is included in consolidated statement of income for the period.

The Bank writes off its financial assets when the respective business units together with Risk Management determine that the financial assets are uncollectible. This determination is reached after considering information such as the occurrence of significant changes in the borrower/issuer's financial position such that the borrower/issuer can no longer pay the obligations, or that proceeds from collateral will not be sufficient to pay back the entire exposure. The financial assets are, then, written off only in circumstances where effectively all possible means of recovery have been exhausted.

The Bank seeks to use collateral, where possible, to mitigate its risks on financial assets. The collateral comes in various forms such as cash, securities, letters of credit/guarantees, real estate, receivables, inventories, other non-financial assets and credit enhancements such as netting agreements. The fair value of collateral is generally assessed, at a minimum, at inception and based on the Bank's quarterly reporting schedule. However, some collateral, for example, cash or securities relating to margining requirements, is valued daily.

To the extent possible, the Bank uses active market data for valuing financial assets, held as collateral. Other financial assets which do not have a readily determinable market value are valued using models. Non-financial collateral, such as real estate, is valued based on data provided by third parties such as mortgage brokers, housing price indices, audited financial statements, and other independent sources.

**m) Property and equipment**

Property and equipment are stated at cost and presented net of accumulated depreciation and impairment loss. Freehold land is not depreciated.

The cost of other property and equipment is depreciated on the straight-line method over the estimated useful lives of the assets as follows:

Buildings	33 years
Leasehold improvements	over the period of the lease contract
Furniture, equipment and vehicles	3 to 4 years

Gains and losses on disposals are determined by comparing proceeds with the carrying amount. These are included in the consolidated statement of income.

The assets' residual values and useful lives are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. Any carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount.

**n) Financial liabilities**

All money market deposits, customer deposits, borrowing and debt securities in issue are initially recognised at cost, being fair value of consideration received.

Subsequently all commission bearing financial liabilities where fair values have not been hedged are measured at amortised cost. Amortised cost is calculated by taking into account any discount or premium. Premiums are amortised and discounts accreted on an effective yield basis to maturity and taken to special commission expense.

Financial liabilities in a fair value hedge relationship are adjusted for fair value changes to the extent of the risk being hedged. The resultant gain or loss is recognised in the consolidated statement of income.

**The Saudi British Bank**  
**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**  
**31 December 2012**

**o) Provisions**

Provisions are recognised when a reliable estimate can be made by the Bank of a present legal or constructive obligation as a result of past events and it is more likely than not that an outflow of resources will be required to settle the obligation.

**p) Guarantees**

Financial guarantees are initially recognised in the consolidated financial statements at fair value in other liabilities, being the value of the premium received. Subsequent to the initial recognition, the Bank's liability under each guarantee is measured at the higher of the amortised premium and the best estimate of expenditure required to settle any financial obligations arising as a result of guarantees. Any increase in the liability relating to the financial guarantee is taken to the consolidated statement of income in "provision for credit losses". The premium received is recognised in the consolidated statement of income in "Fees and commission income, net" on a straight-line basis over the life of the guarantee.

**q) Accounting for leases**

Leases entered into by the Bank as a lessee are all operating leases. Payments made under these operating leases are charged to the consolidated statement of income on a straight-line basis over the period of the lease.

**r) Cash and cash equivalents**

For the purpose of the consolidated statement of cash flows, cash and cash equivalents comprise cash, balances with SAMA and placements with SAMA excluding the statutory deposit, and due from banks and other financial institutions with an original maturity of three months or less from date of acquisition.

**s) Derecognition of financial instruments**

A financial asset (or a part of a financial asset, or a part of a group of similar financial assets) is derecognised, when the contractual rights to the cash flows from the financial asset expires.

In instances where the Bank is assessed to have transferred a financial asset, the asset is derecognised if the Bank has transferred substantially all the risks and rewards of ownership. Where the Bank has neither transferred nor retained substantially all the risks and rewards of ownership, the financial asset is derecognised only if the Bank has not retained control of the financial asset. The Bank recognises separately as assets or liabilities any rights and obligations created or retained in the process.

A financial liability (or a part of a financial liability) can only be derecognised when it is extinguished, that is when the obligation specified in the contract is either discharged, cancelled or expired.

**t) Assets held in trust or in fiduciary capacity**

Assets held in trust or in a fiduciary capacity are not treated as assets of the Bank and, accordingly, are not included in the accompanying consolidated financial statements.

**u) Zakat and income taxes**

Zakat is computed on the Saudi shareholders' share of equity or net income using the basis defined under the zakat regulations. Income taxes are computed on the foreign shareholders share of net income for the year.

Zakat and income taxes are not charged to the Bank's consolidated statement of income as they are the liabilities of the shareholders and therefore are deducted from the dividends paid to the shareholders.

**v) Shariah approved banking products**

In addition to conventional banking, the Bank offers its customers certain Shariah approved banking products, which are approved by its Shariah Board.

All Shariah approved banking products are accounted for using IFRS and are in conformity with the accounting policies described in these consolidated financial statements.

**The Saudi British Bank**  
**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**  
**31 December 2012**

**3. Cash and balances with SAMA**

	<b>2012</b>	2011
	<b>SAR'000</b>	SAR'000
Cash in hand	<b>966,179</b>	821,743
Statutory deposit	<b>6,902,351</b>	5,794,669

**d) The analysis of investments by counterparty is as follows:**

	2012 SAR'000	2011 SAR'000
Government and quasi government	21,938,813	17,345,151
Corporate	2,220,193	1,902,219
Banks and other financial institutions	3,418,289	2,941,340
Other	9,890	11,412
<b>Total</b>	<b>27,587,185</b>	<b>22,200,122</b>

Equities reported under available for sale investments include unquoted shares of SAR 9.9 million (2011: SAR 11.4 million) that are carried at cost, as their fair value cannot be reliably measured.

Investments include Saudi Government Bonds classified as available for sale amounting to SAR 316.7 million (2011: SAR nil) which have been pledged under repurchase agreement with customers. The market value of these investments is SAR 316.5 million (2011: SAR nil).

**e) Credit quality of investments**

	2012 SAR'000	2011 SAR'000
Saudi Government bonds	15,998,363	12,195,596
Investment grade	8,288,696	8,311,319
Non investment grade	237,041	174,658
Unrated	3,063,085	1,518,549
<b>Total</b>	<b>27,587,185</b>	<b>22,200,122</b>

The Saudi Government Bonds comprise Saudi Government Development Bonds and treasury Bills.

Investment Grade includes those investments having credit exposure equivalent to Standard and Poor's rating of AAA to BBB. Issuer ratings have been used for bonds which have not been rated by any agency amounting to SAR nil (2011: SAR 99.3 million).

**The Saudi British Bank**  
**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**  
**31 December 2012**

The unrated category mainly comprises of Saudi corporate Bonds, quasi government bonds, private equities, quoted and unquoted equities.

**f) Movements of allowance for impairment of investments**

	<b>2012</b>	2011
	<b>SAR'000</b>	SAR'000
Balance at beginning of the year	<b>33,490</b>	40,232
Amounts recovered during the year	<b>(1,589)</b>	(6,742)
<b>Balance at end of the year</b>	<b>31,901</b>	33,490

**6. Loans and advances, net**

**a) Loans and advances are classified as follows:**

	<b>2012</b>			<b>SAR' 000</b>
	<b>Credit Cards</b>	<b>Consumer Loans</b>	<b>Commercial Loans and Overdrafts</b>	<b>Total</b>
Performing loans and advances-gross	<b>1,767,124</b>	<b>17,133,422</b>	<b>78,012,589</b>	<b>96,913,135</b>
Non performing loans and advances, net	<b>1,033</b>	<b>49,006</b>	<b>1,548,516</b>	<b>1,598,555</b>
<b>Total loans and advances</b>	<b>1,768,157</b>	<b>17,182,428</b>	<b>79,561,105</b>	<b>98,511,690</b>

**The Saudi British Bank**  
**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**  
**31 December 2012**

**Undoubted:** The strongest credit risk with a negligible probability of default. Such entities would have an extremely strong capacity to meet long term commitments in adverse market conditions

**Good:** A strong credit risk with a low probability of default. These entities have a strong capacity to meet long term commitments but some sensitivity to market events.

**Satisfactory:** A satisfactory credit risk with a moderate probability of default. These entities have the capacity to meet medium term and short term commitments however there is likely to be a need for periodic monitoring due to a higher sensitivity to market events.

**ii) Ageing of loans and advances (past due but not impaired)**

The provision for credit losses on the consumer loans and advances is calculated on a collective basis.

The collective impairment provision is based on an asset quality matrix, which includes the grading structure in respect of the credit risk of the customers as well as general economic outlook.

**d) Collateral**

The Bank in the ordinary course of lending activities holds collaterals as security to mitigate credit risk in the loans and advances. These collaterals mostly include time and demand and other cash deposits, financial guarantees, local and international equities, real estate and other fixed assets.

**7. Investment in associates**

SABB Securities Limited, a subsidiary of SABB, is in the process of being liquidated by SABB. During 2011, the assets and liabilities of SABB Securities Limited have been transferred to HSBC Saudi Arabia Limited effective 1 July 2011, resulting in an increased shareholding of SABB in HSBC Saudi Arabia Limited from 40% to 51%. The Bank is not consolidating HSBC Saudi Arabia Limited as it does not have the power to govern the financial and operating policies of HSBC Saudi Arabia Limited.

HSBC Saudi Arabia Limited is involved in investment banking services in addition to being engaged in the business of custody and dealing as an agent excluding underwriting in the Kingdom of Saudi Arabia.

SABB owns 32.5% of the equity shares of SABB Takaful which carries out Shariah compliant insurance activities and offers family and general takaful products.

<b>Total</b>	<u><b>3,254,831</b></u>	<u><b>3,816,340</b></u>

**10. Derivatives**

In the ordinary course of business, the Bank utilises the following derivative financial instruments for both trading and hedging purposes:

**a) Forwards and futures**

Forwards and futures are contractual agreements to either buy or sell a specified currency, commodity or financial instrument at a specified price and date in the future. Forwards are customised contracts transacted in the over-the-counter market. Foreign currency and special commission rate futures are transacted in standardised amounts on regulated exchanges, and changes in futures contract values are settled daily.

**b) Options**

Options are contractual agreements under which the seller (writer) grants the purchaser (holder) the right, but not the obligation, to either buy or sell at a fixed future date or at any time during a specified period, a specified amount of a currency, commodity or financial instrument at a predetermined price.

**c) Swaps**

Swaps are commitments to exchange one set of cash flows for another. For special commission rate swaps, counterparties generally exchange fixed and floating rate special commission payments in a single currency without exchanging principal. For currency swaps, fixed special commission payments and principal are exchanged in different currencies. For cross currency special commission rate swaps, principal, fixed and floating special commission payments are exchanged in different currencies.

**d) Forward rate agreements**

Forward rate agreements are over-the-counter negotiated special commission rate contracts that call for a cash settlement for the difference between a contracted special commission rate and the market rate on a specified future date, based on a notional principal for an agreed period of time.

**Derivatives held for trading purposes**

Most of the Bank's derivative trading activities relate to sales, positioning and arbitrage. Sales activities involve offering products to customers in order, inter alia, to enable them to transfer, modify or reduce current and future risks. Positioning involves managing market risk positions with the expectation of profiting from favourable movements in prices, rates or indices. Arbitrage involves identifying, with the expectation of profiting from price differentials between markets or products.

**The Saudi British Bank**  
**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**  
**31 December 2012**

**Derivatives held for hedging purposes**

The Bank has adopted a comprehensive system for the measurement and management of risk (see note 29 - credit risk, note 31- market risk and note 32 - liquidity risk). Part of the risk management process involves managing the Bank's exposure to fluctuations in foreign exchange and special commission rates to reduce its exposure to currency and special commission rate risks to acceptable levels, as determined by the Board of Directors within the guidelines issued by SAMA. The Board of Directors has established the levels of currency risk by setting limits on currency position exposures. Positions are monitored on a daily basis and hedging strategies are used to ensure that positions are maintained within the established limits. The Board of Directors has also established the levels of special commission rate risk by setting limits on special commission rate gaps for stipulated periods. Asset and liability special commission rate gaps are reviewed on a periodic basis and hedging strategies are used to maintain special commission rate gaps within the established limits.

As part of its asset and liability management process, the Bank uses derivatives for hedging purposes in order to adjust its exposure to currency and special commission rate risks. This is generally achieved by hedging specific transactions as well as by strategic hedging against overall statement of financial position exposures. Strategic hedging other than portfolio hedging does not qualify for hedge accounting and the related derivatives are accounted for as held for trading.

The Bank uses forward foreign exchange contracts and currency swaps to hedge against specifically identified currency risks. In addition, the Bank uses special commission rate swaps to hedge against the special commission rate risk arising from specifically identified fixed special commission rate exposures. The Bank also uses special commission rate swaps to hedge against the cash flow risk arising on certain floating rate exposures. In all such cases, the hedging relationship and objective, including the details of the hedged items and hedging instruments, are formally documented and the transactions are accounted for as fair value or cash flow hedges.

**Cash flow hedges**

The Bank is exposed to variability in future special commission cash flows on non-trading assets and liabilities which bear special commission income at a variable rate. The Bank uses commission rate swaps as cash flow hedges of these special commission rate risks. Below is the schedule indicating as at 31 December, the periods when the hedged cash flows are expected to occur and when they are expected to affect profit or loss:

	<b>SAR' 000</b>	
	<u>Within 1 year</u>	<u>1-3 years</u>
<b>2012</b>		
Cash inflows (assets)	-	-
Cash out flows (liabilities)	<u>(17,356)</u>	-
Net cash outflow	<u>(17,356)</u>	<u>-</u>
<b>2011</b>	<u>Within 1 year</u>	<u>1-3 years</u>
Cash inflows (assets)	437	-
Cash out flows (liabilities)	<u>(18,805)</u>	<u>(14,065)</u>
Net cash inflow	<u>(18,368)</u>	<u>(14,065)</u>

The schedule reflects special commission income cash flows expected to arise on the hedged items in cash flow hedges based on the repricing profile of the hedged assets and liabilities.

The tables below show the positive and negative fair values of derivative financial instruments held, together with their notional amounts as at 31 December, analysed by the term to maturity and the monthly average. The notional amounts, which provide an indication of the volumes of the transactions outstanding at the year end, do not necessarily reflect the amounts of future cash flows involved. These notional amounts, therefore, are neither indicative of the Bank's exposure to market risk or credit risk, which is generally limited to the positive fair value of the derivatives.

**The Saudi British Bank**  
**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**  
**31 December 2012**

The net gains on the hedging instruments for fair value hedges are SAR 27.2 million (2011: SAR 97.4 million). The net losses on the hedged item attributable to the hedged risk are SAR 27.4 million (2011: SAR 97.4 million). The net fair value of the derivatives is positive SAR 7.5 million (2011: negative SAR 19.7 million).

Approximately 20% (2011: 17%) of the positive fair value of the Bank's derivatives are entered into with financial institutions and less than 6% (2011: 4%) of the positive fair value contracts are with any individual counterparty at the reporting date.

**13. Debt securities in issue**

	<b>2012</b>	2011
	<b>SAR'000</b>	SAR'000
USD 600 million 5 year fixed rate notes	<b>2,300,780</b>	2,273,660
SAR 705 million 5 year floating rate notes	<b>705,000</b>	1,705,000
SAR 1,500 million 5 year SAR subordinated Sukuk	<b>1,500,000</b>	-
<b>Total</b>	<b>4,505,780</b>	3,978,660

**USD 600 million 5 year fixed rate notes**

These notes were issued during the year 2010 at a fixed rate of 3% and are due to mature on 12 November 2015. The notes are unsecured and carry an effective yield of 3.148% which includes a credit spread of 170 bps. The notes are non-convertible, are unsecured and are listed on the London Stock Exchange.

The special commission rate exposure on these notes has been hedged by a fixed to floating special commission rate swap. The special commission rate swap forms part of a designated and effective hedging relationship and is accounted for as a fair value hedge in these financial statements. The negative mark to market on these notes pertaining to the hedged portion is SAR 35.5 million as at the end of the current year.

**SAR 705 million 5 year floating rate notes**

These notes were issued during 2008 and are due to mature on 21 July 2013. During the current year, these notes were partially exchanged to the extent of SAR 1,000 million for the SABB SAR subordinated Sukuk issuance. The notes carry effective special commission at three months' SIBOR plus 80 bps payable quarterly. The notes are unsecured, non convertible and are listed on Saudi Stock Exchange (Tadawul).

The special commission rate exposure on these notes has been partially hedged by a floating to fixed special commission rate swap to the extent of SAR 650 million. The special commission rate swap forms part of a designated and effective hedging relationship and is accounted for as a cash flow hedge in these financial statements.

**SAR 1,500 million 5 year SAR subordinated Sukuk**

The Sukuk was issued by SABB on 28 March 2012 and matures in March 2017. The Sukuk was issued as a partial commercial exchange from senior to subordinated debt to the extent of SAR 1,000 million. The remaining portion of SAR 500 million was fully subscribed in cash.

The Sukuk carries effective special commission income at three months' SIBOR plus 120 bps payable quarterly. The Sukuk is unsecured and is listed on the Saudi Stock Exchange (Tadawul).

The special commission rate exposure on the Sukuk has been partially hedged by a floating to fixed special commission rate swap to the extent of SAR 600 million. The special commission rate swap forms part of a designated and effective hedging relationship and is accounted for as a cash flow hedge in these financial statements.

**14. Borrowings**

This represents a 12 year amortising fixed rate loan from a financial institution that carries special commission at the rate of 5.11% payable semi annually. The loan was taken on 7 July 2005 and is repayable by 15 June 2017.

<b>Total</b>	<b>5,574,859</b>	5,870,171

**16. Share capital**

The authorised, issued and fully paid share capital of SABB consists of 1,000 million shares of SAR 10 each (2011: 750 million shares of SAR 10 each). The ownership of the SABB's share capital is as follows:

	<b>2012</b>	2011
Saudi shareholders	<b>60%</b>	60%
HSBC Holdings BV (a wholly owned subsidiary of HSBC Holdings plc)	<b>40%</b>	40%

The shareholders of SABB approved a bonus issue of one share for every three shares in their Extra Ordinary General Meeting held on 13 March 2012. As a result, 250 million shares of SAR 10 each were issued by capitalising retained earnings.

**17. Statutory reserve**

In accordance with the Banking Control Law of the Kingdom of Saudi Arabia, a minimum of 25% of the net income for the year is required to be transferred to a statutory reserve until this reserve is equal to the paid up capital of SABB. Accordingly, a sum of SAR 810 million (2011: SAR 722 million) was transferred to statutory reserve. The statutory reserve is not currently available for distribution.

**18. Other reserves**

**The Saudi British Bank**  
**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**  
**31 December 2012**

2011 SAR'000	Cash flow Hedges	Available for sale investments	Total
Balance at beginning of the year	(9,604)	115,575	105,971
Net change in fair value	(3,190)	(315,714)	(318,904)
Transfer to consolidated statement of income	(8,585)	(4,192)	(12,777)
Net movement during the year	(11,775)	(319,906)	(331,681)
Balance at end of the year	(21,379)	(204,331)	(225,710)

The discontinuation of hedge accounting during the year and prior years resulted in reclassification of the associated cumulative gains of SAR 4.9 million (2011: SAR 8.6 million) from equity to the consolidated statement of income included in the above numbers under cash flow hedges.

**19. Commitments and contingencies**

**a) Legal proceedings**

As at 31 December 2012 there are legal proceedings outstanding against the Bank. No material provision has been made as professional advice indicates that it is not probable that any significant loss will eventuate.

**b) Capital commitments**

As at 31 December 2012 the Bank has capital commitments of SAR 108.9 million (2011: SAR 66.6 million) in respect of buildings and equipment purchases.

**c) Credit related commitments and contingencies**

Credit related commitments and contingencies mainly comprise guarantees, letters of credit, acceptances and commitments to extend credit. Guarantees and standby letters of credit, which represent irrevocable assurances that the Bank will make payments in the event that a customer cannot meet its obligations to third parties, carry the same credit risk as loans and advances. Documentary letters of credit, which are written undertakings by the Bank on behalf of a customer authorising a third party to draw drafts on the Bank up to a stipulated amount under specific terms and conditions, are generally collateralised by the underlying shipments of goods to which they relate and therefore have significantly less risk. Acceptances comprise undertakings by the Bank to pay bills of exchange drawn on customers. The cash requirement under these instruments is considerably less than the amount of the related commitment because the Bank generally expects the customers to fulfil their primary obligation.

Commitments to extend credit represent the unutilised portion of authorisations to extend credit, principally in the form of loans and advances, guarantees and letters of credit. With respect to credit risk on commitments to extend credit, the Bank is potentially exposed to a loss in an amount equal to the total unutilised commitments. However, the likely amount of loss, which cannot readily be quantified, is expected to be considerably less than the total unutilised commitment as most commitments to extend credit are contingent upon customers maintaining specific credit standards. The total outstanding commitments to extend credit do not necessarily represent future cash requirements, as many of the commitments could expire or be terminated without being funded.

**d) The contractual maturity structure of the Bank's credit related commitments and contingencies is as follows:**

2012 SAR'000	Within 3 months	3-12 months	1-5 years	Over 5 years	Total
Letters of credit	9,804,879	4,125,883	1,883,126	-	15,813,888
Guarantees	14,873,046	16,064,400	19,646,215	68,220	50,651,881

**Senior executives (requiring SAMA no objection):**

This comprises senior management having responsibility and authority for formulating strategies, directing and controlling the activities of the Bank whose appointment requires no objection from SAMA. This covers the Managing Director and other executives directly reporting to him.

**Employees engaged in risk taking activities:**

This comprises of management staff within the business lines (Corporate, Trade Services, Private Banking and Treasury employees), who are responsible for executing and implementing the business strategy on behalf of the Bank. This also includes those involved in recommending and evaluating credit limits and credit worthiness, pricing of loans, undertaking and executing business proposals and treasury dealing activities.

**Employees engaged in control functions:**

This refers to employees working in divisions that are not involved in risk taking activities but engaged in review functions (Risk Management, Compliance, Internal Audit, Treasury Operation, Amanah Islamic Banking Services, Finance and Accounting). These functions are fully independent from risk taking units.

**Other employees:**

This includes all other employees of the Bank, excluding those already reported under categories mentioned above.

**Outsourced employees:**

Staff employed by various agencies who supply services to the Bank on a full-time basis in non-critical roles. None of these roles require risk undertaking or control.

**ii) Qualitative Disclosure**

**Compensation disclosure for the Annual Financial Statements**

SAMA being the Banking industry regulator for the Kingdom of Saudi Arabia, has issued its Rules on compensation practices, which is in line with Basel II and FSB Principles. In compliance with the SAMA Rules on compensation practices, a compensation policy endorsed by Nomination and Remuneration Committee and approved by the Board of Directors has been formulated and implemented.

**SABB Compensation Policy**

**a) Policy Objectives**

The policy sets the guidelines as to how both fixed and variable pay will be managed at SABB. The scope of policy covers the following: all categories of employees; its subsidiaries; all compensation elements; key determinants of compensation; approval process; reporting processes; bonus deferral process; share retention and relevant stakeholder's roles and responsibilities.

The objectives of the policy are to: align the reward practices with the Bank's strategy & values so as to support the successful execution of the strategy in a risk compliant manner; offer an attractive employee value proposition to attract, retain and motivate competent and committed people ; and ensure the financial sustainability of SABB.

**b) Compensation Structure**

SABB's compensation operates on a Total Package basis that is benchmarked to market data from peers in the appropriate industry. Total Package comprises of the following blend of fixed and variable compensation elements: salaries, allowances; benefits; annual bonuses; short-term incentives; and long-term incentives.

**c) Performance Management System**

The performance of all employees is evaluated against agreed targets using a Performance Scorecard methodology, financial, customer, process and people. A calibration process is applied to ensure fair and equitable performance evaluation. The performance management methodology at SABB focuses on the differentiation of individual performance and drives the variable reward strategy which encourages high performance within a risk compliant manner.

**d) Risk-adjustment for Variable Pay schemes**

The Bank has reviewed all its variable pay schemes, with the assistance of external remuneration consultants, to ensure that any bonus pay pools have taken into account all relevant risks. The determination of bonus pools is based on appropriate performance factors adjusted for risk. The bonus pool for the Control functions have been ring fenced from short term profits in alignment with SAMA regulations.

**e) Bonus Deferral**

Bonus deferral in the form of equity applies to all employees who are either subject SAMA "No Objection" and /or undertake or control significant risk undertaking by the Bank. Bonuses of all these employees will be subject to deferral over a three year vesting period. The vesting will be subject to malus conditions.

**f) Nomination and Remuneration Committee**

The Nomination and Remuneration Committee has oversight of the remuneration structures and policies for all employees to ensure that: all performance based bonuses are adjusted for risk; compensation structures are regulatory compliant; and effective in achieving its stated objectives.

**25. Basic and diluted earnings per share**

Basic earnings per share for the year ended 31 December 2012 and 2011 is calculated by dividing the net income for the year attributable to the equity holders by 1,000 million shares to give a retroactive effect of change in number of shares as a result of bonus shares issued (see note 16).

Diluted earnings per share is the same as basic earnings per share as the Bank has not issued any instruments which would have an impact on earnings per share when exercised.

**The Saudi British Bank**  
**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**  
**31 December 2012**

**26. Gross dividend, zakat and income tax**

The Board of Directors has proposed a gross dividend of SAR 1,000 million for the year 2012 (2011: SAR 562.5 million). Dividends will be paid to the Saudi and non-Saudi shareholders after deduction of zakat and income tax respectively as follows:

**Saudi shareholders:**

Zakat attributable to the Saudi shareholders for the year amounted to approximately SAR 46.7 million (2011: SAR 41.9 million) which will be deducted from their share of dividend, resulting in a net dividend to Saudi Shareholders of SAR 0.92 per share (2011: SAR 0.66 per share).

**Non Saudi shareholders**

Income tax attributable to the foreign shareholder on its current year's share of income is approximately SAR 253.6 million (2011: SAR 230.4 million).

The share of dividend of HSBC Holdings BV will be paid after deducting the related taxes due as described above.

**Status of final assessments**

The Bank received the final assessments from the Department of Zakat and Income Tax (DZIT) for all years up to the year ended 31 December 2004. The Bank has filed an appeal for certain matters in respect of the years ended 31 December 2003 and 31 December 2004.

The Bank has filed its zakat returns for the years ended 31 December 2005 to 31 December 2011. However, the assessments have not been finalised by DZIT.

SABB has received the initial Zakat assessment in respect of the year ended 31 December 2010. The assessment is primarily due to the disallowance of certain long-term investments from the Zakat base of SABB. SABB has filed an appeal before the Preliminary Zakat and Tax Appeal Committee (PZTAC) which is yet to be taken up by the Appeal Committee.

**27. Cash and cash equivalents**

Cash and cash equivalents included in the consolidated statement of cash flows comprise the following:

	<b>2012</b>	2011
	<b>SAR'000</b>	SAR'000
Cash and balances with SAMA excluding the statutory deposit (note 3)	<b>13,501,513</b>	16,585,956
Due from banks and other financial institutions with an original maturity of ninety days or less from date of the acquisition	<b>8,091,410</b>	4,347,018
<b>Total</b>	<b>21,592,923</b>	20,932,974

**28. Operating segments**

The Bank's primary business is conducted in Saudi Arabia.

Transactions between the operating segments are on normal commercial terms and conditions. There are no material items of income or expense between the operating segments. Segment assets and liabilities comprise operating assets and liabilities, being the majority of the balance.

**a) The Bank's reportable segments are as follows:**

**Retail Banking** – which caters mainly to the banking requirements of personal and private banking customers.

**Corporate Banking** – which caters mainly to the banking requirements of commercial and corporate banking customers.

**Treasury** – which manages the Bank's liquidity, currency and special commission rate risks. It is also responsible for funding the Bank's operations and managing the Bank's investment portfolio and liquidity position.

**Others** – includes activities of SABB Securities Limited and investment in associates.

**The Saudi British Bank**  
**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**  
**31 December 2012**

Transactions between the operating segments are reported as recorded by the Bank's transfer pricing system. The Bank's total assets and liabilities as at 31 December 2012 and 2011, its total operating income and expenses, and the results for the years then ended, by operating segment, are as follows:

Credit exposure comprises the carrying value of assets excluding cash, property and equipment, other assets, investment in associates and equity investments, and the credit equivalent value for commitments, contingencies and derivatives is based on the credit conversion factor as prescribed by the SAMA Basel II guidelines.

## 29. Credit risk

The Bank manages exposure to credit risk, which is the risk that one party to a financial instrument will fail to discharge an obligation and cause the other party to incur a financial loss. Credit exposures arise principally in lending activities that lead to loans and advances, and investment activities. There is also credit risk on credit related commitments and contingencies and derivatives.

The Bank assesses the probability of default of counterparties using internal rating tools. Also the Bank uses the external ratings, of the major rating agency, where available.

The Bank attempts to control credit risk by monitoring credit exposures, limiting transactions with specific counterparties, and continually assessing the creditworthiness of counterparties. The Bank's risk management policies are designed to identify and to set appropriate risk limits and to monitor the risks and adherence to limits. Actual exposures against limits are monitored daily. In addition to monitoring credit limits, the Bank manages the credit exposure relating to its trading activities by entering into master netting agreements and collateral arrangements with counterparties in appropriate circumstances, and limiting the duration of exposure. In certain cases the Bank may also close out transactions mitigate credit risk. The Bank's credit risk for derivatives, represents the potential cost to replace the derivative contracts if counterparties fail to fulfill their obligation. To control the level of credit risk taken, the Bank assesses counterparties using the same techniques as for its lending activities.

Concentrations of credit risk arise when a number of counterparties are engaged in similar business activities, or activities in the same geographic region, or have similar economic features that would cause their ability to meet contractual obligations to be similarly affected by changes in economic, political or other conditions.

Concentrations of credit risk indicate the relative sensitivity of the Bank's performance to developments affecting a particular industry or geographical location.

The Bank seeks to manage its credit risk exposure through diversification of lending activities to ensure that there is no undue concentration of risks with individuals or groups of customers in specific locations or business. It also takes security when appropriate. The Bank also seeks additional collateral from the counterparty as soon as impairment indicators are noticed for the relevant individual loans and advances.

Management monitors the market value of collateral and requests additional collateral in accordance with the underlying agreements. It also monitors the market value of collateral obtained during its review of the adequacy of the provision for credit losses.

The Bank regularly reviews its risk management policies and systems to reflect changes in market's products and emerging best practice.

The debt securities included in the investment portfolio are mainly sovereign risk. Analysis of investments by counterparty is provided in note 5. For details of the composition of loans and advances refer to note 6. Information on credit risk relating to derivative instruments is provided in note 10 and for commitments and contingencies in note 19. The information on Bank's maximum credit exposure by operating segment is given in note 28. The information on maximum credit risk exposure and their relative risk weights is also provided in note 35.

**The Saudi British Bank**  
**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**  
**31 December 2012**

**31. Market risk**

Market Risk is the risk that the fair value or future cash flows of financial instruments will fluctuate due to changes in market variables such as special commission rates, foreign exchange rates, and equity prices. The Bank classifies exposures to market risk into either trading and non-trading or banking-book.

The market risk for the trading book is managed and monitored using Value at Risk (VAR) methodology. Market risk for non-trading book is managed and monitored using a combination of VAR, stress testing and sensitivity analysis.

**a) Market risk-trading book**

The Board has set limits for the acceptable level of risks in managing the trading book. The Bank applies a VAR methodology to assess the market risk positions held and to estimate the potential economic loss based upon a number of parameters and assumptions for change in market conditions.

A VAR methodology estimates the potential negative change in market value of a portfolio at a given confidence level and over a specified time horizon. The Bank uses simulation models to assess the possible changes in the market value of the trading book based on historical data. VAR models are usually designed to measure the market risk in a normal market environment and therefore the use of VAR has limitations because it is based on historical correlations and volatilities in market prices and assumes that the future movements will follow a statistical distribution.

The VAR that the Bank measures is an estimate, using a confidence level of 99% of the potential loss that is not expected to be exceeded if the current market positions were to be held unchanged for one day. The use of 99% confidence level depicts that within a one-day horizon, losses exceeding VAR figure should occur, on average, not more than once every hundred days.

The VAR represents the risk of portfolios at the close of a business day, and it does not account for any losses that may occur beyond the defined confidence interval. The actual trading results however, may differ from the VAR calculations and, in particular, the calculation does not provide a meaningful indication of profits and losses in stressed market conditions.

To overcome the VAR limitations mentioned above, the Bank also carries out stress tests of its portfolio to simulate conditions outside normal confidence intervals. The potential losses occurring under stress test conditions are reported regularly to the Bank's ALCO committee for their review.

The Bank's VAR related information is as under.

**The Saudi British Bank**  
**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**  
**31 December 2012**

**b) Market risk – non trading or banking book**

Market risk on non-trading or banking positions mainly arises from the special commission rate, foreign currency exposures and equity price changes.

**i) Special commission rate risk**

Special commission rate risk arises from the possibility that the changes in commission rates will affect either the fair values or the future cash flows of the financial instruments. The Board has established commission rate gap limits for stipulated periods. The Bank monitors positions daily and uses hedging strategies to ensure maintenance of positions within the established gap limits.

The following table depicts the sensitivity to a reasonably possible change in commission rates, with other variables held constant, on the Bank's consolidated statement of income or equity. The sensitivity of the income is the effect of the assumed changes in commission rates on the net special commission income for one year, based on the floating rate non-trading financial assets and financial liabilities held as at 31 December 2012, including the effect of hedging instruments. The sensitivity of equity is calculated by revaluing the fixed rate available for sale financial assets; including the effect of any associated hedges as at 31 December 2012 for the effect of assumed changes in commission rates. The sensitivity of equity is analysed by maturity period of the asset or swap.

The Bank is exposed to risks associated with fluctuations in the levels of market special commission rates. The table below summarises the Bank's exposure to special commission rate risks. Included in the table are the Bank's assets and liabilities at carrying amounts, categorised by the earlier of the contractual repricing or the maturity dates. The Bank is exposed to special commission rate risks as a result of mismatches or gaps in the amounts of assets and liabilities and derivative financial instruments that reprice or mature in a given period. The Bank manages this risk by matching the repricing of assets and liabilities through risk management strategies.

Cumulative special commission rate sensitivity gap	27,599,825	47,064,816	60,652,432	60,647,917	-	

The net gap between derivative financial instruments represents the net notional amounts of derivative financial instruments, which are used to manage the special commission rate risk.

**ii) Currency risk**

Currency risk represents the risk of change in the value of financial instruments due to changes in foreign exchange rates. The Bank does not maintain material non trading open currency positions. Foreign currency exposures that arise in the non trading book are transferred to the trading book and are managed as part of the trading portfolio. The foreign exchange risk VAR disclosed in note 31(a) reflects the Bank's total exposure to currency risk.

The Bank is exposed to fluctuations in foreign currency exchange rates. The Board of Directors sets limits on the level of exposure by currency, and in total for both overnight and intra day positions, which are monitored daily. At the end of the year, the Bank had the following significant net exposures denominated in foreign currencies:

	<b>2012</b> <b>SAR'000</b> <b>Long (short)</b>	<b>2011</b> <b>SAR'000</b> <b>Long (short)</b>
US Dollar	<b>(279,733)</b>	(22,246)
Euro	<b>1,219</b>	4,793
Sterling Pounds	<b>(364)</b>	(1,935)
Other	<b>(77)</b>	(5,565)

**The Saudi British Bank**  
**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**  
**31 December 2012**

**iii) Equity price risk**

Equity price risk is the risk that the fair value of equities decreases as the result of changes in the level of equity indices and individual stocks. The non trading equity price risk exposure arises from equity securities classified as available for sale. A 10 per cent increase or decrease in the value of the bank's available for sale equities at 31 December 2012 would have correspondingly increase or decrease equity by SAR 92 million (2011: SAR 103 million).

**32. Liquidity risk**

Liquidity risk is the risk that the Bank will be unable to meet its payment obligations when they fall due under normal and stress circumstances. Liquidity risk can be caused by market disruptions or credit downgrades, which may cause certain sources of funding to be less readily available. To mitigate this risk, management has diversified funding sources in addition to its core deposit base, manages assets with liquidity in mind, maintaining an appropriate balance of cash, cash equivalents and readily marketable securities and monitors future cash flows and liquidity on a daily basis. The Bank also has committed lines of credit that it can access to meet liquidity needs.

In accordance with the Banking Control Law and the regulations issued by SAMA, the Bank maintains a statutory deposit with SAMA of 7% of total demand deposits and 4% of savings and time deposits. In addition to the statutory deposit, the Bank also maintains liquid reserves of not less than 20% of the deposit liabilities, in the form of cash, Saudi Government Development Bonds or assets, which can be converted into cash within a period not exceeding 30 days. The Bank has the ability to raise additional funds through repo facilities available with SAMA against Saudi Government Development securities.

The table below summarises the maturity profile of the Bank's financial liabilities. The contractual maturities of liabilities have been determined on the basis of the remaining period at the reporting date to the contractual maturity date and does not take account of effective maturities as indicated by the Bank's deposit retention history. The amounts disclosed in the table are the contractual undiscounted cash flows, whereas the Bank manages the inherent liquidity risk based on expected undiscounted cash inflows. All derivatives used for hedging purposes are shown by maturity based on their contractual, undiscounted repayment obligations. As the major portion of the derivatives trading book comprises of back to back transactions and consequently the open derivatives trading exposures are small, the management believes that the inclusion of trading derivatives in the contractual maturity table is not relevant for an understanding of the timing of cash flows and hence these have been excluded.

Management monitors the maturity profile to ensure that adequate liquidity is maintained. The weekly liquidity position is monitored and regular liquidity stress testing is conducted under a variety of scenarios covering both normal and more severe market conditions. All liquidity policies and procedures are subject to review and approval by ALCO. A summary report, covering the bank and operating subsidiaries, including any exceptions and remedial action taken, is submitted monthly to ALCO.

Assets available to meet all of the liabilities and to cover outstanding loan commitments include cash, balances with SAMA, items in the course of collection; loans and advances to banks; and loans and advances to customers. The maturities of commitments and contingencies is given in note 19(d) of the consolidated financial statements.

### 33. Fair values of financial instruments

#### Determination of fair value and fair value hierarchy

The Bank uses the following hierarchy for determining and disclosing the fair value of financial instruments:

Level 1: quoted prices in active markets for the same instrument (i.e., without modification or repacking):

Level 2: quoted prices in active markets for similar assets and liabilities or other valuation techniques for which all significant inputs are based on observable market data: and

Level 3: valuation techniques for which any significant input is not based on observable market data.

Fair value is the amount for which an asset could be exchanged or a liability settled between knowledgeable, willing parties in an arm's length transaction. Consequently, differences can arise between the carrying values and fair value estimates.

The fair values of recognised financial instruments, except for other investments held at amortised cost, held-to-maturity investments, loans and advances and customer deposits, are not significantly different from the carrying values included in the financial statements. The estimated fair values of held-to-maturity investments and other investments held at amortised cost are based on quoted market prices, when available, or pricing models in the case of certain fixed rate bonds. The fair values of these investments are disclosed in note 5. It is not practicable to determine the fair value of

**The Saudi British Bank**  
**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**  
**31 December 2012**

loans and advances and customer deposits with sufficient reliability except as disclosed above. The fair values of financial instruments that are part of a designated fair value hedge relationship but are not carried at fair value as a class of financial instruments have been disclosed in the note above. These include loans and advances and debt security in issue.

The total amount of the changes in fair value recognised in the statement of income, which was estimated using valuation technique, is positive SAR 51.9 million (2011: SAR 163.1 million).

**34. Related party transactions**

Managerial and specialised expertise is provided under a technical services agreement with HSBC Holdings plc, the parent company of HSBC Holdings BV. This agreement was renewed on 30 September 2012 for a period of five years.

In the ordinary course of its activities, the Bank transacts business with related parties. In the opinion of the management and the Board, the related party transactions are performed on an arm's length basis. The related party transactions are governed by limits set by the Banking Control Law and the regulations issued by SAMA.

The year end balances included in the consolidated financial statements resulting from such transactions are as follows:

	<b>2012</b>	2011
	<b>SAR'000</b>	SAR'000
<b>The HSBC Group:</b>		
Due from banks and other financial institutions	<b>3,991,636</b>	2,230,796
Investments	<b>914,264</b>	845,806
Other assets	-	3,410
Derivatives (at fair value)	<b>(407,273)</b>	(557,228)
Due to banks and other financial institutions	<b>3,574,821</b>	4,165,841
Other liabilities	<b>3,046</b>	-
Commitments and contingencies	<b>2,393,331</b>	2,068,672

The above investments include investments in associates, amounting to SAR 612.2 million (2011: SAR 565.2 million).

**Directors, audit committee, other major shareholders and their affiliates:**

Loans and advances	<b>3,206,394</b>	3,463,838
Customers' deposits	<b>8,782,768</b>	8,922,735
Derivatives (at fair value)	<b>6,581</b>	776
Commitments and contingencies	<b>39,729</b>	273,596

**Bank's mutual funds:**

Loans and advances	<b>532</b>	31,064
Customers' deposits	<b>782,871</b>	1,406,178

Other major shareholders represent shareholdings (excluding the non-Saudi shareholder) of more than 5% of the Bank's issued share capital.

**The Saudi British Bank**  
**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**  
**31 December 2012**

Income and expense pertaining to transactions with related parties included in the consolidated financial statements are as follows:

	<b>2012</b>	2011
	<b>SAR'000</b>	SAR'000
Special commission income	<b>106,110</b>	50,932
Special commission expense	<b>(240,194)</b>	(197,639)
Fees and commission income	<b>48,781</b>	64,503
Profit share arrangement relating to investment banking activities	<b>(2,416)</b>	(6,099)
Share in earnings of associates	<b>111,230</b>	64,165
Directors' remuneration	<b>2,789</b>	2,720

The total amount of compensation paid to key management personnel during the year is as follows:

	<b>2012</b>	2011
	<b>SAR'000</b>	SAR'000
Short-term employee benefits (salaries and allowances)	<b>39,126</b>	48,089
Employment termination benefits	<b>5,968</b>	8,709

Key management personnel are those persons, including an executive director, having authority and responsibility for planning, directing and controlling the activities of the Bank, directly or indirectly.

The Bank offers share based payment scheme arrangements to certain senior management and employees. There were two such schemes outstanding at 31 December 2012. The detail of this scheme has not been separately disclosed in these consolidated financial statements as amounts are not material.

### **35. Capital adequacy**

The Bank's objectives when managing capital are, to comply with the capital requirements set by SAMA; to safeguard the Bank's ability to continue as a going concern; and to maintain a strong capital base.

Capital adequacy and the use of regulatory capital are monitored regularly by the Bank's management. SAMA requires the Bank to hold the minimum level of the regulatory capital and to maintain a ratio of total regulatory capital to the risk-weighted assets at or above the agreed minimum of 8%.

The Bank monitors the adequacy of its capital using the methodology and ratios established by SAMA. These ratios measure capital adequacy by comparing the Bank's eligible capital with its assets, commitments and contingencies, and notional amount of derivatives at a weighted amount to reflect their relative risk.

	<b>2012</b>	2011

**36. Basel II Pillar 3 Disclosures**

Under Basel II pillar 3, quantitative and qualitative disclosures of the Bank's exposures, risk weighted assets and capital are required, and these disclosures will be made available on Bank's website [www.sabb.com](http://www.sabb.com) and the annual report, respectively as required by SAMA.

**37. Prospective changes in accounting standards**

The standards and interpretations that are issued, but not yet effective, up to the date of issuance of the Bank's consolidated financial statements are disclosed below. The Bank intends to adopt these standards, if applicable, when they become effective.

***IFRS 7 Disclosures — Offsetting Financial Assets and Financial Liabilities — Amendments to IFRS 7***

These amendments require an entity to disclose information about rights to set-off and related arrangements (e.g., collateral agreements). The disclosures would provide users with information that is useful in evaluating the effect of netting arrangements on an entity's financial position. The new disclosures are required for all recognised financial instruments that are set off in accordance with IAS 32 *Financial Instruments: Presentation*. The disclosures also apply to recognised financial instruments that are subject to an enforceable master netting arrangement or similar agreement, irrespective of whether they are set off in accordance with IAS 32. These amendments will not impact the Bank's financial position or performance and will become effective for annual periods beginning on or after 1 January 2013.

***IFRS 9 Financial Instruments***

IFRS 9, as issued, reflects the first phase of the IASB's work though the adoption date is subject to the recently issued Exposure Draft on the replacement of IAS 39 and applies to classification and measurement of financial assets and liabilities as defined in IAS 39. The standard was initially effective for annual periods beginning on or after 1 January 2013, but *Amendments to IFRS 9 Mandatory Effective Date of IFRS 9 and Transition Disclosures*, issued in December 2011, moved the mandatory effective date to 1 January 2015. In subsequent phases, the Board will address impairment and hedge accounting. The Bank will quantify the effect of the adoption of the first phase of IFRS 9 in conjunction with the other phases, when issued, to present a comprehensive picture.

***IFRS 10 – Consolidated Financial Statements, IAS 27 Separate Financial Statements***

The standard becomes effective for annual periods beginning on or after 1 January 2013. It replaces the requirements of IAS 27 *Consolidated and Separate Financial Statements* that address the accounting for consolidated financial statements and SIC 12 *Consolidation – Special Purpose Entities*. What remains in IAS 27 is limited to accounting for subsidiaries, jointly controlled entities, and associates in separate financial statements. The Bank is currently assessing the impact of adopting IFRS 10.

***IFRS 12 – Disclosure of Involvement with Other Entities***

The standard becomes effective for annual periods beginning on or after 1 January 2013. It includes all of the disclosures that were previously in IAS 27 related to consolidated financial statements, as well as all of the disclosures that were previously included in IAS 31 *Interests in Joint Ventures* and IAS 28 *Investment in Associates*. These disclosures relate to an entity's interests in subsidiaries, joint arrangements, associates and structured entities. A number of new disclosures are also required. One of the most significant changes introduced by IFRS 12 is that an entity is now required to disclose the judgements made to determine whether it controls another entity. Many of these changes were introduced by the IASB in response to the financial crisis. Now, even if the Bank concludes that it does not control an entity, the information used to make that judgement will be transparent to users of the financial statements to make their own assessment of the financial impact were the Bank to reach a different conclusion regarding consolidation.

The Bank will need to disclose more information about the consolidated and unconsolidated structure entities with which it is involved or has sponsored. However, the standard will not have any impact on the financial position or performance of the Bank.

***IFRS 13 – Fair Value measurement***

The standard becomes effective for annual periods beginning on or after 1 January 2013. IFRS 13 does not change when an entity is required to use fair value, but rather, provides guidance on how to measure the fair value of financial and non-financial assets and liabilities when required or permitted by IFRS. There are also additional disclosure requirements.

Adoption of the standard is not expected to have a material impact on the financial position or performance of the Bank.

***IAS 1 Presentation of Items of Other Comprehensive Income – Amendments to IAS 1***

The amendments to IAS 1 change the grouping of items presented in other comprehensive income (OCI). Items that could be reclassified (or recycled) to profit or loss at a future point in time (for example, net gains on hedges of net investments, exchange differences on translation of foreign operations, net movements on cash flow hedges and net losses or gains on available-for-sale financial assets) would be presented separately from items that will never be reclassified (for example, actuarial gains and losses on defined benefit plans). The amendment affects presentation only and has no impact on the Bank's financial position or performance. The amendment becomes effective for annual periods beginning on or after 1 July 2012.

***IAS 19 Employee Benefits – Amendments***

The amendments to IAS 19 remove the option to defer the recognition of actuarial gains and losses, i.e., the corridor mechanism. All changes in the value of defined benefit plans will be recognised in profit or loss and other comprehensive income. The effective date of the standard is 1 January 2013.

The adoption of these amendments will require the Bank to recognise :

- A service cost and a net interest income or expense in profit or loss
- The re-measurements of the pension assets and liabilities, i.e., actuarial gains and losses in the other comprehensive income.

Adoption of these amendments is not expected to have a material impact on the financial position or performance of the Bank.

***IAS 28 Investments in Associates and Joint Ventures (as revised in 2011)***

As a consequence of the new IFRS 11 Joint Arrangements, and IFRS 12 Disclosure of Interests in Other Entities, IAS 28 Investments in Associates, has been renamed IAS 28 Investments in Associates and Joint Ventures, and describes the application of the equity method to investments in joint ventures in addition to associates. The revised standard becomes effective for annual periods beginning on or after 1 January 2013.

***IAS 32 Offsetting Financial Assets and Financial Liabilities — Amendments to IAS 32***

These amendments clarify the meaning of "currently has a legally enforceable right to set-off". It will be necessary to assess the impact to the Bank by reviewing settlement procedures and legal documentation to ensure that offsetting is still possible in cases where it has been achieved in the past. In certain cases, offsetting may no longer be achieved. In other cases, contracts may have to be renegotiated. The requirement that the right of set-off be available for all counterparties to the netting agreement may prove to be a challenge for contracts where only one party has the right to offset in the event of default.

The amendments also clarify the application of the IAS 32 offsetting criteria to settlement systems (such as central clearing house systems) which apply gross settlement mechanisms that are not simultaneous. Offsetting on the grounds of simultaneous settlement is particularly relevant for the Bank as to where it engages in large numbers of sale and repurchase transactions. Currently, transactions settled through clearing systems are, in most cases, deemed to achieve simultaneous settlement. While many settlement systems are expected to meet the new criteria, some may not. Any changes in offsetting are expected to impact leverage ratios, regulatory capital requirements, etc. As the impact of the adoption depends on the Bank's examination of the operational procedures applied by the central clearing houses and settlement systems it deals with to determine if they meet the new criteria, it is not practical to quantify the effects.

These amendments become effective for annual periods beginning on or after 1 January 2014.

***Annual Improvements May 2012***

These improvements will not have an impact on the Bank, but include:

***IAS 1 Presentation of Financial Statements***

This improvement clarifies the difference between voluntary additional comparative information and the minimum required comparative information. Generally, the minimum required comparative information is the previous period.

**The Saudi British Bank**  
**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**  
**31 December 2012**

**IAS 32 *Financial Instruments Presentation***

This improvement clarifies that income taxes arising from distributions to equity holders are accounted for in accordance with IAS 12 *Income Taxes*.

**IAS 34 *Interim Financial Reporting***

The amendment aligns the disclosure requirements for total segment assets with total segment liabilities in interim financial statements. This clarification also ensures that interim disclosures are aligned with annual disclosures.

These improvements are effective for annual periods beginning on or after 1 January 2013.

**38. Comparative figures**

Certain prior year figures have been reclassified to conform with the current year's presentation.

**39. Board of Directors' approval**

The consolidated financial statements were approved by the Board of Directors on 6 Rabi' Al Thani 1434H (Corresponding 16 February 2013).
